

## CONSERVATIVE PARTY WAS FOR DREADNOUGHTS

G. H. Barnard, M. P., Back From Ottawa, Says Conservatives in House of Commons Would Have Endorsed Offer of Battleships for the Defence of Empire.

House, who has just returned after attending the recent session.

"There is a tremendous amount of talk about Victoria and British Columbia in the east," remarked Mr. Barnard last evening, "and the travel in this direction will be very heavy during the present summer. Many of the members intend visiting the coast and Vancouver Island, and all spoke of the eulogies which they had heard of British Columbia as a whole. I can appreciate these latter myself, for never have I so recognized the charms both of climate, scenery and everything else of the capital city of British Columbia than I have in the last twenty-four hours. Here we are in the midst of summer, but back there in Ottawa the trees are hardly budding."

The east is just beginning to recognize that the political star is moving westward, and that the provinces towards the Pacific are fast proving much greater factors in the affairs of the Dominion than previously.

That the Conservative party would have endorsed the offer of a Dreadnought or Dreadnoughts as Canada's contribution to the imperial defence, that Hon. R. L. Borden and his supporters were anxious to see the construction of the G. T. P. hastened, and that in the East there is marked sympathy with the determined stand British Columbia has taken against Oriental immigration, are statements made by G. H. Barnard, M. P., Victoria's representative in the Federal House of Commons.

"Increased interest is manifested in our climate, resources, and our problems, and the eastern public men are finding that they must visit the west and obtain a first-hand knowledge of conditions here."

All prospects point to a bumper crop upon the prairies, Mr. Barnard stated, and throughout east and west alike Canadians are pervaded with a spirit of optimism which is a happy augury of the good times at hand. Despite the fact that the season is a late one, the weather conditions are ideal, and a big harvest is presaged.

### The Session.

But it was with the labors of the body to which he was recently elected that Mr. Barnard dealt at great length. The five months' session was a laborious one, for if the mills of the

## ONE ON THE DOCTORS

Madame J. Rioux, St. Moise, Que., says: "Fruit-a-lives cured me of severe Liver Disease. Neither doctors nor any other remedy did me any good, but Fruit-a-lives promptly cured."

"Fruit-a-lives" always cure Liver Trouble, Biliousness and Constipation because they act directly on the liver. They stimulate the secretion of Bile, which decreases the quantity of blood in the liver and thus relieves the congestion or Biliousness. With plenty of Bile to move the Bowels, there is an end to the Constipation.

"Fruit-a-lives" are a positive cure for all troubles arising from a disordered liver.

"Fruit-a-lives" are the juices of apples, oranges, figs and prunes—prepared by a newly discovered process, and combined with valuable tonics and antiseptics. They are, without doubt, the most popular remedy in Canada today.

Get a box, 6 for \$2.50, or trial box, 25c. If you can't get "Fruit-a-lives" in your neighborhood, these wonderful pills will be sent, postpaid, on receipt of price by addressing Fruit-a-lives, Limited, Ottawa.

It is heavily subsidized by the government, the Dominion it has received \$209,600, from the province of Ontario, \$378,000, together with \$75,000 each from the provinces of British Columbia, Alberta, Saskatchewan, Manitoba, and the Northwest Territories. It is the controlling factor in the traffic of the entire road yet the government has absolutely no lien or charge of any kind upon it. So with the knowledge of Prince Rupert—so with all the townships. These tools while Tom put a light to the fuse.

Alex. had just stepped back and had just grabbed up a pick and a shovel when, without the slightest warning, the side of the coal into which they had drilled the hole swung over on top of them. Alex. who was a foot or two behind Tom, managed to throw himself to the side, and the huge mass of coal passed over him, just grazing his back. The other was caught in the fall, however, and although his brother and others, working like Trojans, extricated him, he was so severely injured that he died yesterday morning in the Cheminists Hospital, following an operation.

The other accident occurred today.

Outdoor Sport and Zam-Buk

Every athlete, every ball player, every swimmer, every canoeist, every man or woman who loves outdoor life and exercise, should keep a box of Zam-Buk handy.

Zam-Buk is a purely herbal preparation which, as soon as applied to cuts, bruises, burns, sprains, blisters, etc., sets up highly beneficial operations. First its antiseptic properties render the wound free from all danger from blood-poisoning. Next, its soothing and healing qualities soothe the pain. Then its rich herbal balsams penetrate the tissue, and set up the wonderful process of healing.

It was approached by many members who asked where they could obtain particulars as to the number of Oriental immigrants in this province, and figures upon the matter. They stated that they had been asked for them by local debating societies. You

may be sure that I was very glad to comply with these requests, and to do a little missionary work."

Incidentally Mr. Barnard referred to the little tilt he had had with Sir Frederick Borden with regard to the local defence. It had been closed by the admission by the minister of militia that the Dominion government was content with a garrison at Work Point barracks of less than half the number considered necessary by the Imperial authorities.

The efforts of Mr. Burrell, Mr. Goodeve, of Mr. Cowan and of Mr. Taylor, whose journalistic experience in the press gallery has made of him an able tactician, have been very efficacious, and the contingent from British Columbia generally have, effectively demonstrated that British Columbia is on the map," he concluded.

## TWO FATALITIES AT EXTENSION

Miner Injured While Taking Out Coal and Boy Crushed by Cars

Nanaimo, June 8.—Two fatal accidents have occurred at Extension Mines in the last three days, one on Saturday, the other yesterday.

On Saturday morning, in No. 3 mine, Extension, an Austrian named T. Kulal lost his life. Kulal and his brother were working in a pillar, the height of the place being about 12 feet. They had fired one shot and had loaded out the coal. They drilled another hole in the top coal in what was the rib. They had just completed tamping the hole, and Alex. the younger brother, proceeded to gather up the tools while Tom put a light to the fuse.

Alex. had just stepped back and had just grabbed up a pick and a shovel when, without the slightest warning, the side of the coal into which they had drilled the hole swung over on top of them. Alex. who was a foot or two behind Tom, managed to throw himself to the side, and the huge mass of coal passed over him, just grazing his back. The other was caught in the fall, however, and although his brother and others, working like Trojans, extricated him, he was so severely injured that he died yesterday morning in the Cheminists Hospital, following an operation.

The victim was Moses Webley, the 15 year old son of Mr. and Mrs. T. Webley, of Ladysmith. The boy was caught between two cars and so badly crushed that he died shortly after reaching home at Ladysmith.

## MANY WOUNDED

London, June 8.—A despatch received here from Cracow, in Austrian Poland, says: Five hundred persons were wounded by the explosion of an army powder magazine here on Saturday night. Three soldiers were killed, forty houses were wrecked and hundreds of other houses damaged, and many of the wounded are seriously hurt. The magazine, which was situated near the railroad station, was struck by lightning and exploded. Several thousand pounds of powder went off, and 1,800 projectiles were scattered among a big crowd of people, who assembled at the station, awaiting the trains. The local hospitals are crowded with the wounded.

Owing to the steadily increasing cost of fine goods such as are sold to the public under the brand "Salada," it has been found necessary to advance the prices of these teas to the grocer. Consequently the consumers will have to pay a correspondingly increased price, but undoubtedly they will be willing to do this in order to get the finest tea the world produces.

CHICKEN FOR BAIT CATCHES JAIL BIRD

Columbus, O., June 7.—Having wandered in and there within the walls of the Ohio penitentiary without let or hindrance since last Wednesday night of last week, Harvey Johnson, the negro life-terminator, has been captured.

The round-up came just in time to relieve the prison officials from the growing apprehension that the disappearance was a case for a neurologist instead of one for guards and detectives. Since he vanished Johnson had been seen in so many places so many different times, had so frequently vanished into thin air when cornered in the angle of a wall, and had proved himself such an expert in bullet dodging that the suspicion had been slowly growing that there was no Johnson and never had been.

Johnson's return to the realm of the things tangible was not due to the purchase of bloodhounds or the hiring of special detectives. Even Tim O'Leary, of Philadelphia, who it was reported, had been consulted, failed to furnish a clue. It is rumored, had suggested that the prison might be torn down. The officials, haggard and worn, were, however, just upon the point of accepting the O'Leary tip, when the guards placed under cover.

The "escaped prisoner" was suddenly seen on the prison grounds.

Fifteen guards rushed upon him. Three shots were fired and a call for mercy was heard. Johnson made no effort to escape. He continued to eat. The recaptured captive seemed much surprised. He said he had no idea of running away. He did not even know that any one was looking for him.

The telegram was signed simply, "A woman who knows how to catch 'em."

The suggestion saved the day. Three chickens, with the trimmings, were cooked and set out as bait, with the guards placed under cover.
