This master-stroke of modern them convert food into rich, fat-laden blood. This master-stroke of modern chemistry is called Sargol and has been termed the greatest of flesh-builders. Sargol aims through its regenerative, reconstructive powers to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to every starved, broken-down cell and tissue of your body. You can readily picture the result when this amazing transformation has taken place and you notice how your cheeks fill out, hollows about your neck, shoulders and bust disappear and you take on from 10 to 20 pounds of solid, healthy flesh. Sargol is absolutely harmless, inexpensive, efficient.
