**NATIONAL ASSOCIATION FOR THE STUDY OF EPILEPSY.**

The eighteenth annual meeting of the National Association for the Study of Epilepsy was held at the Craig Colony for Epileptics, Sonyea, New York, June 6th and 7th. This Association was organized in 1901, for the purpose of promoting the pathologic, therapeutic, social and medico-legal study of the epilepsies. In 1912, the Association became affiliated with the International Liga Contra l'Epilepsie, which is the world association for the study of epilepsies.

The meeting in 1918 was not held because of the war, and re-organization and resumption of activities were effected at the 1919 meeting. The programme set forth scientific medical, social, and institutional aspects. Clinics and demonstrations of *regime* were conducted by members of the medical staff of the Colony. Plans for a union of investigators in allied and neutral countries with those of America were discussed.

Members of the medical profession and laymen who are students of the various aspects of the epilepsies are eligible to membership.
