

CHAPTER IV.

THE IRON ORES AND ASSOCIATED ROCKS.

Reference to the general map and section, as to the extent of the iron-bearing rocks, 50-51. Map of the iron-region, 50. General distribution of the localities of iron, 51-52. Description of particular deposits, 52-57. The iron cascade, 52. Jackson company's location, 54. The Cleveland location, 55. The iron beds of the Machi-gamig, 56. Near the Menomonee river, 57. Occurrence of the ores of iron in other districts, 58-65. In Scandinavia, 58-59. On the island of Elba, 59-60. In the Ural mountains, 60-61. In Missouri, 61-63. In northern New York, 63-64. In Massachusetts and Canada East, 64-65. Theoretical considerations, 65-68. Résumé, 69..... 60-69

CHAPTER V.

ECONOMIC GEOLOGY OF THE AZOIC SERIES.

Chemical examination of the iron ores, 70-77. Method of analysis adopted, 70-71. Occurrence of foreign impurities in most ores, and their effect on the quality of the iron, 71. Methods adopted to detect these impurities, 71-72. Their absence in the Lake Superior ores, 77. Analyses of ores from various localities in this district, 73-77. Remarks on the results, 77. Metallurgy of the iron ores, 77-81. The Catalan forge, 78-79. The method of working these ores, 79-80. The tenacity of the iron, 80. Cost of production of a ton of iron, 81. Occurrence of other ores, 81-82. Other economic materials, 82-84..... 70-84

CHAPTER VI.

COMPOSITION OF THE TRAPPEAN ROCKS.

The terms trap and trappan rock generic, 85. Varieties of rock which have been included under that name, 86. Their mineralogical composition, 85. Importance of these rocks in our district, 86. Trappean rocks associated with the Potsdam sandstone, 86. Analysis, 86-91. Probable analogy with Dolerite and Anamesite, 90. Occurrence of them in beds, 91. Trappean rocks of the Azoic system, 91-94. Analysis, 92-93. General remarks, 94..... 85-94

CHAPTER VII.

MINERALOGY.

Alphabetical list of minerals occurring in the Lake Superior district, with analyses and remarks..... 95-109

CHAPTER VIII.

LOWER SILURIAN SYSTEM.—POTSDAM AND CALCIFEROUS SANDSTONE.

General characters of the members of this system, 110-113. First traces of organic life, 111. Ancient limits of the oceanic basin, 111. General remarks on the identity of the groups, 111-113. Potsdam sandstone, 113-134. Organic remains, 129-133. Range and extent, 113. Lithological changes, 114. Attempts to identify it with the New-red, 114. Its development on the northern shore of Lake Superior, 115-117. Evidences of volcanic action during this epoch, 115-116. Its
