WHAT DO YOU TEACH

How many mothers are teaching their girls to-day the value of money or the necessity of being economical? It is not their ability to dance well that will make them valuable help-mates in the future, but their ability to spend to the best possible advantage the money their future husbands bring home.

IN MEMORY OF FREDERICK MYLES ANDERSON

On behalf of our congregation I wish, as Pastor of the Church, to place on record our very great appreciation to:

Fire Prevention Week, which is being observed throughout Canada this week, is being marked by some novel features in New Brunswick.

Realizing that one of the most important factors in the prevention of fire is the education of children, the citizens of tomorrow, steps have been taken to have Fire Prevention Week schools.

With this end in view a specially prepared programme of lessons to be carried out in the public schools was sent out to all teachers through the News letter of the New Brunswick Junior Red Cross, which issued a special Fire Prevention Number. The teachers are thus expected to give an important factor in influencing not only the children, but through the children the adult population.

The programme was so planned as to take up one phase of the subject each day from Monday to Thursday.

Friday, One feature of the programme calls for every pupil, except the very youngest, to write an essay on "We Should Protect Forests and Why."

In this connection the prize competition on the subject stated; the essays are limited to 500 words in English or French and are to be sent to The Junior Red Cross, 100 Prince William Street, St. John, and the awards will be announced as soon as the judging is completed.
