

# BISHOPRIC WALL BOARD

makes remodelling your home easy, quick and inexpensive

### Are the Walls and Ceiling of your Bathroom in bad shape?

Is the plaster discolored, cracked or falling? Replace it, or cover it up, with the material that never cracks or falls, Bishopric Wall Board.

This Board is made, as you can see from the illustration below, of kiln-dried dressed lath imbedded under heavy pressure in a layer of Asphalt-Mastic, which is coated on the other side with heavy sized cardboard. This Asphalt-Mastic is absolutely damp-proof, making clean, sanitary walls and ceiling that will not warp, crack or pull away from the studding.

### Do you need an extra room or two?

Then finish off the Attic with Bishopric Wall Board. It comes in sheets 4 feet square, packed 16 sheets in a crate, ready to be carried up to the attic and nailed right on to the studding.

You can put it on yourself if you like—and there won't be any of the muss and disorder through the house that you can't avoid if you use lath and plaster.

**Bishopric Wall Board costs so little, too—only \$2.50 per 100 square feet. Compare that with the cost of lath and plaster.**

**Bishopric Wall Board Co., Limited**  
OTTAWA, Ont.

Please send me your Illustrated Booklet and Sample of Bishopric Wall Board. L

## Mr. Orchardman! Use This Coupon—NOW

A DECISION now as to the proper methods of cultivating and fertilizing your orchard will mean dollars and cents to YOU next season.

NOW—after harvest—is the best time to apply fertilizers, viz.: POTASH and Phosphoric Acid. This because the plant-food in these materials by the action of winter cold and spring thaws, will make the plant-foods completely available by the time the sap flows in the spring. You need have no fear of loss by leaching.

In the world-famed Annapolis Valley, the customary practice is to apply 600 lbs. Bone Meal (furnishing the Phosphoric Acid and Nitrogen), and 300 lbs. Muriate of POTASH per acre in the fall. If you can't get Bone Meal, apply 400 to 600 lbs. per acre of Acid Phosphate or Basic Slag. The Nitrogen is supplied by plowing under clover or leguminous plants, or by applying Nitrate of Soda in the spring.

If you prefer a factory-mixed fertilizer, be sure and get one containing at least 10% of POTASH.

The present high price for apples should impress you with the importance of improving the quality and increasing your crop. It is the best quality of fruit that demands the best prices.

If you want to learn more about cultivating and fertilizing orchards, our Scientific Bureau will be glad to advise you fully. This Bureau is composed of the very best agricultural experts in Canada. This advice is scientifically and agriculturally correct, and it is good.

The attached coupon makes it convenient for you to send for our "Garden and Orchard" booklet. If you will let us know your soil condition our Scientific Bureau will tell you, without charge, how best to cultivate your own particular orchard.
