Before Mr. Tustin was appointed to his present position, interest was lacking for the prevention of cruelty to dumb animals, but after months of hard work he has succeeded in bringing about a change

Not long ago one man in this county faced a charge, when ten head of cattle, two horses and fifty poultry were found in a starving condition. Mr. Tustin declared without any hesitancy that the City of London is second to none in Canada for well ept horses, and that it alone can boast that all the teamsters are members of the Humane Society. GOITRE INCREASE

One in Every Six Female Students Shows Enlargement of Neck.

A definite and marked increase in coitre affectfon in girls between the ges of 13 and 16 has been revealed in an examination of 332 girl students conducted by the Institute of Public Health recently. One girl in every six, or 17 per cent of female students attending he schools, show enlargements of the eck near the thyroid gland.

The report, as submitted by Dr. H. W. Hill, dean of the institute, shows that 332 girls from 12 to 29 years were examined. Of these 15 or 25 per cent had been previously seen and diag-nosed by a physician. The remaining 44 had not been seen by any medical dvisor, although many students and their families were aware of the en-largement, but did not recognize it as

The number of students at the age 12, and at ages above 16, was very small, the percentages at these ages being therefore relatively unreliable. It s striking that at 13 to 16 inclusive a marked increase in incidence of enargement was evident.

The institute, with the permission of he Techincal School, makes this information public in the interests of better

Dear Editor:

Why all the panic about girls proposing? Do any of these men ever realize that a girl is just as anxious to escape their proposals as they are to escape their proposals as they are to escape those of the girls who are "pulling their legs" during leap year? If the average man ever got away from the comic section of the news-
