## NEGRO VOTERS SHOW STRENGTH

Remarkable Gain in Power is Shown  
by Electorate in Campaigns in Var-  
ious Sections.

DEFEAT PARKER BACKER

Trio Wins in the Cleveland Council-  
manic Race. Fred Moore is Loser  
in New York.

WASHINGTON. — Coupled with  
political backwashes in New York,  
Boston and Detroit, where Negro vot-  
ers were instrumental in electing  
white candidates over their colored  
opponents, came unprecedented sur-  
ges of power shown by a Negro el-  
electorate thoroughly awakened to the  
power of the ballot. At least seven  
Negro candidates for important State  
and municipal office emerged vic-  
torious in the off year election. In  
practically every election the Negro  
balloting was responsible for the de-  
feat or election of white candidates.  
This year's collection was marked,  
not only by a larger Negro registra-  
tion as well as by a wonderful dis-  
play of political individualism on the  
part of the masses of Negro voters.

In Cleveland three of the nine Ne-  
groes seeking places on the city  
Council were successful. Dr. Leroy  
N. Bundy and Attorney Lawrence O.  
Payne were elected from the Third  
Ward and Attorney Clayborne George  
from the Fourth Ward. Alexander  
H. Martin, local attorney, seeking  
election as municipal judge was de-  
feated. In Cincinnati, Frank A. B.  
Hall, seeking election to the City  
Council was elected.

LOS ANGELES, Calif. — Demon-  
strating an invention which appar-  
ently defies the laws of physics, J.  
H. Montgomery of San Gabriel, Cal.  
in his laboratory at 115 W. 7th street  
sent a dead vulture flying head on  
into an electricity produced thirty-  
five mile gale, the bird at times lift-  
ing clear of the tracks a four pound  
carriage to which it was attached.

After twenty years of study of the  
flight of birds and of the construc-  
tion of their wings, Mr. Montgom-  
ery claims to have discovered what  
he and his associates hope to estab-  
lish as a new principle in aviation,  
which it is believed will revolution-  
ize the science of flying.

"In the wings of every soaring bird  
is a true power plant, with which  
the bird has nothing whatever to do  
further than his ability to control it,"  
Mr. Montgomery said. "Contrary  
to the prevalent view of scientists,  
birds do not fly by taking advantage  
of air currents, but their power to  
soar is due to the structure of their  
pinions, which are filled with thou-  
sands of vortices which catch the air.

In other words, the law of vorter  
and vacuum is the principle which  
enables the bird to soar. Nature  
steps in and endeavors to close the  
vacuum by lifting the bird into it."

According to Montgomery, the  
same principle by which birds soar,  
could be applied to a new type of air-  
ship which would require no motor,  
but could be regulated to by at any  
speed up to 350 miles an hour.
