is undoubtedly a first-class
advertising medium. It cir-
culates extensively in the
homes of the clergy and
laity. Our advertisers as-
sure us that it is an ex-
cellent paper to advertise
in as it brings most satis-
factory returns.

confirmed came over thirty miles. The next morning in the same hall I gave an extended instruction on the Holy Communion and administered it to twenty-eight persons. The day before that there were only four communicants within forty miles of the place."

The Rev. Cyril F. Garbett, M.A., has accepted the important Vicarage of Portsea, in succession to the late Canon Bernard Wilson. Mr. Garbett has been curate of Portsea for ten years, and at the time of Canon Wilson's death, was the chief of the staff of the sixteen curates in St. Mary's parish. His appointment has given general satisfaction where his powers as a preacher and an organizer are highly appreciated. The parish of Portsea includes a population of 50,000 and it is one of the three largest parishes in England. Besides the Mother Country there are half-a-dozen Mission Churches in various parts of the parish, and the vicarage is used as a general home for the large staff of clergy. Mr. Garbett graduated from Keble College, Oxford, in 1898, and after spending a year at Cuddesdon College, was ordained to the curacy of Portsea in 1899. The Bishop of St. Alban's and the Archbishop of York were among the former vicars of Portsea.

Three more beautiful tablets have been added to the little collection of unique memorials to deceased Knights of the Order of St. Michael and St. George which have been let into the floor in the centre of the chapel of the Order of St. Michael and St. George in St. Paul's Cathedral, London. The whole forms a softly shining figure of seven diamonds of aluminium, the simple design consisting, in each case, of the dead man's coat-of-arms and his name. They were dedicated on a recent date, the officiating clergy being Bishop Montgomery, Prelate of the Order, and Canon Newbolt, as the representative of the Dean and Chapter, and are in memory of the late Sir Henry Barkly, the late Sir Arthur Havelock, and the late Colonel Sir Charles Vincent. This dedication was followed by the hanging of the banners of two Knights Grand Cross—i.e., the Earl of Minto and Sir John Bramston. The congregation consisted chiefly of members of the families concerned.

The Rev. J. Percy Baker, previous to leaving Christ Church, Ellacombe, Torquay, for the vicarage of Charles Church, Plymouth, was presented by the churchwardens of the former church on behalf of the congregation with an oak roll-top writing desk with engraved plate, a cheque for £105, and an illuminated album with the names of the 390 subscribers. Mrs. Baker was also presented with a diamond ring. A few days later than on this occasion, Mr. Baker was presented with a quarter-chime clock, in oak case with inscribed plate, from the members of the Y.P.S.C.F., the only Church of England branch in Torquay, and the organist and choir presented a large framed photograph of the clergy and choir of the parish church. Mrs. Baker also received from the members of the Mothers' Meeting a pair of silver vases, and from the teachers and scholars of the Girls' Sunday School a dinner-gong. The loss to the parish, and indeed to the whole town of Torquay, is very great.

After a residence of sixteen years at Cambridge, eleven of which he has spent as curate of Holy Trinity, Rev. A. G. Dodderidge preached his farewell sermon prior to leaving Cambridge to enter upon a new sphere of work, he having been appointed to a living in the diocese of Exeter. On the previous day Mr. Dodderidge received a parting present in the shape of a handsome silver tea service from

**The Way to Cure
All Skin Diseases**

The Prescription is Simple: Purify
the Blood by Using Stuart's Cal-
cium Wafers—and the Rest
is Easy.

If people only realized the utter absurdity of attempting to cure a pimply, blotchy, unsightly complexion by means of the many irrational and illogical methods employed in "beauty parlors," and also in the boudoir, thousands of dollars which are wasted every year—literally thrown away—would be saved, and the complexion rendered clear and free from blemishes through constitutional treatment, at about one-tenth of one per cent. of the cost of the "fancy" and exceedingly expensive local "treatments."

The idea of massaging the cheeks, and attempting to rub in a so-called "skin-food," is the height of nonsense. Nature never intended the skin to be fed from the outside, but from the inside exclusively, and it is the blood which really feeds the skin, builds it up, and supplies it with nutriment absorbed from the digestive system. There is really no such thing as a "skin-food," any more than is a "heart-food," or "lung-food," or a "brain-food."

The skin is a water-proof, air-proof envelope over the muscular system, and it has no power to absorb cold creams, or any other medicaments when rubbed over its surface. While, of course, steaming the face, or massaging with electricity, or by hand, will draw the blood temporarily to the surface and produce an artificial glow, which may last half an hour or so, but such treatment brings no lasting benefit, and will never cure wrinkles, pimples, pustules, blackheads, or facial blemishes.

Besides, the frequent treatment of the skin in the way which "beauty doctors" have—those kneading, rubbing, "cooking" methods, making the face for the time being as red as a boiled lobster, also have the very undesirable effect of increasing and strengthening the hair-growth on the cheeks.

The only logical treatment in acquiring and maintaining a perfect complexion, devoid of all blemishes, such as blotches, pimples, roughness, chapping, scaly patches, etc., is to go after these troubles from the inside—to strike at the foundation, the origin of the complaints—and that means, in other words, to thoroughly purify the blood, by using STUART'S CALCIUM WAFERS.

These powerful little wafers as soon as taken into the system, exert their wonderful, blood-purifying effects, and they never let up for a moment, until every atom of impurity in the blood is eliminated, and, in addition to that, they also build up the blood, and strengthen the circulation through the skin's surface, and thus render wrinkles and skin blemishes impossible of existence.

the children and young people who had attended his Sunday afternoon service. The Vicar (the Rev. H. L. C. de Candole), in making the presentation, referred to the great loss they were all suffering in the removal of Mr. Dodderidge. He thought especially of the support given to the C.M.S. by the afternoon service, which now had its "Own Missionary" in China, and raised nearly enough to support a second. On the Monday a large number of undergraduates met at Ridley Hall, at the invitation of the Principal, (Rev. A. J. Tait), to bid arewell to Mr. Dodderidge and to present him with a silver salver as a token of their gratitude and affection.

Children's Department.

A VERY EXCEPTIONAL ESKIMO.

Shall I tell you a few of the things I know
Of a very exceptional Eskimo?
If you don't believe—but of course you will—
Strange things have happened and happen still:
And some of the strangest things ever known
Occur far up in the Arctic zone.

In the Arctic zone by the great north pole
Lives this Eskimo, in a scooped-out hole
In a great snow bank that is mountain high—
If you reached the top you could touch the sky!
And his clothes he views with a proper pride,
They are all white fur with the fur inside.

When he wishes his friends to come to dine
He calls them up on the polar line
And says, "Please come at the hour of two
And partake of a dish of sealskin stew,
With codfish oil and a water ice
And a blubber pudding that's very nice!"

When he goes to ride he can start his sleigh
And never stop for a whole long day—
Lickety whiz-z-z! Down a slope of white!
And a reindeer carries him back at night,
While the polar bears from his path he warns
By blowing one of the reindeer's horns!

When he goes to bed it is not enough
To hide his nose in a bearskin muff,
But his ears he wraps, if it's very cold,
In a feather bed, and I have been told
That he toasts his head—for it really seems,
If he didn't, the cold might freeze his dreams!

—St. Nicholas.
