TINGS

THE Toronto Monetary Times rightly concludes that the proposal to increase the tariff taxes on both sides of the border, if carried into effect, will be seriously detri mental to both Canada and the United States. Of course it will. The higher the taxes, the less trade; the less trade, the less profit. How the new retaliatory taxes will operate against the Canadian farmers was ably shown by Mr. Charlton, in a recent speech in the House of Comns. The honorable gentleman placed before the House the following statement of the value of articles exported to the United States last year as compared with the value of the same articles which we exported to Great Britain:

3,838 84,610 245 158,443

\$585,885 ..\$21,141,035 these articles to the United States is over now persuaded that tariff revision has be-35 times greater than to Great Britain, our 35 times greater than to Great Britain, our next best market, yet we have politicians so the McKinley Committee is proceeding on the McKinley Committee is proceeding to ignore every opportunity to make better trade relations with the United who assert that it is the duty of Canadians States, and to lock for new markets else-

TAKE THE VOTE FIRST. April 15 is the date fixed by the City Its only regard is for the interests of Water Commissioners for cutting off the ter supply now provided to 108 residents generally. And this is natural enough. in the suburb of London South. The policy But the circumstances have made this disof the Commissioners, declared some months ago, is that no water shall be supplied to persons living outside the city limits; and in view of what has taken place since last midsummer we cannot say that it is an unreasonable one. It seems to us, however, that the Commissioners could very properly give the consumers of city water in London South another week and permit the voice of the people to be heard on the 21st inst. before taking the step of which they have given far failed to provide themselves with water Ontario a yearly loss of about \$7,000,000 in for domestic purposes. Two interpretations on be placed upon this inaction. Either the suburbans believe that the Commissioners were not in earnest when they resolved to cut off the water supply to outsiders; or they have assumed that amalgamation will be indorsed by the majority of the electors.

We have every reason to believe that the We have every reason to believe that the We have every reason to believe that the commissioners are really in earnest, and that they mean to stick by their decision. Suburbans need not rely on the decision being reversed. But we can the decision being reversed. But we can the consumers have felt the pulse of public opinion, as our representatives have public opinion, as our representatives have don, and have reached the conclusion that the sunion of the city and suburb will be

ind have reached the conclusion that congress at the largest with the date of the city and suburb will be this increase of Canadian duties as an don the city and suburb will be sufficient to the city and suburb will be argument in favor of the increase recombed and the city and the city and sale, their inaction is easily accounted the city and the circumstances, we for. Under all the circumstances, we would suggest to the Commissioners that would suggest to the Commissioners that who have been trained for a generation to who have been trained for a generation to believe in the virtues of a protective tariff. they stretch their decision a little at the meeting to-morrow night and give the suburbans another week of grace. By that time the vote will be over, and the future

of the people decided.

In the meantime, there can be no serious objection to Mr. Hutchinson and his friends voluntarily cutting their connection with the cities water supply, and resuming conthe civic water supply, and resuming con-sumption of the clear-flowing fluid which, sumption of the clear-flowing fluid which, as has been pictured by the imaginative compiler of the circulars laid before the compiler of the circulars laid before the Legislature, is to be found anywhere for the digging.

of barley to furnish seed grain for the Canadian farmer, and it is being furnished to them at the goodly price of \$2 per bushel. We should be very glad if the bushel. We should be very glad if the digging.

the digging.

The eleventh official census of the United States will begin on the 1st of June next. The work must be completed in fifteen days in the cities and thirty days in the country. The director of the census, Mr. Porter, the director of the census, Mr. Porter, in grandlines, to be able to give the principal results to the public in twenty days after the reception of the last report. This in the reception of the last report. This give the principal results to the public in twenty days after the reception of the last report. This were under 50 pounds per bushels, while the were under 50 pounds per bushels, while the were under 50 pounds per bushels, will be a feat unexampled in census taking, it is accomplished.

cal charities, Detroit inaugurates one of April 22 which is especially striking. It ensists of a floral and musical festival, in consists of a floral and musical festival, in which are represented the 23 principal charities of the city. Each charity has a booth built in the architecture of the country it has chosen. More than 300 ladies of high social standing take charge of these, dressed in costumes appropriate. The orchid feature of the floral display and the trained chorus singing will be especial attractions. The festival was organized and is being managed by the Detroit Journal and lasts three days. the fisheries question, until they succeeded in estranging almost every friend that Can-

HOURS OF LABOR.

Will They be Lessened? Some Facts to Think About.

The desire to obtain something for nothing is ever present in the human race. And to the careful observer the movement to reduce the hours of labor has its rise partly in this desire. No one wants to work less hours for less pay; all the labor agitators demand the same money for shorter days. If this the same money for shorter days. If this should be obtained, as we sincerely hope is will, after a short time the result will be out of the necessities of the Republican party or rather to prevent a general secession of the farmers from their ranks. The protective system in the United States, as is well known, has got into bad odor with farmers and the working class; and while a

will, after a short time the result will be lessened value of money; money will not buy so much, and wages will be as low as before. Benefit the workingman, but do nothing that will lower his wages.

What, then, can be done? It is easier to ask such a question than to give a correct answer. But all will agree in saying that the healthier a man is the better off he is. Who can be happy when nervous, sleepless or with poor digestion? "A fit of the blues" is the sure result. Prof. Phelps did more for humanity in discovering Paine's Celery is the sure result. Prof. Phelps did more for humanity in discovering Paine's Celery Compound than many a noted philanthropist. This wonderful medicine makes the weak strong, builds up new nerve tissue and strengthens the vital forces. It is perfectly qure. It is a scientific preparation. It has curative powers in brain and nerve disorders such as no other medicine possesses. The most remarkable testimonials to its wonderful effect are shown at the laboratory on Mountain street in Montreal. It is a unque medicine, like nothing else.

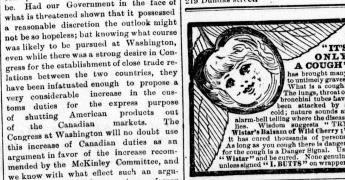

laboratory on Mountain street in Montreal. It is a unque medicine, like nothing else. When the headaches, the face flushes, rheumatic or neuralgic pains appear and life becomes a burden, use Paine's Celery Compound. That hollow-eyed, sallow-skinned, prematurely old look disappears. Deep sleep comes like a balm to the irritated nerves. Strength of mind and body return, and sickness and suffering are driven away by health and happiness. The best citizens of Canada are using this medicine regularly, and its great popularity is the result of unquestioned merit.
