

RED Bone Marrow has been used by the medical profession only a short time, but long enough to prove itself to be a most satisfactory remedy in treating anaemia, chlorosis and all diseases resulting from defective haemogenesis. Clinical reports prove that thousands of cases that resisted iron, arsenic and other drugs formerly prescribed by physicians in such troubles, yielded promptly after being put upon a reliable marrow preparation. Armour & Co. are preparing an Extract of Red Bone Marrow and offer samples to physicians who are not acquainted with their product. Their facilities for obtaining the fresh medulla are unequalled.

DOCTORS' BILLS MUST BE PAID.—The New York Legislature has under consideration a bill providing for the payment of debts, as follows: "Every

executor and administrator must proceed with diligence to pay the debts of the deceased according to the following order: (1) Debts entitled to a preference under the laws of the United States; (2) Taxes assessed on the property of the deceased previous to his death. (3) Debts of the deceased because of services rendered and materials furnished by physicians, pharmacists, nurses, and undertakers. (4) Judgments docketed, and decrees entered against the deceased according to the priority thereof respectively. (5) All recognizances, bonds, sealed instruments, notes, bills, and unliquidated demands and accounts. Preference shall not be given in the payment of a debt over other debts of the same class, except those specified in the same class. All debts specified in the third class shall become due upon the death of the deceased and shall be paid within ninety days thereafter.

H. & C. BLACHFORD,

83 to 89 King St. E.,
* TORONTO *

LAKEHURST SANITARIUM

~~~~~ Oakville

The attention of the medical profession is respectfully drawn to the uniform success attending the treatment of Alcoholism and Morphine addiction at Oakville. A prominent medical man in Toronto has, within the last few weeks, paid a glowing tribute to its efficacy in the case of one of his patients who had long since lost his susceptibility to the ordinary form of treatment employed, and whose life seemed to hang in the balance. Many come to Oakville in the last stages of the malady, yet of these but two cases in four years have proved to be beyond reach of our treatment, a record well deserving the thoughtful consideration of the profession.
