

THE ONTARIO AGRICULTURAL COLLEGE

GUELPH, ONTARIO.

The College began work in 1874. At the present time it offers unequalled facilities for acquiring an all-round education in the Science and Practice of Agriculture. At the end of the two years' course the College grants a diploma, at the end of the three years' course the University of Toronto confers the degree of
BACHELOR OF THE SCIENCE OF AGRICULTURE

The Dairy Department is most complete and short courses are open for both young women and young men. There are very complete working laboratories in Chemistry, Biology, Botany, Horticulture, Physics and Live Stock. The English Course is thorough. Agriculture, of course, is the centre of the whole system.

JAMES MILLS, M.A., LL.D., President.
