Bigger in fabric, fashioned with a regular fivebar safety tread, with an extra inch on the circumference and extra thick in the cross section, it is just the tire the weight and work of a Ford car need.

The Three-Seventy-Five is a 31 x 33/4 inch tire. Its bigger bulk tells you why it lasts longer and rides easier.

Though Three-Seventy-Fives cost a little more than ordinary Fordsize tires, their slightly higher outset cost is quickly cancelled by the economy of longer mileage, and the greater satisfaction you get from a better looking, more efficient Ford car.
