LOOKING FOR A FAULT.
About three years ago I resided in a small
village in Connecticut. At that time I had
a fine gold watch, which used to keep remark-
ably good time; in fact, it might be consid-
ered the "town clock" of the village, for
not a day would pass that I would not have
persons coming to have their watches set by
my time.

Among those who were in the habit of
coming, was a man named Jerry Saipes;
who, while in New York, about three weeks
previous, was induced to purchase at a "mock
auction," what he supposed to be a gold
watch, but which, in reality, was nothing more
or less than brass.

Jerry was a very simple and honest fellow,
and knew as much about a watch, as a watch
knew about him. Well, one morning Jerry
paid me one of his usual visits, and from the
smile which played round his mouth, I judg-
ed he was in good humour, and was at a loss
to know the cause; I was not long in sus-
pense, however, for he began to tell me how
he discovered a way to make his watch keep
correct time, and how he intended to hang
her up in his room for the future; and he
wound up his story by asking me to lend him
my watch for two or three days, "to enable
him," as he said himself, "to compare it
with his own daily."

Knowing him to be strictly honest, I gave
him my watch, cautioning him at the same
time to be very careful of her, and on no
account whatever to open her; to all of
which Jerry readily assented.

Three days having passed, and Jerry not
being "up to time," I concluded to go for
my watch myself; so next morning I went
my way to his habitation. On arriving there
I was told by his wife that he was in his room
all the morning, and what she considered very
strange, he forbade any person entering the
room while he was there. Doubts of Jerry's
honesty began to flit through my mind; so,
regardless of his injunction, I bolted into his
room, and there I saw, to my mortification,
Jerry, sitting at the table, on which lay my
watch, all in pieces! Jerry having been try-
ing all the morning (as he said himself) to
find out where the fault lay in his own! I
picked up the fragments of my watch, and
left the house, firmly resolved never to lend
it again.

THE ADVANTAGES OF ADVERTISING.—
There are several mineral waters to be found
near the banks of the Ottawa, in the coun-
ties of Caledonia and Plantagenet, of which
the chief are the Caledonia Waters, the Geo-
rgetown Waters, and the Plantagenet
Waters Proper. Without any dispute
and beyond all cavil, the best of these wa-
ters is the Caledonia, and of the three kinds,
the Plantagenet Proper is perhaps the very
best. No single only proprietor who adver-
tises his waters properly and pays his prin-
ter, is Monsieur Larocque, of the Plantage-
net Proper, and the consequence is, that his
is the only water that now is sold. Go where
you will, open what paper you please, and
there you are sure to read long testimonials,
with good names attached, of the extraordi-
nary virtues of the Plantagenet Waters.
Even the cover of the new Montreal Medical
Journal is half covered with Monsieur Laroc-
que's puff. Well, mineral waters of all
kinds are great humbugs; but the way Mon-
sieur Larocque has walked into the affections
of the people of Canada is decidedly no
humbug—that's a stern reality.—British
Whig.

It is related of a New Englander, who
emigrated to the West, that he wrote home
to his father to come on there, and he would
stand a good chance to get into office, for,
said he, "they put almighty mean men into
office here."

A gentleman presenting a lace collar to
the object of his adoration, and in a peculiar
way said—"Do not let any one else rumple
it."—"No, dear," said the lady, "I will
take it off."

"Now, Sam, if you don't stop licking
that molasses, I'll tell the man."
"By chinks, you tell the man and I'll
lick you and the molasses too."

A thief, surprised in the act of robbing a
bank, is asked what he is about, and answers,
"only taking notes."

BURNS AND FERGUSON.—That Burns erect-
ed a monument over the grave of Ferguson,
the poet, is well known—not so, hitherto, a
little circumstance of interest connected with
this honorable tribute to a brother poet. It
now appears that two years elapsed before
Burns was able to pay for the monument—
as witness a letter to Hill, dated in 1793—
"I send you by the bearer, Mr. Clarke, a
friend of mine, six pounds and a shilling,
which you will dispose of as follows:—Five
pounds ten shillings per account I owe to Mr.
K. Burns, architect, for erecting the stone
over the grave of poor Ferguson. He was
two years in erecting it, after I had commis-
sioned him for it, and I have been two years
paying him, after he sent me his account;

so he and I are quits. He had the hardi-
ness to ask me interest on the sum; but consid-
ering the money was due by one poet for put-
ting a tombstone over another, he may, with
grateful surprise, thank heaven that he ever
saw a farthing of it."—[Cockburn's Life of
Jeffrey.

AMERICAN ITEMS.

THE LARGEST CLIPPER IN THE WORLD.—
Mr. Donald McKay has now on the stocks,
at East Boston, a magnificent clipper ship,
which will register about 2300 tons. "She is
not only the largest merchant ship, but the
sharpest and longest known at the present
day, either building or afloat. She is 240
feet long on the keel, and 265 over all, her
extreme breadth of beam is 43 1/2 feet, and
depth 23 feet 3 inches, including 8 feet height
between decks. She has been named the
EMERALD, a fitting compliment to one
of our most enterprising merchants—a gentle-
man who has done much for the shipping in-
terests of Boston.—Boston Atlas.

The Halibut Fishery.—Notwithstanding
the great sacrifice of life and property attend-
ing the halibut fishery on "George's Banks,"
our Gloucester fishermen still prosecute this
branch of their business every Spring, with
renewed vigor. There are now some seven-
ty-five sail of vessels out of Gloucester alone
engaged in this fishery. These are chiefly
3-masted, 75 to 100 tons burthen, many of
them clipper built, and are manned with
crews numbering some twelve hands each.—
Boston Trav.

There are in Boston 232 persons, copart-
nerships, and corporations, who pay taxes of
\$100,000 and upwards. The American In-
surer, at the British court, Mr. Abbott law-
rence, pays a tax of \$7,565, on property, real
and personal, of \$1,170,000. Mr. Lawrence
is the richest of the Bostonians.

THE MICHIGAN CENTRAL RAIL ROAD, ex-
tended through Indiana on the southern
shore of Lake Michigan to Chicago, is com-
pleted to the latter city, and the first train,
conveying 600 first class passengers, and 300
emigrants, arrived there from Detroit on Sa-
turday.

Peter Faneuil, who built the celebrated hall
in Boston that bears his name, was a French
Huguenot, who was banished from France
by an edict against civil and religious liberty.

MAMMOTH TRAIN.—A correspondent of the
N. Y. Journal of Commerce, writing from
Port Jervis, states that yesterday thirty-
four cars, containing 2737 head of cattle,
hogs and sheep, arrived on their way to
Pittsford, from Dunkirk. Of these 237
were cattle, 996 sheep, and 1514 hogs.—
Whole amount of freight, \$3118 30. Length
of train more than a quarter of a mile.

APPLES.—We never saw the apple trees
in this region, more fully in blossom, than
they are at this time. The indications for an
abundance of fruit are unusually good. The
peach trees, however, should be excepted, the
late hard winter having quite or nearly killed
a good portion of them.—Hartford Times.

A company, composed of three individuals,
is about to erect four mills in Portland,
Maine, of sufficient capacity to manufacture
400,000 bris. of flour per annum.

The funeral of Mrs. Adams, widow of the
late John Quincy Adams, took place at Wash-
ington a few days ago, and was one of the
most numerously attended funerals ever wit-
nessed in that city.—The President, and the
Members of both Houses of Congress attend-
ed.

RIOT IN CORK WORKHOUSE.—A desperate
riot broke out in the Cork workhouse on
Sunday. It originated in the discovery of
an inmate possessing a bottle of whisky,
which he refused to give up and force being
resorted to, resistance was made, and the
master struck by two men in the dining hall.
The police being sent for to arrest them, a
rescue was made, and a fearful Irish row
was commenced by the inmates, speedily aid-
ed by a mob 700 to 1,000 from without the
walls, and headed by desperate women of the
lowest class. Divisions of police were in-
effective and temporary order only restored by
the 7th Dragoons galloping to the scene with
drawn swords, and most materially aided by
the Rev. Mr. McNamara, the Roman Catholic
priest. Every tangible article in the build-
ings was destroyed; stones, of which there
was unfortunately an abundant supply in the
yard, flew about in all directions, seriously
wounding many parties; and at one time it
was reported that the master, three policemen
and eleven inmates had been killed. This,
however, was not correct; but the rioters,
though mastered, are only kept down by main
force; twice have they renewed the struggle,
and at noon, on Monday, the aid of military
was again sought, and, according to the last
accounts, the rioters are only kept in check
by an imposing force of cavalry, infantry,
and constabulary.

It is now stated that Louis Napoleon is
about to marry a daughter of Don Pedro by
his second marriage.
Just before the arrival of the Emperor of
Russia at Warsaw a fire broke out in the city

which destroyed several manufactories, gran-
aries, and depots of merchandise. Five men
of the fire brigade were killed; the royal
bank was at one time threatened with de-
struction, but escaped with only slight da-
mage.

Kossuth's NEXT VISIT TO ENGLAND.—The
Prussian Gazette of the 8th inst., from
Vienna, under date of the 6th, that the Brit-
ish ambassador in that capital has presented
a note from his government to the Austrian
cabinet, in which the most satisfactory assur-
ance is given that, if Kossuth should return
to England, he will not be allowed to abuse
the hospitality afforded to him by making
himself the centre of political agitation.

EXPLOSION OF POWDER MAGAZINE.—In
the afternoon of the 3d instant the powder
magazine in the fortress of Konigsberg was
blown up with an explosion that shook
the house of the town, broke the glass of the
windows and damaged the roof of many.—
The magazine itself was completely levelled
with the earth, and most of the buildings of
the fortress are more or less injured. Three
persons were killed—a clerk of the works,
the sentinel on duty, and a labourer, of their
bodies only fragments have been found; four
others are dangerously wounded. One ac-
count states that the explosion was wilfully
caused by the clerk of the works, a pistol
having been found in a position from which
it appeared he must have fired into a cask
of gunpowder. No one outside the works
has been injured.

MATRIMONIAL MODE OF PROVING INNO-
CENCE.—The other day Mrs. Sniffkins find-
ing herself unwell, sent for a doctor and de-
clared her belief that she was "poisoned,"
and that he (Sniffkins) "had done it!" "I
didn't do it!" showed Sniffkins. "It's all
gumption, she isn't poisoned. Prove it doctor
open her upon the spot—I'm willing."

The venerable Pickle Pickley says:
"Read your Bible, Jabez, study the laws of
Moses, and don't repeat any of 'em; mind the
ten commandments, and the seventh like-
wise, and don't sell the birthright of the
Yankee nation for a mess of potash, and the
day may come when you will be a minister to
a penitentiary, or a secretary of negotiation."

The Crystal Palace at New York.—The
stock for the erection of this building, \$200,
000, has been all subscribed for, and the
palace will be opened in May 1853.
The late census shows 10,103 deaf and
dumb persons in the United States, 9702
blind, 15,765 insane, and 15,706 idiotic.

Two of THEM.—In the Eastern part of
Delaware county, in New York, there re-
sides a man named B—, now a Justice
of the Peace, and a very sensible man, but
by common consent, the ugliest looking indi-
vidual in the whole county; being long-
gaited, sallow, and awry, with a gait like a
kangaroo. One day, he was out hunting,
and on one of the mountain roads, he met a
man on foot and alone, who was longer, gan-
ter, uglier, by all odds, than himself. He
could give the "Square" fifty, and bear
him. Without saying a word, B—
raised his gun and deliberately levelled it at
the stranger. "For God's sake, don't shoot!"
shouted the man in great alarm. "Stranger,
replied B—, "I swore ten years ago, that
if ever I met a man uglier than I was, I'd
shoot him; and you are the first one I've
seen." The stranger after taking a careful
survey of his rival's" replied; "Wal, captain,
if I look any worse than you do right now,
I don't want to live any longer!"—Knicker-
bocker.

European Intelligence.

The Royal Mail steamer Asia has arrived
at New York, bringing Liverpool, dates to
the 22d May, three days later than by the
Arctic.

Cotton had declined 1/2 per lb. Corn dull,
and not much wanted. Flour was firm, and
rather dearer.

The Disabilities Bill passed the Commons
on the 21st.

The oath of allegiance to Louis Napoleon
had been refused by great numbers in France.
The whole Italian Cabinet had resigned in
a body.

VERY LATE FROM THE WEST INDIES.—The
steamer Merlin, Capt. Cope, arrived at New
York from St. Thomas on Saturday last.—
She left the former port of the 20th, and the
letter of the 25th. The crop of sugar this
year at Barbadoes is likely to be the largest
ever made in that island. The difference
between the governor and the house of assem-
bly of Dominicans resulted in a dissolution of
the house. The drought continues very
severe at St. Louis. The Panama, the new
steamer of the S. R. N. W. L. packet Co.
had arrived at St. Thomas from England
in a very quick passage, and had left again
on her return.

TIMBER BERTHS

ST. CROIX RIVER, &c.

CROWN LAND OFFICE, May 13, 1852.

THE right of Licence to cut and carry away Timber and Lumber until the first
day of May 1853, from Crown Lands, in the following situations, which were
last year under Licence to the undermentioned persons, will be offered for sale by
Public Auction, at this Office, at eleven o'clock in the forenoon of Wednesday the twenty
third day of June next. Upset price twenty shillings per square mile.
(Surveyed lots of land heretofore applied for, and improved to the value of ten pounds
are excepted.)
