

# NEW YORK EXCHANGE.

MARKET UNUSUALLY QUIET—  
SUGAR STILL MAINTAINS ITS  
STRENGTH—BANK STATEMENT  
SATISFACTORY.

New York, March 18.

British Consols are down from 1-16 to 1-15. The market for Americans is dull and somewhat heavy. There is still a lack of any official news to account for the recent advance in Sugar, but inasmuch as the stock did not react yesterday, but actually closed higher than on Thursday, it has strengthened the belief that the differences between A.S.R. Co., the Doschers, and the Arbuckles, are practically settled. Boston seems especially bullish on the stock, and one Boston speculator is said to have offered to bet a large sum of money that the stock would cross 200 before the end of next week.

The market generally continues to be one of specialties, the standard stocks being more or less neglected and inclined to heaviness.

Buying of T.C.I. yesterday was called good, and rumors are that some important interests have recently taken hold of the property.

In P.O. strength was on fairly well scattered buying, Flower brokers being moderate purchasers. The rise is said to be based on the approaching adjournment of the Illinois legislature which makes the introduction of any blackmailing schemes improbable. Great interest is taken in today's Bank statement. Writers on financial topics in the press and news agencies are fairly unanimous in predicting a heavy decrease in Surplus Reserve.

If the decrease should prove to be less than \$5,000,000 it will be a pleasant surprise to the Street. As to the loan item, guesses are very wild and there is no very reliable information upon which to form an intelligent opinion.

## NEW TRUSTS.

An aggregate of \$2,500,000,000 in preferred and common stock has been issued by the new industrial trusts since January 1st, 1898. A fair estimate makes about one-half of the stock water. While many of these combinations are worthy of confidence, as a whole we believe the end can be readily foretold. The English are familiar with the same through the Baring Brothers and their South American enterprises. The final result is known the world over.

The wisest policy would be, unless through personal knowledge you are able to select the wheat from the chaff, to leave all alone and confine your investments to the standard railroad issues, which publish weekly and monthly earnings, and on which you have means of obtaining definite knowledge, both as to earning power and physical condition.
