### Plated Tea Kettles Are Used More Than Any Other Kettles And You Get Better Satisfaction.

You can get more use out of a Copper Tea Kettle than any other. Let an iron kettle go dry it will crack, and an enamel kettle will burn and chip; let a nickel plated copper kettle go dry and the spout will come off or the bottom will leak, like all other kettles, but you can have them mended. They heat quicker than any other, they look well on the stove and add to the brightness of your kitchen. We have these kettles in 18 oz. copper that sell at \$1.75; The same ketle in 14 oz. copper for \$1.25, then we have smaller ones at 75 and 90 cts. These are all copper and nickel plated. It pays to buy the best.

## OAK HALL Guarantees the Fit and Wear of Its - - Clothing

The science that forefold the time of the reappearance of Halley's Comet after 75 years would some hundreds of years ago have been regarded as magical. Today scientists would have been ridiculed had their forecasts gone wrong. When tailors, a few years ago, pretended to say just how long the clothes they would wear and fit they were not very seriously believed. Today the Clothier of first rank guarantees the fit and the wear of his clothing.

For, as the tracing of a comet is merely an everyday sort of feat in exact science, so the making of men's clothing that will fit and wear exactly as we say it will is one of the exact sciences worked out by the Oak Hall organization.

The Oak Hall store today is prepared to outfit any man in St. John, or from a distance, with clothing that will give the best fit and wear, and at a price that means a perfectly efinite saving of money. Suits, ..... \$5.00 to \$30.00
