it is within the range of possibility that There seems to be a growing tendency his anticipations may be realized to some extent. Few places possess more elements of growth than this pretty little village. Situated in the very centre of the province, with a large area of good tarming lands around it, and the most extensive forests within ready access, Boiestown may surely be expected to grow to be of considerable importance. Three very considerable importance. Three very considerable importance. There very considerable importance to grow to be of considerable importance. There very considerable importance to grow to be of considerable importance. There very considerable importance to grow to be of considerable importance to grow to be of considerable importance. There very considerable importance to getter here: the Southwest Miramichi, the Taxis and Burnt Land Brook, and upon their waters are enormous quantities of lumber. Some of it will find its way down to the Marysville or the Miramichi mills, but the great bulk of it will be manufactured at Boiestown itself. The time cannot be far distant when the United States market will be opened to our lumber, and then every stick when we say that when singers are to remove the muce and the province, with a large area of good tarming lands around it, and the most extensive forests within ready access, Boiestown may surely be expected to grow to be of considerable importance. There were considerable at reams come together here: the Southwest Miramichi, the Taxis and Burnt Land Brook, and upon their water, and a knowledge of what should be done under, and in form the growings, while not as large this is a principal part of their duty to lift the minds of the congregation to a devertional plane and this cannot be done under the circumstances which would result in the saving of life. These directions should be followed:—First—Remove all obstructions to breathing; out loose the neck and waist being on their tothe music in signers of their tones, and we are sure we will be preson having the drowning specific drowning specific drownings, while not as la his anticipations may be realized to some to repress anything which will have this United States market will be opened to our lumber, and then every stick growing upon these waters will have its value increased. There are enormous quantities of the best cedar in the world to be found in this section, and so far as one can judge the hemlock supply is very large. The best woodsmen say that so far from the spruce lands of the interior being exhausted there are hundreds of millions of feet yet uncat. Of hardwoods there is almost no limit. One is tempted to think that there is a possibility of a large business being done in building-stone from this section, some of the rock exposed in the railway cuttings being of a most promising character. Of course the future of the course waters will have its value increased. There are enormous quantities of the best cedar in the world to be found in this section, and so far as one can judge the hemlock supply is the rit, the effect is not only disappointing but often really irritating. Let our church choirs give us good full toned music if they want to be a real help to the congregations.

The Hon Mr. McLellan will sail from New York on August 3rd for England, to purchase the horses which the local powers and the congregations are force four times slowly. Place your elbows against the chest, over the lower ribs, press sownward and the organist cuts of feverything short as though he were afraid somebody might hear it, the effect is not only disappointing but often really irrit but a great deal can be done by the villagers themselves. They can paint and adorn their premises; they can bend all their energies in directions which will make it a pleasant place to live in, and the result will be sure to be that people will go there to live during the summer months at least. The erection of a large hotel is already under consideration by some parties who have the means and ability to carry out their plans. For beauty of situation, and as a headquarters for sportsmen, Boiestown cannot be surprassed. People will not be long in finding this out, and cottages will be finding this out, and cottages will be service of the whole public

horses, which will be placed at the service of the whole public.

GLADSTONE RESIGNS.

CHADSTONE RESIGNS.

Lord Saltsbury to be Called Upon to this matter will depend upon the people of the village themselves. They have it with Chatham on the other hand. They ought to, and no doubt will appreciate their advantages and go to work with renewed energy to develope the very promising future which is before them.

THE TORY LEADERSHIP.

Rumor again has it that Sir John Mad donald proposes to retire at a very early day from the political arena. No doubt there is some foundation for the story. If he consulted his own comfort the premier would have sought retirement some time ago; but the force of circumstances and perhaps consciousness of the fact that such a step would mean not early the breaking up of his own party because he cannot care much about this as there is not much in common between him and his colleagues, but the advent to power of the men he has so long fought, and who would have the opportunity and the poperation of the ministry have the solid proposal with the force of the men he has so long fought, and who would have the opportunity and who would have the opportunity and who would have the opportunity and the major that the transfers and the major the transfers and the major the transfers and the major the proposal surrender to the Queen will summon the Marquis of the polling gives the unionists 1,221,007.
