SALT SPRING ISLAND FAIR'S PRIZE LIST

Names of Winning Exhibitors at the Annual Exhibition

The Salt Spring Island fair last week at Ganges harbor proved highly successful. The entry list was long and the exhibit good. The prize list follows:

Horses—Saddle horse: 1. A. Blockburn; 2. Dr. Baker. Best buggy horse: 1. Thos. Lee. Filly or gelding: 1. A. J. Smith; 2. J. Harrison. Foal of last year: 1. T. D. Mansell; 2. H. Woods. Filly or gelding, draught—1. W. H. Lee; 2. J. Maxwell. Team driven in wagon: 1. J. Maxwell. Mare or gelding: 1. A. G. Crofton. Filly or gelding, 2 years old: 1. J. Harrison; 2. D. K. Wilson. Mare or gelding, 1 year old: 1. W. H. Lee. Foal of 1908, general purpose: 1. W. H. Lee. Foal of 1907, general purpose: 2. W. H. Lee. Best gelding: 1. W. H. Lee. Best gelding, driver: 1. W. H. Lee. Best gelding, 2 years old: 1. W. H. Lee. Best gelding, 1 year old: 1. W. H. Lee. Best gelding, driver: 1. W. H. Lee. Best gelding, 2 years old: 1. W. H. Lee. Best gelding, 1 year old: 1. W. H. Lee.

Cattle—Best bull, under 1 year: 1. J. C. Ayrault; 2. D. H. Wilson. Heifer, under 1 year: 1. D. H. Wilson. Heifer, 1 and 2: 1. D. H. Wilson. Best dairy cow, grade: 1. A. G. Crofton; 2. D. H. Wilson. Best heifer, under 2 years: 1. A. G. Crofton; 2. B. Lundy. Heifer, under 1 year: 1. A. G. Crofton. Heifer calf: 1. A. G. Crofton; 2. W. Caldwell. Best fat steer: 1. T. D. Mansell.

Sheep—Best ram, 1 shear and over: 1. Max Enke; 2. W. Grimmer. Two ewes, 1 shear: 1. Max Enke; 2. W. Grimmer. Two ewe lambs: 1. Max Enke. Two ewes and pedigree: 1. Max Enke; 2. W. Grimmer. Two ewes: 1. Max Enke; 2. W. Grimmer.

Pigs—Sow and piglets, 1 and 2 shears and over: 1 and 2, W. M. Mount. Sow and piglets: 1. W. H. Lee. Best sow, any breed: 1. Max Enke; 2. H. Caldwell. White Yorkshire sow: 1. W. H. Lee. Poultry—Andalusian, cock: 1. H. W. Bullock. Andalusian, hen: 1. R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards.

Swine—Best sow, any breed: 1. Max Enke; 2. H. Caldwell. White Yorkshire sow: 1. W. H. Lee. Poultry—Andalusian, cock: 1. H. W. Bullock. Andalusian, hen: 1. R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards.

Swine—Best sow, any breed: 1. Max Enke; 2. H. Caldwell. White Yorkshire sow: 1. W. H. Lee. Poultry—Andalusian, cock: 1. H. W. Bullock. Andalusian, hen: 1. R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards.

Swine—Best sow, any breed: 1. Max Enke; 2. H. Caldwell. White Yorkshire sow: 1. W. H. Lee. Poultry—Andalusian, cock: 1. H. W. Bullock. Andalusian, hen: 1. R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards. Rhode Island Red, cock: 1. R. P. Edwards. Rhode Island Red, hen: 1 and 2, R. P. Edwards. Rhode Island Red, pullet: 1 and 2, R. P. Edwards.

MOUNTAINS OF ORE IN TELKWA DISTRICT

Vancouver, Sept. 18.—“A few years hence, with the enjoyment of railway shipping facilities, the Telkwa district in northern British Columbia will be outputting millions of tons of copper ore annually. There is almost no limit to the production, and there are no mining problems to solve. The showings are so numerous that there is room for half a dozen camps as large as Butte. It will be unnecessary to sink shafts. The ore can be extracted at the minimum of expense by means of a series of tunnels and shafts. Some of these tunnels will give a depth of one thousand feet, enabling the ore to be handled by gravity. Railway spurs can be extended direct to these workings. All this also means the development of a vast smelting industry in the same vicinity, as the district is an almost inexhaustible wealth of cooling and steam coal.”

This was the way Harry H. Tanner of Seattle summarized his views respecting the Telkwa region whose mineral resources have attracted widespread attention for several years past. Mr. Tanner is a young man, whose father is W. G. Tanner, well known as a pioneer miner and geologist along the Pacific coast. Harry Tanner recently returned from the Telkwa district where he spent the summer months.

Mr. Tanner is enthusiastic about the possibilities of the Rand group, which he located two years ago. The proposition embraces the copper claims in the Three Lake Basin in the heart of the Telkwa country. A large interest in it has been acquired by his father and C. D. Rand, of Vancouver. An extensive programme of development will be inaugurated next year. As all the legal requirements in regard to assessment and surveys have been completed, the owners are now applying for crown grants.

“The Rand group, in general, is situated at an elevation of five thousand feet above sea level,” said Mr. Tanner. “It is less than three miles distant from the properties of the Telkwa Mining, Milling and Development company, of which Harry H. Tanner is general manager and John P. MacGinnis, mayor of Butte, is president. We have three distinct veritable mountains of ore, the leads being traceable for a distance of three thousand feet. Geologic has shown the capping on the summits and steep slopes exposing it and making it ready for mining operations. Farther down the mountains the rock slides have covered the ore bodies, but they are traceable to the slides, and hence it is a certainty that they extend to the foot of the basin. The trend of the copper deposits is north-south and south-southwest, and they are almost too wide to be called veins—they are north and south. In places the mineral is exposed on the surface for a width of 150 feet. Here and there the hillsides rise vertically to a height of two hundred feet before taking a more gradual slope to the summit. On these steep inclines the ore is also visible, the appearance is impressive sight. The ore occurs in a series of opitoid and porphyry dikes which have come up through the volcanic flow. In places the copper is also found to have a quartz gangue.”

“Here and there in these large ore bodies are enriched zones varying from three to five feet in width and carrying black oxides with a ten per cent. copper. Of course, there is no difficulty in getting samples that will run much higher than the assays of assays embracing all the ore bodies I have no hesitation in stating that the Rand group will average four per cent in copper and about one-half ounces of silver per ton. There are no values in gold. The chief characteristic of the proposition is the immensity of the ore deposits, representing as they do three million ounces of silver. Mining can be carried on simultaneously at a dozen different points by means of glorified open quarries or tunnels. There will be no shaft mining. A series of tunnels will give a vertical depth of over one thousand feet. This will enable ore to be extracted and handled at a minimum of expense and labor. No tramways either will be necessary, as railway spurs can be extended along an easy grade to the various proposed portals. Indeed, the line will cover ore with larger openings railway trains can be run into the tunnels and there loaded with ore.”

“The group is less than seven or eight miles from the Copper River survey of the Grand Trunk Pacific and about twelve miles from the Bulkley valley survey route. There is an easy grade in either direction. Mr. Orm, the state mining inspector of Montana, after a visit to the Telkwa region, stated that various conditions, including size of ore bodies, the proximity of mining methods and the proximity of cooling coal would make it one of the greatest mining and smelting centres in the world.”

C. D. Rand also confirmed the announcement of Mr. Tanner that the Rand group will be developed on an extensive scale next year. Messrs. Tanner have also disposed of a large interest to Mr. Rand in four coal sections in the Bulkley valley. The seams are of good size for working, but have not yet been opened up.

Everything Ready-to-Wear for Ladies and Children

Campbell

The Home of the Dress Beautiful and Exclusive

MATCHLESS FINERY FOR THE FAIR

Is undoubtedly the most entrancing exhibition of Ladies', Misses', Children's and Babies, Ready-to-wear garments ever displayed in Western Canada, it is great in quantity, greater in quality, and greatest in economy, for nowhere else can you find such a vast number of exclusive creations—nowhere else can you find such magnificent quality. Nowhere else, value-for-value, can you find such low prices. You are always a welcome guest at this exhibition of matchless finery in our showrooms.

Our Costumes

It took many months to select the special materials, create the designs and construct the beautiful and distinctive costumes now on view in our showrooms, but it will not take many weeks to sell them, for the simple reason that they are the most fashionable, most correct, and lowest priced on the coast, viz.: From \$75 down to \$20

SEE OUR WINDOWS

Our Coats

Our Coats are masterpieces of the art of good tailoring. They are the very cream of this season's most exclusive styles, and, what is more, they are so reasonably priced that you can purchase one of our exclusive model coats for less money than you pay for an ordinary coat elsewhere, viz.: From \$50 down to \$7.50

SEE OUR WINDOWS

Our Neckwear

Our Neckwear is a beautiful exhibition in itself. OSTRICH FEATHER BOAS from \$6.75 C O G FEATHER BOAS from \$6.00 R U C H E COLLARS from \$7.50 L A C E G A B O T S from \$9.00

ICE IN HUDSON BAY

Newfoundland Sealing Steamer Brings Back a Rather Unfavorable Report

St. John's, N.F., Sept. 18.—Should the report of the ice-blocked conditions in Hudson Bay last summer brought to St. John's by the sealing steamer Adventure prove to be true of every year, the great project of the Canadian government, providing for the expenditure of \$20,000,000 in building a railway and providing a line of grain-carrying steamers from Port Churchill in Hudson Bay to Europe, will undoubtedly fall through. The captain of the Adventure reports that she was unable to enter Hudson Strait until the last week in July because of an ice blockade, and said that the ice was also encountered in August.

Another Aviator Hurt

Angers, France, Sept. 18.—Rene Gasnier, the aeroplane pilot, met with an accident while making a test with his machine yesterday. The connecting rod of the planes broke and the machine crashed down from a height of 25 feet. Gasnier was severely hurt about the head and the aeroplane was wrecked.
