

x      PREFACE TO FOURTH EDITION.

that the study of the whole field of the Internal Secretions will enable us to detect and correct morbid tendencies with a degree of success which has been denied to the older methods. The microbe—the seed—has ruled the immediate past; the future is with the soil, the endocrine glands.

LEONARD WILLIAMS.

128, HARLEY STREET, W. 1.

*January 1, 1918.*
