Bran waste is one great difference between good and poor flours.

The food part of flour is "protein."

Protein makes bone, muscle and brain.—There is no protein in bran.

-bran is the outside part, the husk or "bark" of the wheat.

-bran is the part of the wheat which is absolutely without food-value to the human system.

-bran represents part of the difference between Royal Household Flour and whole-wheat flour or cheap, inferior flours that are poorly milled and not thoroughly purified.

No other flour in this country is so thoroughly and completely separated from the waste as is "Royal Household," because no other mills are so well equipped or exclusively devoted to the production of scientifically pure flour as Royal Household mills.
