The "Survival of the Fittest" is illustrated in the records of the Sewing Machine market from 1871 to 1876. In 1871 the Singer Manufacturing Company had 24 competitors whose total annual sales were 424,834 machines. In 1876, 13 competitors had gone out of business; the Total Annual Sales of the Survivors had fallen off 121,217 machines, and the Annual Sales of the Singer's leading competitors had fallen off 19,529 machines.

Meanwhile the sales of the Singer Machine increased from 181,260 to 22,316 machines, and even this enormous number was, despite the "hard times" still further increased in 1877 to **232,812 MACHINES.**
