SILVER CLIFF

Galena El Dorado of Newfoundland

For the moment the... of politics and very glad to... hours before the Glencoe... from Argentina, on Monday May... Clyde Lake, J. Long, W... E. R. Chafe, R. B. Job and... Jeffery very gladly availed of... of Mr. W. A. MacKay to... to Silver Cliff and inspect... proceeding in the mine.

The motor boat was headed for... twin hills resembling in... in fifteen minutes... in sight of a frame build... of construction—the... of Silver Cliff City of the... with a glorious expanse of bay... in a magnificent pan... hills, the proposed site of the... which in itself will be... to attract attention.

However, however, was not the... of interest, and meeting... the Manager, at the land... the party was escorted to... the mine.

Mr. W. A. MacKay, and indeed is... who has come within... distance of the promoter... he had been talked about by... in his convincing man... even the most skeptical... convinced that it is... real and tangible.

Not long before the party... convinced of its reality... astounded at the progress... had been made and with... possibilities which the... promises for the future.

Small staff house which... been completed. Mr. Climax... the plans of the mines and... the visitors the various... of the lead which had been ob... proceeding to the actual work... shown the various... through which the excavat... from the time it left

the crusher until it finally reached... the concentrating tables. These... of four rough slabs about twelve... feet by eight which assemble the... different classes of lead ore according... to the size or fineness of the grains... Already in the bins were some ninety... tons of the ore ready for shipment... and the amount was being increased... as fast as the somewhat difficult... working conditions permitted.

A visit was then paid to the drives... which had been run into the hill... Lights were produced and with one... eye on the roof and the other on the... ground, the party penetrated the... tunnels to a distance of 280 feet in one... direction and 230 feet in the other... Everywhere were striking indications... of the presence of the mineral in... quality. Emerging once more into the... light of day the visitors climbed the... hill for about fifty feet and again... plunged into darkness. The lights... provided certainly indicated the di... rection which the guides were taking... but were of little assistance to those... who stumbled along in the rear in... deciding which way was dry footing or... not, and somehow one's foot invariably... under such circumstances finds that... which is not.

The gleaming light flashed back... from the surface of the blasted rock... as the lamps were turned upon it... brought expressions of surprise from... the visitors and everyone was eager... to secure a sample of the mineral... That was not difficult to obtain. Some... of the pieces passed out from the end... of the tunnel where a shot had just... been fired were altogether too weighty... to carry around conveniently, but... would have proved most effective had... the suggestion made been carried into... effect, namely, that a certain candi... date for election should drop one of... them on the head of his political op... ponent standing immediately below!

Out again into the blinding light of... day, the party were given further de... tails of the plans under considera...

MUTT AND JEFF

Produce and Provisions.

Codfish—Not much can now be written as to codfish. The St. John's market is practically denuded, except for the late caught fish of last fall, which after all is comparatively small. The outlook for the future is bright, and with a good catch of fish well cured, we are certain to market most of our catch of both Shore and Labrador. The prices that will rebound to the country's benefit. Cod is making its appearance already in many places and the fishery will soon be in full swing, and we must hope for the desired success. The Norwegian fishery now promises to be a record one of nearly so, this year's total to date being 62 millions as against 46 millions for last year, but no doubt most of this will have been disposed of in the European markets before our new fish comes into competition with it. The exports for the week were 2,547 quintals for the West Indies, and 350 quintals to Italy, while the schr. Jordon T. Tibbo sailed for Oporto from Grand Bank with 4,761 quintals.

Flour—As far as trade in flour goes the market has taken on the activity usually evident at this more or less busy season, and much business was done during the week. Much of the goods is being handled in connection with the supplying for the fishery in addition to the current consumption all over the country. To date the imports we will up to the average of other years, and it would not be surprising if imports this year were not in excess of some of the more prosperous of previous periods, as the article is now perhaps cheaper than it has been for many years past. The remission of the duty and the cutting of the freight one half has largely contributed to this. The market all the week has been strong, and there was an advance of 20 cents per barrel. The imports for the week were 4,534 bbls. by the Winona from Montreal, 1,980 by the Essex from New York, and 840 by S.S. Hekia. The prices, wholesale, locally, vary from \$4.80 to \$7.25 and \$7.30 per barrel, according to the quality required.

Rural Tragedy in Spain Brings Death to Four
Madrid, May 12. (A.P.)—Three persons were killed and one burned to death recently as a result of an attempted burglary of a lodge occupied by a woman and her family at a remote railway crossing near Monzon.

A gipsy woman armed with a revolver broke into the lodge with the object of robbing it. The crossing-keeper overpowered her, locked her in one of the rooms and then sent her son to fetch his father. The gipsy woman's husband, who had been keeping watch outside, realizing that his wife was a prisoner, caught the son, killed him, and himself got into the lodge to release his wife.

The gatekeeper succeeded in locking him in another room where a big stock of wood was kept and then set fire to it. The man was burned to death.

Meanwhile two policemen, attracted by the cries of the tortured gipsy arrived on the scene. As they entered the room in which the gipsy woman was locked, she fired and killed one of them and was herself shot dead by the other.

Bible Text Used as Ballot
Berlin, May 19. (A.P.)—When the tellers in one of the outlying Berlin districts counted the votes in the recent Reichstag election, they found one ballot marked "John 4:24."

From the Bible the tellers learned what the voter thought of the 188 candidates running in the district: "Behold, ye are of nothing, and your work of naught; an abomination is he that chooseth you."

California to Produce Silk
OHIOVILLE, Cal., June 4. (A.P.)—A silk farm near here has commenced operations of incubating more than 2,000,000 eggs of silk worms for the commercial production of silk. The eggs were imported from France and Italy. The farm has more than 25,000 mulberry trees planted for feeding the worms and furnishing the material from which silk is made.

somewhat higher while the present dearth of the article prevails, but those in trade, competent to speak on the matter, do not believe the advance, if any, will be excessive. The reports for the week were: 300 bbls. by the Rosalind from New York; 100 bbls.

WOMAN'S HEALTH RESTORED

She Claims Lydia E. Pinkham's Vegetable Compound Did It After Everything Else Failed

Milwaukee, Wisconsin.—"I feel that I ought to let you know about my case. I was so run-down, and could barely do my housework and washing I just had to give up. I took a lot of medicines and had doctors. Then I gave them all up and took Lydia E. Pinkham's Vegetable Compound and I feel wonderfully good now. I do everything that comes along, and we all have your medicine as a tonic when we don't feel just so. I am thankful for what the Vegetable Compound has done for my health and for my family."—Mrs. MARY SAIBERBUCK, 944 23rd Street, Milwaukee, Wisconsin.

Letters like these testify to the value of the Vegetable Compound. These women speak from the fullness of their hearts. They describe as correctly as they can their conditions. First, these symptoms that affected them most conspicuously; and later the disappearance of those symptoms. They are sincere expressions of gratitude. For nearly fifty years Lydia E. Pinkham's Vegetable Compound has been praised by women.

by the Winona from Montreal; 200 bbls. by C.S. Spas from Halifax, and 100 bbls. by S.S. Schem from Boston. The local prices, wholesale, are: Boe Flank, \$24.50 per bbl.; Extra Family, \$23; Boe Packet, \$23; Family Special, \$20; Boe Ham, \$17.50; Afternoon, Boneless, \$20.25; Boneless N.Y., \$26.

Sugar—Most dealers in sugar are now of the opinion that prices have reached the bottom mark, and that no further decline in figures seems to be possible, at least, for a while yet, as the consumption of this article must continue to increase largely during the next few months. As a matter of fact during the last couple of days of the week an advance of about 10 points was recorded, which would go to show that the general tendency is for an upward turn for the present, and it must be remembered that the Cuban crop which is now being harvested will be available in a month or six weeks time. The sugar imported during the week amounted to 1,525 bbls. by various conveyances from New York and Halifax, and the prices prevailing on the local market are: for granulated, \$3.20 per bbl.; and for brown sugar in 100 lb. sacks, \$7.55.

Molasses—Though the duty has been removed from molasses, all indications are at present that, before many months pass over, the price will soar; and it cannot be otherwise, for supplies to date are very much short of those received last year. Molasses will be a hard article to procure six months hence, all dealers believe, and our imports to date, as far as we can hear, are much less than last year. The market is pretty active now, owing to the presence of the fishery supplying season. The price ruling to date is in excess of that quoted last year, but not much so. Had the duty remained on the goods, however, it would have been much heavier. During the week two cargoes of molasses arrived here. The schr. Catherine Moulton discharged 300 puns, 30 tiers, and 150 bbls., and the schr. Little Stephen, 267 puns, 25 barrels and 147 half barrels—for factory (new) 90 cents the gallon, and choice (new) 80 cents.

Tea—Like most other lines, the market in tea has been active of late, and a good deal of business is being done. In England the duty on this article has been lowered considerably, and quite a rush demand has ensued there as a result, so that some of the more prominent importers say that in some of the exporting countries an advance has been noted of about one penny or nearly two cents per lb., and no doubt there will be a sympathetic advance in this market. Up to date, however, nothing like this has been noticed, and prices rule the same as last week. The weeks imports were 100 packages by the Rosalind from New York; 335 by the Digby from Liverpool; and 100 by the Schem. Figures locally, wholesale, vary from 34 to 80 cents per pun, according to quality.

Hay & Oats—There is not much doing in hay and oats at present, nor will there be for some months to come. Of the latter there were imported during the week 3,056 sacks by S.S. Winona from Montreal, and the figures quoted locally are: P.R.I. Black Oats, \$3.50 per sack of four bushels; White 2 feed, \$3.35; Mixed, \$3.30. Hay is quoted at \$36 per ton.

Miscellaneous—Amongst the miscellaneous imports for the week were 2,347 sacks potatoes, 268 packages of butter, 88 packages of cheese, 300 crates cabbage, 8,000 fire clay brick, 750 packages cement, 800 sacks corn, 100 bags rice, 437 sacks peas, 780 boxes soap, 350 bags salt, 600 pieces of spruce deals, 100 bbls. prunes, 325 packages soap powder, 300 tubs lard, 150 pieces pipe, 205 packages shoes, 50 cases canned goods, 92 pcs. maple flooring, 98 packages rubber boots, 103 packages slippers, 155 packages paper, and 75 cases oranges.
