

WE CAN. We build the most advanced flight simulators in the world.

Utilizing MAXVUE™, our newest high-performance visual simulation system, pilots can train to fly jets, without ever leaving the ground. The result is a safer, more efficient introduction for new aircraft, including all the newest models from Boeing, Airbus, Bombardier/Canadair, BAE and McDonnell Douglas.

But CAE is more than flight simulation. We're one of Canada's leading exporters. And for 50 years, we've been advancing technology in the areas of energy management,

marine systems, forest products, medicine, transportation, the military, separation/filtration technology and air traffic control.

Quite simply, we're leading the way into the future. Our dedication to R&D investment consistently puts us at the top among Canadian companies. But the real foundation of our success and growth is our people. For it is their ingenuity and entrepreneurial spirit that will keep CAE reaching out and solving tomorrow's challenges.

If you can imagine applying technology to solve some of the world's most important problems, then call us at 1-800-760-0667. Because we already have.

CAN YOU IMAGINE

landing a plane

you've never

flown before?
