GREATER PROFITS FROM CLEAN SEED

The quality of the seed grain sown on the farm next spring will depend upon the farmer himself. This is a matter which is entirely in his own hands. If the farmer himself. This is a matter which is entirely in his own hands. If good crops are to be expected, good seed must be sown. The farmer should prepare the seed now for the spring sowing. During the winter months, when ether farm work is not pressing, is the best time to clean the grain for seed. The best grain gown on the farm should be used and it should be put through the fanning mill two or three times at least, or until all of the light or shrunken grain and the weed seeds are removed. There is a distinct loss in sowing weak seed and it is much more profitable to screen out the shrunken and weak grain and feed it than to sow it and lose it. It is also essential that weed growth is to be prevented.

The increase in total yield is practically all profit A crop of wheat from ordinary seed may yield 25 bushels per acre, and cost 20 bushel per acre to produce, leaving five bushels per acre, and cost 20 bushels per acre, the increase in net profit is 20 per cent. The cleaning of the seed in spade time during the winter does not add one cent to the cost of production. When well cleaned seed is sown in place of

cent to the cost of production. When well cleaned seed is sown in place of ordinary grain, the gain in yield is, of course, much more than one bushel per acre. The net profit has often been in-creased 50 per cent or even doubled. This is one way of increasing production reased 50 per cent of even distribution and profit.—F.C.N.

Young Man Killed at Rideau Ferry.

John Coutts died very suddenly at the home of his brother-in-law, Edward Joynt of Rideau Ferry, last Wednesday evening, from hemorrhage of the brain. evening, from hemorrhage of the brain. The young man was engaged in drawing ice from the lake to his brother-in-law's farm in the morning and while driving the team about ten o'clock one of the planks fell off the sleigh, one end of it lodging in the snow and the other lying up and striking the deceased on the side of the head. His head was well covered with a cap, and while the blow was quite severe it did not inflict a wound and no serious effects resulted antil about three o'clock in the aftermoon when he became unconscious and antil about three e'clock in the afternoon when he became unconscious and
despite all care and attention, died at
ten o'clock from a hemorrhage, caused
by the severe blow. The deceased was
a son of Mr. and Mrs. Reter Coutts of
Loreborne, Sask., formerly of Rideau
Ferry, and with his parents had been
visiting with relatives here since Christmas. He was in his twenty-eighth
year, having been in the west for upwards of six years and was unmarried.
His untimely death will be a source of
deep regret to all who knew him. He deep regret to all who knew him. is survived by his parents and two sis-ters: Mrs. Edward Joynt, Rideau Ferry, and Mrs. Wilfred Miller of Western Canada.—Perth Courier.

An Old One Revived.

Mr. Parsons, a shrewd old farmer, was approached one day by a bright, breezy young fellow who was selling in-cubators. He gave the farmer the usual cubators. He gave the farmer the usual eloquent arguments. Of course he said that there was not another such incu-bator to be found, the price was remark-

bator to be found, the price was remarkably low, etc.

Mr. Parsons did not reply. The young man talked himself out and had evidently made no impression. At last he said:

"You don't seem to be interested in incubators. In fact, you don't seem to appreciate these incubators."

"No," said the old farmer, slowly, "I guess I don't."

"But," argued the young man enthusiastically, determined to make a sale if possible, "just think of the time they will save!"

"Well," said Mr. Parsons, giving the man one cold look, "what do you suppose I care for a hen's time."—National Monthly.

WILL TRY CONSCRIPTION.

India is to Come Under Service Act.

LONDON, Feb. 12.-A special depatch from Delhi says:

LONDON, Feb. 12.—A special despatch from Delhi says:

Lord Chelmsford, the viceroy, presiding over the imperial legislative council, said that the Government's activities were being concentrated upon how best to assist the empire to achieve victory. India must be ready to place all resources at the disposal of the Empire. He did not wish to minimize he efforts already made, but for the future the motto must be "effort and yet greater effort." Lord Chelmsford asked the new members to continue to co-operate in avoiding controversial questions.

Referrings to the recent ordinance requiring all European males in India between the ages of 18 and 50 to register, the viceroy stated that the time had now arrived for India to release for service in the field British units which otherwise would be employed on garrison duty. The necessities of war made it imperative to organize an Indian defence force. It was therefore proposed to introduce a bill whereby all European British subjects between the ages of 13 and 41 would be liable to general military service in India. Those between the ages of 16 and 18 would be empolysorily enrolled for local military service, and youths between the ages of 16 and 18 would be enrolled for military training. The Government also proposed enrolling Indians in their own units for general military service in India for the duration of the war.

TURKS BADLY BEATEN.

Lose Position Held by Gen. Towns-

Lose Position Held by Gen. Townshend During Seige.

LONDON, Feb. 12.—An official report issued Sunday night describes briefly a British success against the Turks in Mesopotamia, a new line being occupied by the British of about three and a half miles to a depth of more than half a mile. The text of the statement reads:

'In Mesopotomia during Friday night and Saturday four Turkish attacks on the right were repulsed, and the British hold on the enemy trenches on the left was rapidly extended by bombing attacks. Later after aheavy bombardment a successful assault was undertaken against trenches west of the liquorice factory which General Townshend held throughout the siege of Kut, whereby we secured

es west of the liquorice factory which General Townshend held throughout the siege of Kut, whereby we secured the factory and five hundred yards of enemy trenches.

"As a result of these operations a new line has been occupied on a frontage of over 6,000 yards, and the enemy pushed back for a depth varying from 800 to 1,200 yards. All the evidence shows that the Turks suffered heavily."

The British offensive south of Kutel-Amara was resumed successfully on Erday, says an official statement on the campaign issued Saturday night Under cover of a heavy bombardment a portion of the new Turkish front line west of the Hai River was secured and consolidated in the face of two counter-attacks and two bombing attacks. Further westward, the statement adds, Turkish trenches were penetrated and by successful bombing work were secured and consolidated along a front of 1,200 yards.

Austrians Are Active.

Austrians Are Active.

ROME, Feb. 12, via London.—An attack in considerable force was made on the Italian. lines east of Goritz on Friday night, the War Office announced. Sunday. The Austrians were repulsed at nearly all points, and such portions of the front lines as have not yet been reoccupied by the Italians have been held under heavy fire, it is declared.

The statement says that "after heavy artillery and trench mortar preparation the enemy in considerable force attacked our positions on the western slopes of Santa Caterina, northwest of San Marco and east of Vertobisza, between Sober and the Goritz-Dornberg rallway. After heavy fighting the enemy was repulsed nearly everywhere. Some very small portions of our front-line trenches which have not yet been reoccupied are kept under our heavy barrage fire. We captured more than seventy prisoners."

Fighting the Pirates.

Fighting the Pirates.

PITTSBURG, Pa., Feb. 12.—Nicholas Murray Butler, President of Columbia University, declared in an interview here Saturday that the submarine Deutschland has been captured by the British.

"I have positive knowledge," he said, "that the Deutschland is one of eighty-five German submarines in one British port. I know that the British have captured not less than 200 German submarines."

"The Deutschland now lying a Bremen is another submarine with that name painted on it to support the story that the submarine carrier never started on a third trip," Butler gaid.

"The German submarine plan will not succeed," Butler claimed. "The British patrol and the active submarine am of the British navy will prove their efficiency to adequately and most effective deal with the blockade," he declared.

A Knockout for Foe.

A Knockout for Foe.

LONDON, Feb. 12.—In a letter read at the war loan meeting Saturday, Vice-Admiral Sir Reginald Bacon, commander of the Dover patrol, is quoted as saying:

"If you will try as hard to do your duty ashore by raising a loan as we are doing at sea by sinking submarines and frustrating other evil devices, you will make the loan such a success that it will be a knockout blow to the enemy."

CANNING CULL APPLES.

New Recipes For Utilizing Windfall and Unmarketable Fruit. (Prepared by United States department of agriculture.)

New recipes for utilizing windfall and cull apples for home use are being furnished to canning clubs by the offic of extension work, north and west, states relations service. There are many ways in which such apples may many ways in which such apples may
be made into valuable and palatable
food products, such as apple sauce,
edder, apple strup, cider vinegar, felly,
preserves, apple butter, etc. The new
recipes which follow are for canning
apples whole, to be sliced for pic filling and quartered for fruit sahads.
Only reasonably sound fruit should be
used. Injured or decayed parts and
overripe fruit should not be canned.
Wash apples, remove core and blemishes (pare if desired), place whole
apples in blanching tray or cheesecloth isnes (pare it desired), place whole apples in blanching tray or effected and blanch in boiling water for two minutes. Remove and plunge quickly into cold water. Pack in large empty

glass jars or gallon fin cans. Pou over the product a hot thin sirup of about 18 per cent density, or about one pound of sugar to four and one-half pound of sugar to four and one-half pints of water. Place rubber and top in position. Seal partially, not tight. If using tin cans, cap and tip com-pletely. Process half gallon or gallon containers twenty minutes in boiling hot water, in homemade or hot water bath outfit; fifteen minutes in water seal; ten minutes in steam pressure outfit, with five pounds of steam pressure outfit, with five pounds of steam pres outh, with n've pounds of steam pres-sure; five minutes in aluminum pres-sure cooker outfit, under fifteen pounds of steam pressure. Remove jars, tight-en covers, invert to cool and test joints. Wrap in paper and store. The time of heating will have to be varied according to ripeness and condition of the fruit. Use just enough time to sterilize perfectly and yet not enough to change the color or reduce the pulp to sauce.

Firm and tart apples may be cored and peeled first, then canned by the above recipe. To keep apples from tarnishing while

coring and paring drop apples into slightly salted cold water and allow to remain in this water until ready to pack.

Under the Ridge

Very careful experiments made with sweet potatoes at Urbana, Ill., by the agricultural experiment station demon strated that fertilizers applied "under the ridge" gave good results. The plan of "under the ridge" is, after prepar-ing the land with plow and cultivator, to plow furrows and after putting the manure or fertilizer in them to make the ridges for planting over the fur-rows. Broadcasting the fertilizer was not satisfactory.

After testing his seventeen cows through a cow testing association a Nebraska farmer sold seven and received more profit from the ten re-usaining animals than he had received formerly from the whole herd.

DISTRESSING RHEUMATISM

How many people, crippled and lame from rheumatism, owe their condition to neglected or incorrect treatment! It is the exact combination of the Purest Cod Liver

Oil with glycerine and hypophosphites as contained in

that has made Scott's famous for relieving rheum-tism when other treatments have utterly failed.

If you are a rheumatism sufferer, or feel its first symptoms, start on Scott's Emulsion at once. IT MAY BE EXACTLY WHAT YOU NEED. Scott & Bowne, Toronto, Ont.

MAKING UMBRELLAS.

In talking with the wireless operator many ship passengers ask the meaning of the three letters used in the distress signals, "S.O.S." There seems to be a general opinion that the letters are the abbreviation of three separate were's with a definite meaning. Persons of an imaginative trend will tell our ship," "Send out succor," "Sink or swim" or some such meaning. The letters signify nothing but that a ship is in distress and in need of assistance. The call is used by all nations as a universal code, so that any wireless operator, regardless of the language he speaks, immediately intercepts the call of distress. Inasmuch as the call is in use by all countries, it can be seen that the signals can have no meaning in any language. The character of the code makes it a call that can be picked out easily from other signals. —Ocean Wireless News. In talking with the wireless operator
