

Freight Schedule

For local freights our schedule will be computed on about one-half the charges now in force, and will be figured on the present classification.

For through freight we shall charge the same tariff over our road to which should be added the rate over the line shipped.

During the summer months our charges will aggregate about one-half the summer schedule. Freight for Montreal and points East on the waterways will be transferred at Kingston to boats, and in addition to our tariff the boat tariff will be added.

Express

A complete express service will be inaugurated at largely reduced rates.

Special rates will be made to department stores and large shippers.

Milk, butter, eggs, and garden truck will be collected and carried to market each morning by this service, and to regular shippers special rates will be given.
