RUTHERS

**Part Apparently of all properties of scalpers, who are bulls on the bulges and bears on breaks. The trade is light and local character. Traders not disposed to take large deals. It is said that Partridge covered his shorts yesterday and went long and to-day is trying to bull market. Although the shorts do not seem numerous and it begins to look like a long market another little bulge would not be a surprise. Com and oats dull and steady. They both act like long markets, but the pressure is not very like long markets, but the pressure is not very like long markets, but the pressure is not very like long markets, but the pressure is not very like long markets, but the pressure is not very like long markets, but the pressure is not very like long markets of the interior markets continues to gain. Provisions are little stronger with further liquidation of the discussed longs. Some time ago the appearances became pronouncedly bearish, but this year was not admitted by the longs and they are now being found out:

The Future Mining, Smelting FOR EUROPE W. A. GEDDES, AGENT

NATURAL ADVANTAGES

This important point has many natural advantages not possessed by any of the other towns and villages of the district. To begin with it is in the very heart of the great mineral range that extends from Lake Wahnapitæ to the north shore of the Georgian Bay.

These vaults are unequaled in Canada; absolutely Burglar and FIRE-PROOF and further in the throughout with the Holmes Electric Protection.

To encourage their more general use in Toronto for the safe custody of Bonds, Securities and other Valuables, the Company proposes until 1st April next to rent the remaining small sized compartments WATER POWER

Another great natural advantage of this point is the fine water power right beside the town site, on the Vermillion River. The power is practically unlimited and can be utilized at little or no cost. Then it is almost certain that in the near status alocations will be ap-

HOTELS AND RESTAURANTS. almost certain that in the near future electricity will be applied to the reduction of ores, and water power is in every way more preferable for driving electric motors. For this reason alone Nickel City is bound to become the great smelting centre of the range. The mines can also be lit by electric light for at least ten miles around it.

IN A TIMBER BELT The timber of seven large limits (each 36 square miles)
has to be brought down at this
point, four by the river from
the north and three by the lake from the Indian reserve to the east. As the railway crosses the town site at the junction of the town site at the junction of the river and the lake, affording shipping facilities in all directions, the timber and lumber for the mines and towns of the district can be cut and manufactured to the best ad-

THE TOWN SITE It is acknowledged by every-one who has seen it that Nickel City is by far the best and prettiest town site on the whole prettiest town site on the whole range. The land risesgradually from a level beach to a height of about 100 feet (with a southern slope to the sun), and nearly every lot faces the lake. The thick grove of second-growth timber on it is only being partially cleared off, so that a number of beautiful shade trees may be left on each lot. No place could be better supplied with water. Besides the lake, the river and a large creek, there are several large creek, there are several running springs on it, one of which is said to be the finest on the range. The water of this remarkable spring boils up through white sand and is Cuba, Florida, Jamaica, Mexico, West Indies, etc.

For beautifully illustrated pamphlets, rates, outes, plans of steamers, tickets and general formation, apply to BARLOW CUMBERLAND different parties have found it

MINING OPERATIONS

28 Adelaide-street East, Toronto.

a more effective cure for dys-pepsia than the best patent medicine ever made. There is no other spot on the range that can in anyway compare with Nickel City as a summer resort. In the first place it is more free from mosquitoes and black flies, the twin pests of the district in the mid-summer months, owing to the altitude of the land district of the land district in the mid-summer months, owing to the altitude of the land district in the mid-summer months.

mer months, owing to the alcititude of the land, distance from swamps and the constant breeze from the lake. Prospect Point, which is a high rocky bluff projecting into the lake over a quarter of a mile, commands a magnificent view of the rapids and falls in the river, the winding lake in front and the amphitheatre of towering cliffs and ridges that surround the lake on three sides. A fine large hotel and a number of cottages are to be built before the constant ber of cottages are to be built breeze and Roller Works—Explanade east. Towers and Roller Works—Explanade east. Towers—Explanade ea Stationary and Marine Boilers, Steam Launches and Yachts, Steam Pumps, Windlasses, etc.

Engine and Boiler Works—Esplanade east, To-ronto. Shipbuilding Works and Dry Dock—Owen Sound, Ont. A fine large hotel and a number of cottages are to be built on this point next summer to accommodate the capitalists and others interested in mining in that part of the district. In short, the inherent attractiveness, convenient situation and many advantages of this point will assuredly make it the favorite summer resort of the range.

Anyone familiar with the district knows that the richest part of the range is in the townships of Denison, Graham and Drury, and of which Nickel City is the natural centre. Over 50 mining claims have been taken up within five miles of the town site, for nickel, gold, silver and IT IS SAFE AND RELIABLE FOR ite, for nickel, gold, silver and
