The Transcontinental Railway, the Settlement of the Alaskan Boundary dispute and Chamberlain's Imperial cation Scheme are all large questions of our day. They are interesting to us from the fact that they promise future of Canada. The most prominent features in Canada's present poon the ore hand and with the United States on the other.

The Dominion has through a variety of gauses, chief of which is the establighment of a market and vigorous

rowth and development that makes a ong continuance of her present poof the United States and numerous public speakers are telling the people of that country that Canada is deswhile speakers are telling the people of that country that Canada is desired in a very few years to become a part of their union. The people as a matter of course believe it and with tined in a very few years to become a part of their union. The people as characteristic energy are quite ready 21st.

Chemberlair, the most live states-man in the councils of Britain, is trymore in keeping with the conditions as they are likely to be in the near

quite content to let things remain as they are. Now, however, is the time when the toundation for the future is being laid. The questions we have cited are stones to be rejected or used by the builders.

—The marriage of Miss Laura May Millett, of Clementsvale, N. S., to Mr. Iraily, N. S., will take place in Clements Baptist church on Wednesday, September 16th, at 11 o'clock a. m.

by the builders.

—An effort will be made at the coming session of the local legislature to have the game law so amended that it will be unlawful to take and hold in captivity any young moose or other game animal unless licensed by a special permit to do so.

There are two reasons for asking for such an amendment. First: As regarding the game supply it is quite as objectionable for a private party to capture and keep a moose during close season as it is for them to kill one. Second: The charge of cruelty may with just cause be preferred against any one who holds these creatures prisoners. Their growth and beauty are destroyed by the loss of the freedom that is theirs by nature.

—Mr. J. G. Harlow has purchased beauty are destroyed by the loss of the freedom that is theirs by nature, and by having to subsist on food that was never intended for them. The majority of them are killed by misplaced kindness, in the form of overleeding. Those that survive drag out a miserable existence, a caricature of the majority of them are killed by misplaced kindness, in the form of overleeding. Those that survive drag out a miserable existence, a caricature of the comparance organizations of the freedom that is theirs by nature, and by nature, and by having to subsist on food that are the mose and the mose and the intended to the intended the vigorous and beautiful creatures that inhabit the wilderness. The custom of capturing calf moose out of season has become far too commun, and the N. S. Game Society in their effects to check it will have the support not only of sportsmen but of all humans hearted people as well.

ANNAPOLIS C. R. A. WINS FROM RGUND HILL C. R. A.

The Annapolis C. R. A. won from Round Hill C. R. A. at the meet on Friday last. The day was an ideal one for shooting and the general average of the shooting was good. Reginald Wade topped the aggregate with 103, followed by Dr. Smith with 107, and J. Free Beeler with 103. For Round Hill B. M. Williams did the best shooting. In the 200 yard range, seven shots per minute, J. M. Owen, who was placed to shoot at No. 2 target, put all his shots on No. 1, which was alloted to Leprillet Hicks. This mistake caused a loss of at least 20 points to Annapolis, as the judge was always strong in this specialty. The cut shows the effectiveness of the shooting. The whole fourfeen shots counting. After the shoot was over, both teams took supper at the American House, where speeches were made, tonsts, drank, and a general good time had. To Capt. O'Dell's indefatigable efforts, is due the success of the Annapolis team, who changed a defeat of 272 points at Round Hill a short time ago, to a victory with 52 points to their credits. ago, to a victory with 52 points to their credita. The following is the result of the

Thousands of settlers have arrived in Canada of late, the majority of whom will proceed to take up farming lands in the Northwest. The outlook for Canada industrially was never as bright as it is to-day, and in no portion of the Dominion is it better than in the wheat growing section to the north of Winnipeg. A territory that can produce wheat such as is used to make Ogitic's Flour is rich indeed, and no one can accurately forecast the rneasure of its possibilities.

—On Tuesday of last week, the Rev. F. P. Greatorex, who is at present taking charge of the Parish of St. John's, Cornwallis, received a letter from one cf the wardens of the Parish of Granville Ferry, asking him if he would be willing to return to his old position as rector if unanimously elected, Upon receipt of an affirmation of the Dominion is it better than in the wheat growing section to the north of Winnipeg.
