

# Make Your Hay Crop The Easiest One To Harvest

Harvesting the hay-crop by old-time methods is hard work. You can do away with at least 75% of the labor in hay-making, and increase the quality and nutritive value of your hay fully 15% by using the

## CHAMPION RAKE (Side-Delivery) AND HAYLOADER

They are an absolute necessity to every farmer who wants to make his hay crop yield the maximum returns.

The CHAMPION Side-Delivery RAKE will handle a wide swath. Makes a windrow parallel to the direction in which it travels. It leaves the hay loose and fluffy—in the best possible condition for even curing. Its action is also that of a Tedder.

The CHAMPION HAYLOADER is so simple in construction and positive in action, that it is far superior to any other type. The gathering-drum has no complicated pinions or gears. The slats are so secured to the apron, that they are less liable to cause damage by breakage than on other loaders. When broken, they cannot slip out of place. A wind-break prevents the hay from being blown off the apron, while the Loader can be uncoupled from a wagon without the driver leaving his seat.

See these implements at your dealer's if you can. Or let us send you our complete Implement Catalog. Your name and address to our nearest Branch will bring it FREE.

Brantford, Winnipeg, Regina, Saskatoon, Calgary.

## McCormick Binders

MANY years of McCormick binder experience have brought out the strong points of the machine and enabled the builders to devise features that make the machine still more efficient and satisfactory. There are a number of such features on McCormick binders, features which insure a complete harvest of the grain, whether it be short, tall, standing, down, tangled or full of green undergrowth.

For Eastern Canadian fields the McCormick binder is built with a floating elevator which handles varying quantities of grain with equal facility. The binder guards are level with the bottom of the platform so that when the machine is tilted to cut close to the ground there is no ledge to catch stones and trash and push them ahead of the binder to clog the machine. These are features you will appreciate.

The McCormick local agent will show you the machine and demonstrate its good features to you. See him for catalogues and full information, or, write the nearest branch house.
