

THE
NATIONAL
Cream Separator

FOR USE IN FARM DAIRIES

"NATIONAL" NO. 1 HAND POWER.
Capacity, 330 to 350 lbs. per hour.

THIS cut shows the "National" No. 1 Hand Power Cream Separator, manufactured by The Raymond Manufacturing Company (Limited), Guelph, Ont. Since the introduction of this machine, it has taken so well that we have not been able to supply the steadily increasing demand. It has proved a decided success from the start. We have consequently been obliged to increase our manufacturing capacity, and have put in a number of the most improved machines obtainable, by which we are now in a position to more than double our former output. No expense is being spared to make the "National" a perfect machine, and we believe we have succeeded so far as to claim that it has no equal for:

- 1st. Closeness of Skimming, and smooth, even condition in which it leaves the cream under all circumstances.
- 2nd. Easy Cleaning. It takes only about half the time that other Separators require, on account of the few pieces there are to handle.
- 3rd. Ease of Running. Its simplicity of construction, having so few bearings, and those being anti-friction ball bearings, makes it such an easy-running machine that a boy or girl from ten to twelve years of age can operate it.

A trial of the "National" is all that we ask in order to ensure a sale to an intending purchaser. The sale of this machine for the Province of Ontario is in the hands of
