**IMPROVED PREMIUM IRON CYLINDER GRAIN DRILL,**  
MANUFACTURED BY  
**JOSEPH HALL, OSHAWA, C. W.**

THE past winter having demonstrated beyond a doubt the great advantage of sowing winter grain with Drills over broadcast sowing, and the fact being clearly established, that in dry or other wise unfavourable seasons, all grains do much better when sown in drills, I have been induced to commence the manufacture of these valuable implements.

In our wet springs it is almost impossible to get the grain properly covered with a harrow, so as to prevent injury from dry weather following. Aside from these reasons, the amount of seed sown, and the increased crops raised by reason of having the grain evenly deposited in the ground, makes the GRAIN DRILL an indispensable requisite of every well regulated farm.

I am happy to say I can now offer to my customers the most perfect GRAIN DRILL in use in the United States or Canada. It will sow all grain equally well, in quantities of from one half to two bushels per acre. It can be furnished with either eight or ten tubes as desired.

When wanted, a GRASS SEED Attachment can be furnished, which will sow any grass seed in connection with the grain or alone, in quantities of from four quarts to half a bushel per acre.

All orders for these Machines, Horse Powers, Three-hors. Reapers and Mowers, Clover Mills, Sowing Machines, Mill or Job Casting, or Machinery, will receive prompt attention.

Drills can be furnished with tubes in one row or two, as desired. For rough lands two rows is recommended.

ALL MY MACHINES ARE WARRANTED.

**COE'S SUPER-PHOSPHATE OF LIME MANURE FOR WHEAT.**

Letter from Mr. Albert Knight, M. P. P. of Stanstead, O. E.

PARLIAMENT HOUSE, Quebec, Feb. 8, 1865.

DEAR Sir,—I used some of Coe's Super-Phosphate of Lime last year, by way of experiment, upon my farm in Stanstead, on different crops.

I am able to give you the result upon wheat, and on this crop it was very successful.

On a field which had been well manured the previous year, and planted in potatoes and turnips, I sowed Spring wheat (Scotch Lark) and applied Phosphate at the rate of about one barrel per acre, and harrowed in with two seeds. The crop grew remarkably well, the stalks were even, tall and strong, and stood erect until the grain was ripe. I do not think there has been a field of wheat raised in the county for many years that presented so fine an appearance as this field did before harvest. It was seen by, I suppose, more than a hundred farmers, who stated that it was the best looking field they had ever seen. The yield was 70 bushels and 50 lbs, weighing 60 lbs to the bushel, from 1 1/2 acre of ground. Similar ground, the previous year, treated in a like manner except the Phosphate, yielded only 12 bushels per acre.

My experience has convinced me that Super Phosphate is especially adapted to the growth of wheat, as it imparts vigour and firmness to the stalk, and gives a large product of grain, by supplying the elements necessary to the complete filling out and ripening of the kernel.

I shall make a larger use of it the ensuing Spring, and my good success last year will induce many others also to use it.

I am, very respectfully yours,  
M<sup>r</sup>. E. L. Snow, Montreal. A. KNIGHT.

**"CAPTAIN BUFORD."**

THIS BEAUTIFUL THOROUGH BRED STALLION HAS been imported by the undersigned, and will stand for Mares the ensuing season, commencing from the 1st of April until the 1st July, 1865.

**PEDIGREE.**  
CAPTAIN BUFORD by GLESCOR, out of LEOPARDISS by MDOCK; grandam, KITTY FISHER by Marshall's Mares; also the dam of Radolph. g. grandam by Cook's (afterwards Blackburn's) Whip; g. g. grandam, Harts' Maria by Craig's Alfred; g. g. g. grandam by Taylor's Belair. The Belair Mare, certified by her owner, Thos. D. Owens, Esq., to be Thorough Bred. All this maternal line were distinguished upon the turf, and of thorough bred horses.

GLESCOR, the sire of CAPTAIN BUFORD, was not only one of the best horses on the English Turf, but has proved equally successful in the Stud. His pedigree can be traced down through all the best blood of England. He was bred by Lord Jersey, in 1831; and by SLEMAN out of THORNTON, by TRUMP. Captain Buford is now 10 years old. He has received the First Premium as the best thorough-bred stallion wherever he has been shown. He is a beautiful Chestnut, stands sixteen hands high.

Remarks of FRANK HARTER, of Kentucky, one of the best thorough-bred horsemen in the United States.

"Buford is as well bred as any Horse that ever left Kentucky, and for Northern breeding, I know of none better. He has the advantage of most all thorough bred horses, in size, style, bone, and speed."

Remarks of H. H. YATES, Esq., of Chicago.  
"Buford is a very sure foal getter; his colts are all fine size, and are either bay or the color of Bluff. I do not believe there is a horse in the world that can show as many colts as he can, with such perfect limbs."

TERMS \$25—to be settled in all cases at first service, in cash, or note, due Oct. 1, 1865; also, groom's fee, \$1 00, payable at first service.
