

The Canadian Engineer

A weekly paper for Canadian civil engineers and contractors

Index to Volume 29, July to December, 1915

ISSUE	BEGINS PAGE	ISSUE	BEGINS PAGE	ISSUE	BEGINS PAGE	ISSUE	BEGINS PAGE

TITLE	PAGE	TITLE	PAGE
ARTICLES		MUNICIPAL: Apportionment of Cost of Highway Bridges	183
ALKALI SOILS: Durability of Drain Tile in —	331	*District Heating System at Whitby	601
BEAMS: *Design of Rectangular Concrete —	138	Engineer in — Affairs	373
BLASTING: See EXPLOSIVES.		Manitoba — Convention	709
BORING: Deep — in Canada, Geological Investigation	251	— Improvements in Calgary	608
Methods of — and Drilling on Oilfields	158	— Improvements in Moose Jaw	692
Test — Data, Shoal Lake Aqueduct	321	— Improvements in Toronto	146
BRIDGE(S) *Bloor Street Viaduct Constr., Toronto	677	Objects of Proposed Civic Improvement League	634
— Constr. in Saskatchewan	428	Telephone Extensions in Saskatchewan	526
*Constr. of Foundations, Bear River	336	PARKS: *Canadian National — Development	701
*Progress on the New Quebec —	389	PILES: Concrete — in Railway Constr.	596
Reinforced Concrete —	626	*Different Sections of Sheet Piling	187
*Some Steel Railway Viaducts in Western Canada	344	*Pressure on — Supporting Masonry	301
Apportionment of Cost of Highway —	183	Specifications for Wooden —	178
Comparison of — Costs	143	POWER: Diesel Engines for Development of —	330
*Lemieux Island — Design, Ottawa	720	*Handy Approximations for Stream Measurement	350
*National Transcontinental Railway —	149	Large Water — Developments	212
*Olympic —, Island Park, Toronto	605	* — Development at Iroquois Falls	101
*Pile and Timber Trestle —	593	*Stave Falls — Plant	454
*Some Eastern —, C.P.R.	376	*Thomson-Porter Niagara — Project	452
*Unique — Across Panama Canal	326	*Foundations for Transmission Towers	131
*World's Largest Reinforced Concrete Arch	461	Transmission Line Construction	163
*Estimating Quantities for Highway —	289	See also HYDRO-ELECTRIC and WATER POWER.	
CANAL(S): *Interesting Method of Erecting Lock Gates	446	RAILWAY(S): Construction Equipment of —	706
*Improving Rapide Plat — Lock Entrance	725	C.N.R. Transcontinental Line	398
*Progress on the New Welland Ship —	557	*Eastern — Bridges, C.P.R.	376
*Vertically vs. Horizontally Framed — Gates	229	*Government of Alaska	245
CEMENT: *Fineness of —, by Air Analyzer	536	Kettle Valley — Construction	113
High-Pressure Steam Test of Portland —	401	Locating a New Line	718
COLUMNS: *Strength of Concrete Filled Pipe —	141	*National Transcontinental — Bridges	149
CONCRETE: — in Railway Constr.	596	Progress Alberta and Great Waterways —	523
*Design of Rectangular — Beams	138	*Steel — Viaducts in Western Canada	341
*Estimating — Quantities for Highway Bridges	289	*Stonewall Branch W. S. & L. W. —	203
* — Dam and Steel Sector Wier, Calgary	438	— Development in Saskatchewan	492
*Lemieux Island Bridge, Ottawa	720	Ontario Hydro Radial Projects	669
*Olympic Bridge, Island Park, Toronto	605	Radial —	712
Reinforced — Bridges	626	*Radial — Entrances and Semi-Rapid Transit, Toronto	741
*World's Largest Reinforced — Arch Span	461	*London and Port Stanley — Electrification	197
*Failure of Sea Water —	175	Traction Outfit for Electrified Steam —	441
Durability of — Drain Tile in Alkali Soils	331	British Columbia Electric — System	425
*Expansion of —	384	Fuel Oil for Locomotive Use	159
*Machinery and Power Plant on — Foundations	472	Grade Crossing Elimination	416
Shrinkage and Time Effects in Reinforced —	636	*Locomotive and Car Shops, C.P.R.	327
Waterproofing — Surfaces	161	*Notable Group of Terminals	493
*Read Building Fire, Montreal	595	Rail Specifications	156
Weight-Volumetric Proportioning of Aggregates	259	Use of Pure Iron by —	738
*Influence of Temperature on Strength of —	545	Wooden Poles and Cross Ties, 1914	374
Ingredients of — and their Binding Characteristics	110	REFUSE: Frequency of — Collection	737
CONTRACTORS' Equipment: Aerial Wire Ropeways	233	REINFORCED CONCRETE: See CONCRETE.	
*A Novel Slope Trimming Machine	382	RETAINING WALLS: *Design of —	622
DAM(S): Action of Water Under —	399	ROAD(S): Field for Highway Engineers	685
*Concrete — and Steel Sector Weir, Calgary	438	Good — and Profitable Farming	637
*Economic Top Width of Non-Overflow —	665	Relation of Good — to Water and Rail	736
*St. Frances River Storage —	473	Uniformity in — Data	443

TITLE	PAGE	TITLE	PAGE
DREDGES: *Giant — in Toronto Harbor	221	EXPLOSIVES: Coal-Tar Products Used in Making —	309
DRILLING: See BORING.		Electric Blasting and Lightning	210
DRY DOCKS: — Concrete — Construction	170	Examination of — re Safety in Use	227
ELECTROLYSIS: Mitigation of —	457	FOUNDATIONS: *Constr. of — for Bear River Bridge	336
ENGINEER(ING): *Canadian Engineers at Ypres	437	— for Transmission Towers	131, 163
Canadian Society of Civil Engineers	504	General Notes on —	671
Engineers in Municipal Affairs	373	*Machinery and Plant on Concrete —	472
Engineers and War	407, 428, 447, 523	FUELS: Coal Fields in the Middle West	181
Manitoba Branch, Can. Soc. C.E.	696	Coal Tar in Engineering Industries	205
*New Five-Place Computer	424	Development of Canadian Peat Bogs	242
Status of the Engineer	469	Fuel Oil for Locomotive Use	159
Tour of Western Canada by Engineers	616	Saskatchewan Lignite Development	248
EXPLOSIVES: Coal-Tar Products Used in Making —	309	HARBORS: *Crib Construction for Port Weller	207
Electric Blasting and Lightning	210	HYDRAULIC(S): Action of Water Under Dams	399
Examination of — re Safety in Use	227	*Charts for Specific Speed and Diam. of — Turbines	494
FOUNDATIONS: *Constr. of — for Bear River Bridge	336	* — Jump in Open Channel Flow	500
— for Transmission Towers	131, 163	Practice in High-head — Plants	179
General Notes on —	671	HYDRO-ELECTRIC: — Treatment of Copper Ores	705
*Machinery and Plant on Concrete —	472	Power Development at Cedars Rapids	680
FUELS: Coal Fields in the Middle West	181	Control and Protection of — Systems	273
Coal Tar in Engineering Industries	205	*Power Development at Eugenia Falls	629
Development of Canadian Peat Bogs	242	Supplemental Power for — Plants	546
Fuel Oil for Locomotive Use	159	See also POWER and WATER POWER.	
Saskatchewan Lignite Development	248	INDUSTRIAL PLANTS: *Greenhouse Factory at St. Catharines	162
HARBORS: *Crib Construction for Port Weller	207	IRON AND STEEL: Canadian Smelting Plants for —	254
HYDRAULIC(S): Action of Water Under Dams	399	Demand in Great Britain for — Products	228
*Charts for Specific Speed and Diam. of — Turbines	494	Steel Penstocks Protected by Tar Paints	468
* — Jump in Open Channel Flow	500	MATERIALS: Failure of — Under Repeated Stresses	478
Practice in High-head — Plants	179	Holding Power of Nails	519
HYDRO-ELECTRIC: — Treatment of Copper Ores	705	Horse vs. Motor Transportation of —	567, 612
Power Development at Cedars Rapids	680	Mechanical Analyses of Sands	496
Control and Protection of — Systems	273	Pulpwood in Canada, 1914	375
*Power Development at Eugenia Falls	629	Timber in Canada	538
Supplemental Power for — Plants	546	Protective Coatings for —	357
See also POWER and WATER POWER.		Steel Protected by Tar Paint	468
INDUSTRIAL PLANTS: *Greenhouse Factory at St. Catharines	162	Various Uses for Rolled Rail Steel	410
IRON AND STEEL: Canadian Smelting Plants for —	254	MINERALS: — Production, Ontario, 1914	684
Demand in Great Britain for — Products	228	Working of Asbestos	450
Steel Penstocks Protected by Tar Paints	468	MINING: A Large Electric Hoist	348
MATERIALS: Failure of — Under Repeated Stresses	478	Modern Electric Mine Locomotive	322
Holding Power of Nails	519		
Horse vs. Motor Transportation of —	567, 612		
Mechanical Analyses of Sands	496		
Pulpwood in Canada, 1914	375		
Timber in Canada	538		
Protective Coatings for —	357		
Steel Protected by Tar Paint	468		
Various Uses for Rolled Rail Steel	410		
MINERALS: — Production, Ontario, 1914	684		
Working of Asbestos	450		
MINING: A Large Electric Hoist	348		
Modern Electric Mine Locomotive	322		

*Illustrated Article.
