THE COURIER

THURSDAY, MAY 22, 1851.

LATER TROM Evacors.—The Royal Mail Steamship "Africa" arrived at New York yesterday. She sailed from Liverpool on the 10th inst., and brings three days inter intelligence from Europe. In the Corn Market there was more activity, and better prices obtainable.

Consols for account 97;

we lay before our renders this guber-natorial Address, which is always looked to by the people of Canada with that interest which attaches itself to such a

After the usual introductory congra-tulations on the general prosperity of the Province, and the abundant resources of the Revenue, His Excellency adverts of the Revenue, his Excellency adverts to the recent changes of the Imperial Navigation Law, and states objections which by some are made to its present application to the Shipping In-

The new Postage Law, Colonial Despatches affecting the Railway between Halifax and Quebec, and the reduction of certain charges "provided for by the Civil List of 1846," form prominent portions of the Speech.

The subject of the "Clergy Reserves" is alluded to only as the announcement of a general fact, conveying the intelligence of the acceptance of the Address of the Provincial Parliament to Her Most Gracious Majesty.

vision, will, we trust, engage the early attention of the present Parliament.

Honorable Gentlemen of the Legislative Coun

ien of the Legislative Assembly,-

Gentlemen of the Legislative Assembly,—
In again meeting you in the discharge of our legislative duties, it affords me much astisfaction to congratulate you on the general prosperity of the Province.

The Crop of last year was abundant. The Revenue from the Customs, and the traffic on the Provincial Canals, are steadily increasing, and the Securities of the Province command a high price. The effect of recent changes in the Imperial Navigation Law, is also beginning to be felt, in the more frequent resort of Foreign Shipping to our Sesports. It is alleged, however, by persons connected with the shipping interest, that certain provisions of the Immigration Act, are unflavorable to the extension of a valuable branch of our import trade. The subject is an important one, and I recommend it to your consideration. Under those favorable circumstances, the further improvement of the means of Internal Comtion has recently engaged a large share of

public attention.

In many parts of Western Canada, capital has been applied extensively, and with much advantage, by persons interested in the several localities, and by others, to the construction of good country and by others, to the construction of good country roads, and measures have been taken in both sections of the Province with the view of pressing forward important lines of Railway. Parliament has given proof of its disposition to afford to undertakings of this description which are calculated to be beneficial to the Province, such aid as can be properly given to them without impairing the Provincial Credit or encouraging improvident speculations. I feel confident that in any further legislation which you may see fit to adopt on this subject, you will adhere to the principles of this judicious policy.

A considerable increase in correspondence has, I am happy to inform you, taken place since the new Poetal Law came into operation.

This fact, which furnishes conclusive proof of the advantage accraing to the community from the measure, warrants, moreover, the expectation that the receipts of the department will, before long, recover from the depression consequent of the edoption of greatly reduced rates of postage. Under the operation of the measures which have been reveally adopted by the Legislatures of the several North American Provinces, the Inter-Colonial trade is assuming proportions of increasing magnitude, and promises to become a considerable branch of our industry.

We have much pleasure in copying the proceedings of a public meeting held on the 17th instant, at Quebec held on the 17th instant, at Quebec, relative to the just and well merited tribute paid to the Revetend Charles Churchill, Wesleyan Minister. Mr. C. has been so long known in this community, and his useful labors so truly appreciated, that his numerous friends, and the Members of the Wesleyan Churches in this city, will regard this Testimonial with no ordinary pleasure and satisfaction:—

TENTIMORIAL TO THE REVEREND CHARLES CHURCHEL OR Saturday forenous, a large number of the friends of the much esteemed and very falented elergyman, who, at present, fills the Wesleyan pulpit of this city, had assembled in the basement, of the new Church, for the purpose of presenting him with a testimonial in token of their regard for him as a man and in acknowledgment of his abilities as an earnest, preacher of the gospole. Or making his apprenant in the soon he. pol. On making his appearance in the good to respect, and W. Henderson, Esq., rose and read to him the following address :—

Quenze, May 17, 1851.

Civil List of 1846," form prominent portions of the Speech.

The subject of the "Clergy Reserves" is alluded to only as the amouncement of a general fact, conveying the intelligence of the acceptance of the Address of the Provincial Parliament to Her Most Gracious Majesty.

The suggestions contained in the Speech in relation to an amendment of the School and Municipal Laws of Eastern Canada, and an increase in the Parliamentary Representation of the Province, are important, and, with other improvements involving legislative provision, will, we trust, engage the early attention of the present Parliament.

SPEECH.

Honorable Gentlemen of the Legislative Council, and the price of the School and Attentive Council, we look upon ourselves as mainly indebted for the position we now enjoy; while we cannot but feel thankful for the general interest felt in our public services, and for our large and attentive congregations.

We wish to present you with the accompanying

public services, and for was congregations.

We wish to present you with the accompanying service of Plate, as a token of our esterm and regard, hoping that you may long live to enjoy the reputation you have cerned in Quebec, and praying that every succeeding year may, under the Divine blessing, add to your unsululness, and to your happiness, with that of your esteemed family. We beg to remain, &c., &c., Eigned on behalf of the Subscribers,

W. S. HENDERSON.

rend Chas. Churchill.

Upon finishing which he handed him the present, consisting of a richly chased Silver Breakfast Service, comprising Coffee and Tea Pot, Cream Ewer, Sugar Busin and Cake Basket of the most exqueste manufacture. On the side of the Tea Pot one of the compartments is inlaid with a large plate of Chaudier gold, given by Dr. Douglass, and on this is a beautiful engraying of the Wesleyan Church, exquisitally and finishfully definented. with the following in

"WESLEYAN CHURCH, QUEBEC,

Under the superintendence of the Rev. Charles Charchill, to whom this Service of Plate is presented by the Trustees, members and congregation of the Church, in taken of their appreciation of his services in its erection."

Mr. Churchill, with some emotion, made the Collowing reply services.

willing the lives of

Richiesa, a few miles above Chambly, by the drowning of five men. French Canadians who were ferrying themselves across the river on their way home to St. Athenase, on Saturday last. The eds of the deceased had subject on stag the bodies.

We are requested to state that the lecture, ad-certised in yesterday's issue of the Birald, to be oligonal by Mr. Lucey this evening, is postposed a account of unavoidable circumstances, until

owing letter has been addressed to Messes. Lewis & King, by cirizens of Montreel :-Lewis & King, by cirizens of Montreel:

MESSES. LEWIS & KING.—Having seen your Pakeramic views of the Misistippi, now exhibiting in the late Church of St. Addrew, in St. P. ter Street, we have great plainure in testifying to its high generit as a work of Art. The views are of the most varied character, and present a complete, and we believe correct, coup d'adl, of the seenery on both banks of the siver.

We confidently recommend this Pantersma to the favorable puties of the jublic, as one of the most interesting and instructive exhibitions over-presented in this city.

Signed.

CANADA, PAST, PRESENT, AND FUTURE. The fourth number of the above work has been presented to us by the attentive Agent, Mr. Watkins. We have already expressed our opinion of this medal publication, and shall take occision to advert again to its merits.

Mr. Watkins has requested us to state that future numbers of this work will be printed for

those only who are subscribers. He can be found at Madame Leprohon's, corn of Craig and St. Urbain Streets, where complete opies or divisions of the Imperial Dictionary, ued by Mr. McClear, of Toronto, may be had

The Treasurer of St. Ann's Church Building Fund thankfully acknowledges the receipt of £25 5s. currency, collected in Saint George's Church, on Sunday last.

STANUED IN THE WOODE I - A young French Canadian farmer named Hyacinthe Jean, of the parish of St. Donis, on the acute store below, let his home about the 15th November last, to conduct three men, through the woods, to the timber sharties on the river St. John. On reaching the province line of New Brunawick, he left them with the intention of returning home, and stating that be wood hust at the same time. To the great distress of his family he did not return, and until a a few days eince it was supposed that he might have been defained at the sha-lies, or was with the indians in the we-ds. A generous Indian, however, having premised to de all in his power to find the unfortunate man, dead or alive, has recently returned with his corpus, which was discovered in the midst of the forest, where the young hunter appears to have dead or alive, has recently returned with the corpse, which was discovered in the midst of the forest, where the young hunter appears to have perished from cold and hunger. He was found in a reclining posture, purtially covered with fir-branches, and his gui, axe, and fahing lines lying beside him. From seven marks on the handle of his axe, it is supposed that he may possibly have designed to indicate thereby the number of days he suffered the pangs of hunger! His remains were interred in the cometery of his native village on the 10th inst.—Quebec Mercury.

Arrival of the Franklin.

The steamer Franklin arrived at her dock at seven o'clock this morning, with four days later news from Europe. The Franklin sailed from Havre on the 6th inst., and from Cowes (England) at four, r. M., on the Th. Her voyage from the latter place has therefore occupied eleven and a half days. She brings Lombon dates of the 7th, which were taken from Southampton by special steamer. She brings 94 pessengers, and a fair freight of general merchandize from Havre.

London Tessagy, 6th May.

London Tessagy, 6th May.

and yesterday, when the adminion was reduced to be, the receipts amounted to upward of £2000. At the same time the weather has been more continuously severe and miniviling them was perhaps ever known at this senson. Throughout the lives of I with that ces.

I with that ces.

I with that ces.

I will be a large front. Scarcely any mitigation has since taken place, the temperature is still very low, a slight snow shower is falling at this moment, and there has been a tank absence of sustaine. If ander these circumstances, the results have been by, by the dismo-who collect the first burst of genial days the tide of sistors will exceed any thing that has been telegraph.

coloid upon.

Morar Marrer &c.—The money market is without alteration: but there is still considerable depression in prices in our various manufacturing districts. The tendency, however, would be towards improvement, were it not for the severity of the weather and the uncertainty as to the future price of cotton. As regards the funds, the heaviners shown in the quotations of French stocks has an ansavorable effect bers. Some enxiety also is left as to the probability of a rise in the rate of discount at the Bank, but this will depend upon the state of its bullion, and the impression is that during the last week the drain his ceased. That the demand for coin will be large, consequent upon the movements of the people during the fix hibition, seems now to be generally expected.—This, however, although it might cause a temporary increase in the value of money, could only be looked upon as a healthy circumstance.

From the New York Commercial Advertiser of th Arrival of the "El Forado."

Arrival of the **Ell Ferado.**

FIFTERN DAYA LATER.—The steamship Ell in Dir. do. Captain Weight, from Chagres, by way of Havana, arrived this moraing. She left the former place on the 7th and the latter on the 12th instant. On the day, she left Chagres, a steamship was going into Chagres. On the 14th instant, lat. 41 40, long. 79 20, experienced a heavy gale from the North-west to North-east, which continued for 24 hours, with a heavy head sea—the ship behaving beautifully throughout the gale.

The El Dovido brings a large number of passengers. The gold dust and mails were left on the fathmus by the El Dovido, after having waited at Chagres for them two days. it Chagres for them two days. From the Isthmus

The steamship Panama, from Sa. Francisco, April 16th, arrives. at Panama on the 2nd May, bringing one million dollars in gold dust on freight, and 250 passengers.

The steamship Isthmus left San Francisco in company with the Panamu, having on board about one million dollars in gold dust, and about three hundred nassemers.

three hundred passengeri.
The U. S. sloop-of-war Vincennes was at Panams on the 3rd of May, all well.
The steamship Gold Hunter was at Acapulco.

The large immigration this spring of respect The large immigration this spring or respectable families and females to California, have added greatly to the social and moral improvement of society in the State.

Gambling is fast falling into disrepute over the State, and especially in the principal cities. In Poctland, Oregon, the proprietors have been required to abandon their tables and close their

puired to abandon their lables and close rates in thishments.

The mining interests appear to be in as prosperous a condition as eyer. New discoveries are made weekly and even daily. An article of interate Anthracite coal has been discovered at Puget's Sound, and an article of tolerable fair Connel coal has been discovered near Benissa is this State.

The market is adulted with all kinds of mer-

has been discovered near Benisia in this State.

The market is glutted with all kinds of merchandize, and on this account goods of every character are selling at remarkably low rates. It is expected, however, that when communication is freely opened with all parts of the mines, business will greatly impreve.

The Stockies Times furnishes some interesting

The Stockies Times furnishes some interesting statements of the discovery of rich quartz veins in the Southern mines. The Editors consider that it has been satisfactorily established that these quartz deposits will eventually prove an inexhaustible source of wealth to the country.

The gulches in that vicinity are now supplied with water, and the miners are actively employed in washing out the suriferous soil which they have

in wasting out the surferous soil which they have thrown up.

The same paper says:—

"We learn from Mr. Stevenson, of Castoria, who has just arrived from the mines, that a lump of gold, weighing fourteen pounds and a half, was found on the Mariposa diggings. On the 2d, two lumps were taken out at the same place, one weighing four pounds and a half, and another

Health Before Riches. The warm season is now at hand, and with the pppressive heat of Summer, the value of Planagemet Water becomes more appreciated. The uperiority of this celebrated Water above all

tagenet Water becomes more appreciated. The superiority of this celebrated Water, above all other. Medicians Waters, a universally acknowledged. Indeed it may be said to have superaed all others. As all know who have once tasted it, it differs essentially liton every other Water, in preserving a solutity or thickness when in the mouth, which is site with in no other spring, and which makes all other Waters appear poor and insipid in comparison with it. It has also the property of varying its character with the temperature: when warm, it is more saline, when cold, it is less so. Several facts connected with its sanitary properties, may be stated here, and as their truth is unimpeachable, they are worth a rolume of general statements:—

Tet. There is now at Plantagenet an elderly woman, who had been for six years deprived of the use of her limbs, and who, by the use of the Waters, has partially recovered. This is a fact well known in the neighborhood. The lady heraelf tesides with Mr. Ganeon, of Plantagenet, and will, if necessary, verify this extraordinary case.

2nd. Here is another instance: Mr. Mollet, of St. Ann, told Captain Barsum, of the Steamer Lifly, that he had severely injured his hand with a cable, and, by the advice of some friends, he wrapped his hand in a bandage well saturated with Plantagenet Water, and in three days it was quite well.

3rd. Captain Dole, of Pet'te Nation, had a bar-

with Plantagener water, and the strength of Pork which had become tainted. He resolved, as an experiment, to take it out of the old Ir no, and wash it with Plantagenet Water. fter doing so several times, it became as swee

So well are these facts known at Plantagene

But it has been said, there are plenty of other saline springs, and why should this be better than the others? Why it should be so, it is not easy to say; but there is the fact—it is better. Whoever once uses the Plantagenet Water, will never use any other. It is true that attempts have been made to puff up others, and that deception even has been practised by manufacturing water; but what has been the result? Who has been long deceived? The fact is notorious. At the present moment, every one uses Plantagenet Water who can get it, and no one who can get it will use any other. As evidence of this, it is only necessary to refe

As evidence of this, it is only necessary to refer to the names of the eminent Physicians, and public and private individuals, who have certified to the virtue of the Pluntagenet Waters, and who tegard it as a boon to the country.

In conclusion, let it be borne in mind, that it is not simply as a saline driuk that, these Waters are beneficial, but because they have an oily, fattening propesty, unknown to any Waters besides. There is, in fact, but one Plantagenet spring, and the more that is known, the higher its reputation, and the more all others sink into insignificance beside it.

The following are a few of the names of the parties referred to above, all of whom speak from actual experience and use of the Plantagenet

actual experience and use of the Plantagenet Waters;
