

THE YELLOWS !!

Yes, they will get **THE YELLOWS**
and you will get **THE BLUES !**

BUT DON'T WAIT TILL THEN—it don't pay. Put your Peach Trees and Grape Vines and Orchards into good condition, so that you may get a good crop of Sound Fruit next year. Give them **BOYD'S POTASH SALTS AND BONE BLACK**—give every tenth tree a feed—if you are afraid to give them all some—and see how it improves them.

"Nothing Venture, Nothing Have."

DON'T try the same trick the man did with his horse. He got the poor beast down to a straw a day. Then there was a dead horse.

Some of us will be having **DEAD ORCHARDS** and **DEAD VINEYARDS**—or small, bad crops, which amount to the same thing—if we don't watch out and give them something to live on.

What have you fed them on in the last ten years? **DONT YOU NOTICE A CHANGE IN THE ORCHARDS ?** Is it any wonder? Tons of Fruit, tons of Corn, Hay, Straw and other truck—but never a mouthful of food for the Trees and Vines.

DELAYS
ARE DANGEROUS !
Give them a Feed **NOW !**
