

MINING AT TRAIL CREEK CAMP.

Booming on its Own Merits—No Wild Speculation—The District Being Opened by Experienced Prospector.

The following interesting article is taken from The Engineering and Mining Journal of New York, dated July 15 last. It bears the signature of David B. Dodge:

The progress made by the Trail Creek camp during this year has been of two kinds—intensive and extensive. It has been equally remarkable in both respects. The improvements in the position and prospects of properties which had a certain standing last summer is sufficiently indicated by a number of circumstances. First comes the appreciation in the value of stocks. Of course a wider market and better advertisement have a tendency to inflate stocks, but as yet there is little or no indication here. The stocks of all the producing mines have quadrupled in value, and at least ten stocks have been added to the market, which have a real, and on the showing possessed by the properties they represent, a progressive value. One mine on Red Mountain, which has enough ore in sight to pay a net return of 50 cents per share on its capital stock, has never been quoted above 50 cents on the local market. This is because of the limited capacity of the West to absorb high-priced shares, and the open market has as yet been developed in the East. The attention of promoters of the more doubtful class has been confined to the printing of stock certificates, which they peddle off in small quantities to the unsuspecting at a few cents per share. There is not, however, enough of a boom to make this business very successful, and so far it has not worked very much injury to the camp. After the appreciation of stocks the most satisfactory indication is the investment of capital in mining machinery. More mining machinery has been and is being set up in Trail Creek division this summer than was ever set up in any part of Canada during the same time before. The producing mines are all increasing and perfecting their plants, and a dozen companies besides are putting in such machinery as will adequately develop their property.

Improvement in transportation is another very remarkable proof of the growth of the camp. One railway is already at the dumps of the mines, and another is under construction. Combined with the railway, now in operation and the Trail smelter, \$7 a ton have been taken off the charges of freight and treatment. The lowest rate of capital required to accomplish this is a proof not only of progress, but a guarantee of the confidence which the low grade ores of Trail Creek inspire among those who know what mines and mining are. The question of actual present dividends is always secondary to the practical miner, whereas it is of primary importance to the outsider. The mine looks to ore in sight and prospective dividends, the outside shareholder wants immediate returns for their money. Up to the present time Trail Creek has paid \$200,000 in dividends. That sum has been paid by two mines. Every pound of ore on which the net return has been shipped by wagon, steamer and railway, except the small amount hitherto consumed by the Trail smelter, which was also shipped by wagon. It would be absurd and unfair to take this as a criterion of Trail Creek's capacity, but merely the first fruits. The dividends paid from Trail Creek will increase from year to year in geometric proportion for a few years yet, and then it will be possible to make an estimate of its probable maximum and possible duration. Calculations made at present must be equally uncertain, though in different directions, whether the actual or possible be accepted as a basis.

The extensive development of Trail Creek camp is one of the most remarkable phenomena ever witnessed in a mining country. The area in which prospecting and development are now being prosecuted extends from the north fork of Salmon River, near the boundary line, up the east shore of the Columbia, through the head waters of Beaver Creek, Champs Creek, Waterloo Creek, then across the Columbia to the west, and north and south from there for 20 miles, including Burnt Pass, Six Mile, China, Sullivan, Murphy, Rock, Stony, Trail and Sheep Creeks. Nor does the extension being limited by the boundaries of the division. Far beyond the region indicated copper and gold are being found and opened up.

The most remarkable proof of this extraordinary activity is to be found in the receipts at the record office. These receipts are in the main small fees on the records of locations, transfers and legal work on claims, as well as miners' licenses. They have swelled the budget to the extent of very nearly \$25,000 this year already, which is more than last year's total and very nearly one-half of what was the entire revenue to the province from West Kootenay three years ago.

Regarding the extent of gold-bearing area three main features have just been put forward. The first is, that rather was that outside the Trail Creek camp is one of the most remarkable phenomena ever witnessed in a mining country. The area in which prospecting and development are now being prosecuted extends from the north fork of Salmon River, near the boundary line, up the east shore of the Columbia, through the head waters of Beaver Creek, Champs Creek, Waterloo Creek, then across the Columbia to the west, and north and south from there for 20 miles, including Burnt Pass, Six Mile, China, Sullivan, Murphy, Rock, Stony, Trail and Sheep Creeks. Nor does the extension being limited by the boundaries of the division. Far beyond the region indicated copper and gold are being found and opened up.

The second is that, wherever the characteristic eruptive rocks of Red Mountain are found, with iron caping, carrying even a trace in gold, pay ore will be found with depth. The third is that, while most good mines have been opened up in different parts, pay claims are not to be looked for under every iron caping.

The first of these theories has been disproved. The second makes the brain reel, and although it is based on the endorsement of some men supposed to be scientific, seems neither reasonable nor probable. The third is the theory in which the ordinary mind takes refuge.

The special Trail Creek zone, so-called, not because it has been defined, but for convenience sake, has been proved to extend to the east across Trail Creek and in the direction of the Columbia River. Although there is in this extension only one mine, "Crown Point," which is at present in a position to ship any great quantity of ore, sufficient development has been done, both in its vicinity and further east, to prove the continuity of the zone, while it is indisputable that good ore has been found on Champion Creek, Waterloo Creek, and Murphy Creek, not to mention other parts of the district.

The wide acceptance of the second theory arises from the known difficulty of proving a negative. Some very startling developments have taken place on very worthless-looking property. And to argue from the particular to the general is not a method of reasoning, however fallacious, confined to the mining industry alone.

The most interesting and encouraging fact about the extensive development of Trail Creek division is that it is taking place on its own merits. It is not the wild enthusiasm of outsiders, attracted by big dividends, which is covering the country with speculations. On the contrary, it is the old and experienced prospectors by whom it is being opened up, assisted and encouraged by success, it is true, but by no means liable to any false illusions. What the final outcome will be it is impossible to conjecture. Whether the future of these gold-bearing iron and copper outcrops is to be

something the most prodigious the world has ever seen or not is a question that cannot be answered now. A definite solution of the riddle held by these British Columbia hills will only be arrived at after years of patient work.

LET HER GO, GALLAGHER!

The Death of a Well-Known Chicago Man Brings Up the Origin of the Famous Express.

Chicago, July 22.—The death of ex-Ald. James Peavey at his home in Fifty-ninth-street, after a prolonged illness, removes one of Chicago's best-known political characters.

Just before the expiration of Peavey's term in the Council in 1883, an associate alderman was assaulted by one of the famous "Bull" Gallagher gang. These men were in close touch with the boss gamblers, but Magaways ready to do his bidding.

Samuel Medill, brother of the editor of The Tribune, John Dowling and Ald. Peavey were also on the list for punishment. Medill and Dowling were punished, Peavey refused to be intimidated, and continued his fight. One day Gallagher's men were sent to a piece of Gallagher's ear. The disconcerted politician was looking for the man who had done this to him, and when one of his friends exclaimed: "Let her go, Gallagher," and led him away. It was this Peavey's famous expression originated.

Peavey was very popular, and, although a Democrat, was several times elected from a Republican ward. He had been out of politics many years.

changed with fraud and conspiracy. In yesterday's Police Court the trial of fraud and conspiracy against Joseph Rogers was continued. Mr. W. D. Rogers and Mr. Brereton testified to having purchased from George C. Rogers prior to the assignment, but the witnesses did not see anything unusual in the transactions.

R. J. Henderson, to whom Mr. Rogers assigned, said that \$300 worth of goods had been disposed of by Rogers prior to the assignment. He could not find and account of the dealings with Mr. Dineen nor Mr. Brereton in the books of the defunct Rogers. The case will be gone on with to-day.

Shoplifting at Sixes.

Mrs. Mary White, who was convicted of stealing gloves from a department store, was yesterday allowed to go on suspended sentence, but Magistrate Kingsford expressed himself very clearly as to the serious nature of the offence. After stating the frequency of these thefts, and the difficulty of prosecuting such property, he said that the prisoner's previous good character, nor her first offence, should save her from sentence, but he took into consideration the evidence given by her little daughter, and he believed that when arrested the prisoner was endeavoring to make restitution.

Briefs From Belleville.

Belleville, July 22.—At a meeting of Oxford Lodge, Sons of England, held at night, J. M. Macdonald, Supreme Grand President, was presented with a large and handsome portrait of himself.

Rev. R. Wallace and wife left to-day on an extended trip. Before they return they will visit British Columbia, Japan, China, and Australia.

A young man named Percy Hodgins died at night, after a long illness. He was a student in a school teacher in the village of Tweed.

Preparing for Heavy Traffic.

The Street Railway Company is preparing for the heavy traffic which always comes during the exhibition season. Over a hundred men who will be employed as motormen and conductors when the fair rush comes, are now receiving instructions as to their duties. Each man gets about two weeks' training on the cars under the direction of an old hand before he is allowed to manage a car by himself.

Robbed Whilst Insatuated.

George Conroy was yesterday committed to trial on a charge of robbing Walter Spence in a lane off Duke-street. Spence got drunk and went to sleep in the lane. He did not know who robbed him, but two witnesses swore that they saw Conroy with his hand in Spence's pocket and one of these was for a policeman.

Domestic Machinery.

The Dominion Government has given official notice of its intention to extend the time for the free entry of mining and smelting machinery imported to July 1, 1897. This gives those interested in mining a year longer to bring in their machinery. Notice of the above effect was received at the Toronto Customs House yesterday.

The Society Takes the Children.

Ann Winter, 188 Centre-street, was charged yesterday by Police with neglecting her children. She was allowed to go on suspended sentence, but the Children's Aid Society, who will look after them.

Fifty Years Ago.

Who could imagine that this should be the place where, in eighteen ninety-three that white world-wonder of arch and dome shadowed the nations, polychrome, Here at the Fair was the prize conferred. On Ayer's Pills, by the world preferred. Chicago-like, they a record show. Since they started—50 years ago.

Ayer's Cathartic Pills

have, from the time of their preparation, been a continuous success with the public. And that means that Ayer's Pills accomplish what is promised for them; they cure where others fail. It was fitting, therefore, that the world-wide popularity of these pills should be recognized by the World's Fair medal of 1893—a fact which emphasizes the record:

50 Years of Cures.

THEY WANT MORE FUNDS

To Pay for the Volunteer Monument—An Exemption That is Illegal—Municipal Settings.

A deputation, composed of ex-Mayor Manning, Lieut.-Col. Grant, Mr. Jno. Fletcher, Mrs. Fletcher and other ladies, waited upon Mayor Fleming yesterday afternoon to ask for the assistance of the city towards wiping off the debt of \$400, which remains on the monument in memory of the volunteers who fell during the Northwest Rebellion, which was recently unveiled in the Queen's Park. They asked that the city make a recent donation of \$500, conditionally that the balance is made up by the Government and by private subscription. It is hoped that such action on the part of the city will stimulate private citizens to an endeavor to clear off the debt. The request was favorably received by the Mayor, and it is probable that the Board of Control at its meeting to-day will make the grant.

An Illegal Exemption.

The city will some time since granted an exemption to Messrs. Molton & Son upon the plant and machinery to be used in their new business of clearing and grading grain, and the matter was referred to the City Solicitor to the necessary by-law. That official has now reported that, after looking into the question, he is of the opinion that the industry is not a "manufacture," as contemplated by the act.

Notes.

Mr. Joseph Shean, chief engineer of the Grand Trunk Railway, has notified the City Engineer that the company approve the plan of the new streetcar subways.

The members of the Board of Control visited the Island last evening on a tour of inspection.

The extension of the sidewalk on the lake shore to within 300 feet of Windermere-avenue has been completed by the Street Commissioners.

The intention to extend it to the Humber bridge next year.

The public meeting to discuss the best means of exterminating the white Tussock moth will be held at the council chamber, on Tuesday evening.

A cable is expected this week from Christopher Robinson, Q.C., advising the city what action to take in connection with the Gas Company case. Local counsel are in favor of going to the City of London.

The City Treasury was enriched yesterday by \$500, paid in by the treasurer of the Walter L. Main Circle.

Of this amount, \$250 was the free and \$250 for rent of the ground upon which the tents were pitched. In addition to the previous provision, the city also has to contribute \$50 per day to the Ontario Treasury.

It is Wrong.

Of course it is wrong to judge boys or men by their clothes, but it is done every day.

It is unnecessary that a man should be a fop. He ought not to be conscious of his clothes, either because they are too fine or because they are too poor. A man may wear the kind of clothes he is able to pay for. A boy has to take what is bought for him. He ought not to be handicapped by being forced to wear ill-fitting, poorly-made garments.

Why not put him the best—the Oak Hall kind?

Oak Hall.

California - Gold - Mining - Company

CAPITAL, \$2,500,000

2,500,000 Shares of the Par Value of \$1.00 Each.
500,000 shares of this stock are in the hands of the Company's Treasurer for development purposes. The stock so issued is fully paid and non-assessable, of which we offer for one week only 200,000 shares at 10 cents a share.

THE "CALIFORNIA" MINERAL CLAIM

LOCATED IN THE CELEBRATED
TRAIL CREEK GOLD MINING DISTRICT OF
BRITISH - COLUMBIA

OFFICERS:

President: RUFUS H. POPE, M.P., Cookshire, Que.
Vice-President: O. G. LABEREE, Rossland, B.C.
Secretary and Treasurer: JAY P. GRAVES, Spokane, Wash.

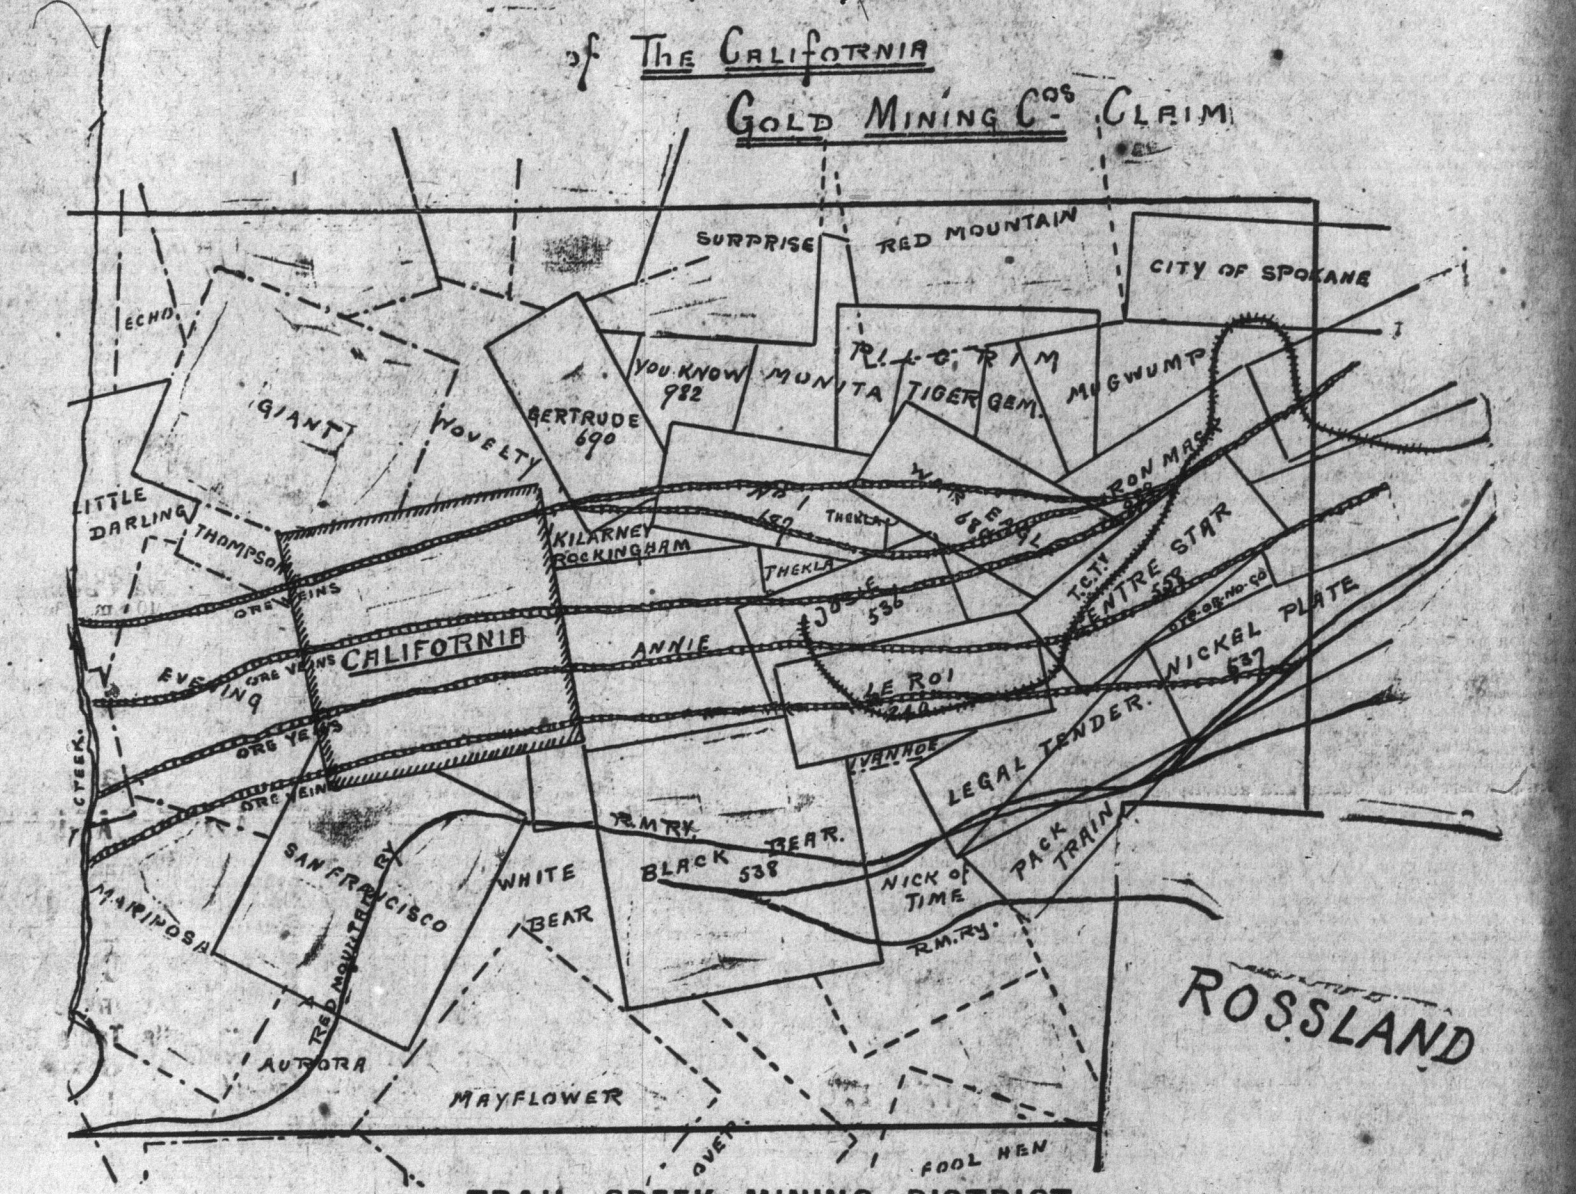

TRUSTEES:

HON. W. B. IVES, Minister of Trade and Commerce, Ottawa
RUFUS H. POPE, M.P.

The management of the development work is conservative and under an able and experienced Mining Engineer. This company has been formed for the purpose of opening up and developing the California Claim.

The owners, after doing considerable work, and demonstrating to their own satisfaction that they had a very valuable property, and that with further development they could make a shipping mine, incorporated the California Gold Mining Company, and now offer a limited number of their shares for sale.

MAP SHOWING LOCATION.

Of all the mining districts in this Great Northwestern Territory none seem to be so full of surprises and none have been more prominently brought before the country as a whole than TRAIL CREEK.

Less than two years ago a mere tract of prospects. To-day the acknowledged richest gold camp in the world. The substantial basis upon which the present producing mines are working and their output after so comparatively a small amount of development, is an evidence of the permanency of the great ORE BODIES in the camp.

The district has been one of mineral surprises. The character of ore changes with depth and in every case INCREASES in value. In some instances ledges of silver and lead have been uncovered, while free milling quartz is not a rarity. Iron and copper predominate on the surface. A conservative estimate of the production of this district for this year will be 400 tons daily, and as the value of the ore will probably run from \$30.00 to \$50.00 per ton (although much will exceed \$100.00) an average of \$40.00 per ton can be relied upon, which will amount to \$16,000,000 per day.

Producing and Dividend Paying Mines.

LE ROI.

The most interesting, as well as the most wonderful, of the many valuable properties in the Trail Creek district is the Le Roi. The claim runs easterly and westerly across what is known as the famous Red Mountain. This property was originally purchased for about \$25,000, and has since been bonded to a London syndicate for \$500,000. The company has since sold the stock at \$1.00 per share, and the stock is now quoted at \$1.00 per share. The company has since sold the stock at \$1.00 per share, and the stock is now quoted at \$1.00 per share. The company has since sold the stock at \$1.00 per share, and the stock is now quoted at \$1.00 per share.

WAR EAGLE.

The War Eagle lies almost cornering on the Le Roi and running in a north-westerly and north-easterly direction. This property was purchased by American citizens in October, 1894, for about \$35,000, and was incorporated for 500,000 shares at \$1.00 per share. No stock was sold at that time. The company has since sold the stock at \$1.00 per share, and the stock is now quoted at \$1.00 per share. The company has since sold the stock at \$1.00 per share, and the stock is now quoted at \$1.00 per share.

JOSIE.

The Josie lies in a north-easterly and north-westerly direction, between Le Roi and War Eagle mines. This property has a capital of 700,000 shares at \$1.00 per share, and the management has recently sold \$1 a share for the outstanding stock. It is now quoted on the market at sixty cents per share, and the management has recently placed the latest improved machinery upon this property, and the same has been operated for the last fifteen days. It is confidently expected by the management that they will be able to pay dividends in September, 1896, of at least five cents per share, and that amount or more thereafter per month.

IRON MASK.

The Iron Mask lies on the same lead as the Josie and in a north-westerly and north-easterly direction, and immediately east of and adjoining the War Eagle. This mine is a producing one, and will be a dividend payer almost immediately.

CENTRE STAR.

The Centre Star lies almost parallel to the Iron Mask and adjoining the Le Roi on the east and War Eagle on the south-east. The company has recently placed a large amount of machinery upon this property and has sufficient ore in the dump to enable them to pay a dividend in August next. It may be said they have recently refused \$1,500,000 for this property.

THE CALIFORNIA CLAIM.

THE PROPERTY OF THE CALIFORNIA GOLD MINING COMPANY.

This claim is 1,500 feet square, being the first location under the new law upon the Red Mountain, having a total area of about 22 acres; the old law, under which the locations of Le Roi, Josie, Iron Mask and War Eagle were made, being 800 by 1,000, or an area of about 20 acres per claim.

The California lies immediately west of the Josie, 1,000 feet distant, and from the Le Roi about 1,200 feet distant. It has been demonstrated beyond question that the veins passing through the Le Roi, Centre Star, Josie, Iron Mask and War Eagle also pass through the California claim. The California being about the width of the Le Roi, Josie and War Eagle combined taken in the parallel veins from these different mines. (See map here-with accompanying.)

The veins running across these properties are distinct, and English Mining Engineers reporting on the country state that the veins run the same as those passing through these developed mines. Any single one of these veins would make a very rich mine, and equal to any of the above-mentioned mines, and it is reasonable to presume that at a very great depth these veins may become one.

It is admitted by all mining men that the showing of the California is one of the best upon the Red Mountain. The property has been surveyed and the crown grant has issued, so the title is perfect.

The development work consists of numerous open cuts and prospect holes upon the numerous veins passing through the property, and one of a tunnel of some 25 feet running up on the main lead. This will be the point where the main workings will be done.

The assays of this property have been very good for surface findings, which have been from \$20 to \$40 in gold and it may safely be said it will average \$20 per ton. The ore from the surface of all these mines has been low grade and increases as depth is reached, and a selected ore was shipped from the Le Roi mine which averaged \$200 per ton to a depth of 500 feet. It is reasonable to suppose that the ore on the California veins will increase in value as depth is reached, equal to or greater than the mines above mentioned.

The claim will be developed by tunnel at a depth of 200 feet, after that it will be worked by shaft.

TRANSPORTATION.

The matter of cheap transportation is solved here easily. The Red Mountain Railway under process of construction is surveyed across this property, and this road will be completed by September, and the narrow gauge railway running from Trail smelter to the Josie mine is now in operation and is but 1,200 feet from the California claim and will be extended to this property as soon as required.

It is the intention of the management to push development on the claim as rapidly as possible, and it is expected that machinery will be placed upon the property not later than September next, prior to the start of the winter season.

The Company is organized under the laws of the State of Washington, and is registered under the Foreign Corporation Act of British Columbia, thereby entitling it to do business in Canada.
