Miss Bullock, skip.....5 skip.....5. Mrs. Ferguson, skip.....4 skip.....4. Miss Jarvis, skip.....3 skip.....3. Mrs. Fowler, skip.....2 skip.....2. Mrs. G. Jones, skip.....1 skip.....1. Mrs. Girvin, skip.....0 skip.....0. Mrs. Goodwin, skip.....0 skip.....0. Mrs. White, skip.....0 skip.....0. Mrs. Parks, skip.....0 skip.....0.

as a Victim of Bronchitis. ID TO BE PROPPED UP IN BED. 'chitis is an acute inflammation of the air tubes of the lungs. It begins with a tightness across the chest, and a difficulty of breathing, followed by a hard dry cough which develops into the raising of a greenish-yellowish phlegm. The first sign of bronchitis you check it immediately by using Wood's Norway Pine Syrup, and by preventing it becoming chronic perhaps turning into some serious trouble. Mrs. John Fawcett, Salford, N.B., writes: "A year ago I was a victim of Bronchitis. I was so bad I could lie down and had to be propped up. As the doctor failed to do me good a friend, who came to me, advised me to try Dr. Wood's Norway Pine Syrup. The first bottle made me so wonderfully I took five in all, and was cured. I have not a attack of it since." You get "Dr. Wood's" when you get it. Manufactured only by The Surr Co., Limited, Toronto, Ont.

Could Not Sleep Well For Four Years. HEART AND NERVES WERE BAD.

To the thousands of people who take an sleeping pill night after night, or who pace the bedroom floor with nervous unhinged, heart action wrong, and whose eyes sleep will not close, Milburn's Heartland Nerve Pills offer the blessing of sound, refreshing slumber. They restore the equilibrium of the deranged nerve centres and correct the wrong action of the heart. Mrs. Wm. Douglas, Thessalon, Ont., writes: "I am going to send you my testimonial for what your Milburn's Heart and Nerve Pills did for me. For four years I could not sleep well at night, as my heart and nerves were so bad. I tried all the doctors here, but none of them helped me. I read of your Heart and Nerve Pills, and tried only a few boxes, and I can certainly say they did me a great amount of good. I can now sleep as well as ever, and can advise anyone who suffers from heart trouble to try them."

Milburn's Heart and Nerve Pills are 50 cents a box; 3 boxes \$1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

THE RING. Bouts Tonight.

Phil Brock vs. Young Shugrue, Youngstown. Young Taylor vs. Joe Sherman, Indianapolis. Al Deimont vs. Joe Shears, New Bedford. Jih Howard vs. Tom Connor, and Johnny Kilbane vs. Young Driscoll, Brooklyn. One-Round Hogan vs. Young Gradwell, New York. Young O'Neill vs. Frank Loughrey and Joe Egan vs. Phil Harrison, Marquette, R. I. Mandot Wins. Memphis, Tenn., Feb. 3.—Joe Mandot of New Orleans, was awarded a decision over "Mickey" Sheridan of Chicago in an eight round bout here tonight. Puglist Was Arrested. Quiet was finally restored and Kid Hennessy and Miss Rogers were taken to the East 5th street station. Hennessy gave his occupation as a puglist and said he lived in Long Branch, N. J. But none of the host of policemen and firemen was to find the revolver with which Erich said the kid had labored him. The policeman was badly cut and bruised, nevertheless, and a charge of felonious assault was entered against Hennessy.

BASEBALL. For the Phillies.

Philadelphia, Feb. 3.—Manager Doolin of the Philadelphia National League Club this afternoon purchased the release of Dan Howley, a catcher of the Portland, Oregon, club. A Story About Ganley. Robert Leifield of the Globe's pitching staff contributed to the Boston Globe as the funniest incident he ever saw on a ball field, a yarn concerning Bob Ganley. The incident took place in his big league day. "Here it is," he said. "The funniest thing I ever saw on a ball field happened before I went into the major league, when as a member of the Pueblo Club, I was breaking into the big circuit by way of the Western League. The game was playing in Pueblo against our club. Bob Ganley was in the game while the president of the club was (Joe Cantillon) who for so long a time has been a familiar figure in baseball. Ganley got into some trouble that day with Harry Moll, the umpire, who was a funny old cuss with whom the players all ways had a lot of sport. Ganley got it up so long that Moll finally put him out of the game, whereupon Cantillon came down into the field to help make it hot for the umpire. Moll stood it for a while and then called for a police officer, who finally appeared on the scene riding horseback. Ganley and Cantillon would not move at the officer's order and so he began to back them off the field. He had a fine horse and one that was well trained. The horse would back up against Ganley and then against Cantillon, and when the officer used his spur the animal would give a little lurch which made the varlike contentions jump away in a hurry. Stop by stop they had to retreat, all

BORDEN MAKES THE MONEY FLY. Estimates the Greatest Ever Brought Down AND MORE IS TO COME

Main Figures About \$180,000,000 and Supplementaries Will Add Many Millions — A Vote of \$2,600,000 for St. John Harbor. Ottawa, Feb. 3.—The expenditures which increased rapidly under the Conservative regime last year will be greater than ever during 1913, according to the estimates for the coming fiscal year tabled in the House of Commons yesterday afternoon by the minister of finance. The total of the main estimates is \$179,102,183, an increase of nearly \$10,000,000 over the total amount voted at the last session. Supplementaries will bring the amount well above \$200,000,000, making a total increase of about \$40,000,000 over last season. This will not include the proposed vote of \$35,000,000 for the naval "emergency," \$10,000,000 for agricultural education and large sums to be voted by the government. So far there is no vote for the three Drednoughts proposed for the department of the government has cut the naval appropriation from \$1,000,000 to an even million. The estimates include an appropriation of \$2,600,000 for St. John harbor and \$2,500,000 for I. C. R. terminals at Halifax. There is a vote of \$200,000 for a new ice breaker for the St. Lawrence. There is \$350,000 for the purchase of a new revenue cutter for the department of customs. For the operation of the Intercolonial railway the estimate is \$13,000,000, as against \$10,000,000 last year. Sums for quarantine station at St. John, \$20,000. Pension for Judge W. Wedderburn, \$2,000. Pension for Judge W. W. Wells, \$2,000. I. C. R. Expenditures. Among the items totaling \$7,230,000 for railways are for intercolonial bridges to strengthen, \$12,000. Chatham, diversion of line and branch to, \$128,000. Extension of line between Nelson and Derby Junction, \$128,000. Fredericton—To increase accommodation at \$20,000. Halifax—Dock and wharves at, \$400,000. Halifax—To increase accommodation and provide machinery, \$111,500. Halifax—New terminal facilities, \$2,500,000. Moncton—Locomotive and car shops with equipment, \$136,000. St. John—To increase accommodation at \$18,000. Surveys and inspections, \$25,000. Sussex—Improvements at \$25,000. To increase accommodation and facilities along the line, \$70,000, and \$128,000. Trent—To increase accommodation at \$155,000. Wallace harbor spur line, \$60,000. Towards the construction of a railway from a point on the intercolonial railway to near Dartmouth, in the county of Hants, via Musquodoboit harbor and the valley of the Musquodoboit to Dean's Settlement in the said county, \$1,400,000. Albert wharf, \$12,000. Buctouche—To repair breakwaters and extend breakwaters, \$2,500. Buctouche—Dredging, \$25,000. Campbellton—Deep water wharf accommodation, \$30,000. Cape Bald—Repairs to breakwater pier, \$1,500. Cape Tormentine—Repairing and strengthening breakwater, \$30,000. Caraque—Repairs to deep water wharf, \$1,000. Chatham—Wharf improvements, \$90,000. Dipper Harbor—Breakwater improvements, \$80,000. Dorchester—Wharf improvements, \$17,500. Edgerton Landing—Repairs to wharf, \$1,000. Fairhaven—To build pierhead, \$6,000. Grande Ance—New wharves, \$4,200. Green Point—Breakwater, \$10,000. Harbors and Rivers. Harbors, rivers and bridges—General repairs and improvements, \$30,000. Harvey Bank—Raising wharf, \$2,150. Hopewell Cape—Repairs to wharf and improvements, \$2,000.

the time keeping up their argument with Moll, who stood laughing at them. The crowd and the players all joined in the fun and gave the officer a great laugh as he finally backed Ganley and Cantillon off the diamond. And the horse seemed to enjoy it as much as anyone.

FOR FALLING HAIR. You Run No Risk When You Use This Remedy

We promise you that, if your hair is falling out and you have not let it go too far, you can repair the damage already done by using Rexall "93" Hair Tonic with persistency and regularly, for a reasonable length of time. It is a scientific cleaning, antiseptic, germicidal preparation, that destroys microbes, stimulates good circulation around the hair roots, promotes hair nourishment, removes dirt and acts to restore hair health. It is as pleasant to use as pure water, and is delicately perfumed. It is a real toilet necessity. We want you to try Rexall "93" Hair Tonic with our promise that it will cost you nothing unless you are perfectly satisfied with its use. It comes in two sizes, price, 95c and \$1.00. Remember, you can obtain Rexall Remedies in this community only at Watson's 3 Rexall stores—King street, Main street and Haymarket Square.

DODD'S KIDNEY PILLS. CURES ALL KIDNEY DISEASES. BRUISES, RHEUMATISM, DIABETES, GRAVEL, SANDS, NEURALGIA, MIGRAINE, HEADACHE, BACKACHE, STOMACH DYSPEPSIA, BILIOUSNESS, COLIC, CONSTIPATION, AND ALL THE URINARY AFFECTIONS.

The real food value of the potato lies usually with one-quarter or three-eighths of the inch of the outside, some 90 per cent. of the inside of the potato being composed of water. Where the potato grows very rapidly the large amount of water in the centre causes the tissues to become broken down, thus resulting in a hollow potato. Eat at Once. But the best of canned food may be spoiled after it is opened for consumption. It is well known that all food preserved either by heat or cold is liable to compare, either by heat or cold is liable to compare, actively quick decay, once the effect of such influence is removed. Therefore, all canned

ONE DOSE RELIEVES A COLD—NO QUININE. Pape's Cold Compound Cures Colds & Grippe in a Few Hours

You can surely end Grippe and break up the most severe cold either in head, chest, back, stomach or limbs, by taking a dose of Pape's Cold Compound every two hours until three consecutive doses are taken. It promptly relieves the most miserable headache, dullness, head and nose stuffed up, feverishness, sneezing, soreness, stiffness and rheumatic twinges. Take this wonderful Compound as directed, without interference with your usual duties and with the knowledge that there is nothing else in the world, which will cure your cold or grippe misery so promptly and without any other assistance or bad after-effects as a 20-cent package of Pape's Cold Compound, which any druggist can supply—accept no substitute—contains no quinine—belongs in every home. Tastes nice.

DEATH RATE FOR JANUARY LOWER

(Continued from page 1) For Jan., 1912.....25 32 67 18.63 1... 7. Averages for 3 Years: 32 50.7 67.7 17.31 1... 7.3 Still-born, 8. Deaths from Intest. Dis. under 5 years, 10. Cause of Deaths. Among the many minor discoveries of the last century perhaps no more useful one was made than that which enables food to be kept wholesome for an indefinite period by means of canning. At first, it was largely vegetables and, especially, tomatoes that were canned, but now almost every variety of food, vegetables, fruits, fish and meat are so treated, and in the main, with very satisfactory result. Formerly, food could only be preserved for a lengthened period by means of foreign substances mixed with it, of which salt was, by far, the most important. These preservatives not only impaired the palatability of such food, but rendered it food to give rise to serious disease, such as scurvy and the like, when used for long time to the exclusion of fresh food. The ability, therefore, to have at hand wholesome food, free from artificial preservatives, when ordinary fresh food is not to be obtained is a very great convenience and benefit. Occasionally, however, canned foods prove unwholesome. This is due either to an accident or negligence in canning, or which is probably often the case, to improper handling after they reach the consumer. A few words upon the principle by which food is preserved by canning will make it plain why it keeps good after this process, and also explain the accidents to which it is liable, and the necessity of intelligent management of it on the part of the consumer. Decay is caused by vegetable and animal matter by the action of bacteria or germs. These are present everywhere, and of course, on all foods. In canning, the food is placed in the receptacle and subjected, for some time, to a considerable degree of heat. The heat destroys the bacteria, and before there is opportunity for any more to enter the can, the latter is soldered up, so as to be perfectly airtight. In cooling, the hot air within the can contracts and tends to produce a partial vacuum there. This causes the result of the can slightly to sink inward, and in this way is produced the almost unnoticeable concavity seen in the ends of all good cans. Occasionally, however, but very rarely, the process has not been sufficient to destroy all the germs, so that they will multiply inside the can after it is closed. In almost every such instance gas will be produced, which very often bulges out the ends of the can, rendering them slightly convex instead of slightly concave in outline. Any such can, of course, should at once be rejected, as its contents are almost certainly unwholesome. Again, it sometimes happens that food, particularly meats and fish may be partially decayed before being canned. When this accident happens, heat will not always remedy the defect. Bacteria produce a certain poison called ptomaines and, although heat will kill the bacteria, it will not destroy this poison. This is more difficult to be guarded against by the consumer than when bacteria are present. The chief resource is in one's nose. Any color upon opening the can, other than that appropriate to the food in question should at once cause its rejection. The process of canning, however, has now reached such perfection, and is conducted, generally, under such strict supervision that accidents occur but seldom.

AMUSEMENTS. Keeping in stride with the Board of Trade "BIGGER ST. JOHN - BETTER SHOWS"

Our Regular News Film is Immense. All on Account of a Batiana A Slippery Bit. GUESS! Is Francis Elliott One Person or Two? and foods should be eaten without undue delay after the can is opened. Any portion not eaten should not be kept over until the next meal or the next day, and served again. This is the chief reason why such goods are put up in so small packages. All such food should also be removed from the can the moment the latter is opened, and to use the can for heating its contents is to invite disaster. Although canned food is, as a rule, a wholesome product, it is now generally agreed that it is not quite equal in nutritive power to ordinary fresh food. In the process of preserving, it loses something, the nature of which is not, as yet, very well understood, which fresh food possesses, and which is essential to the best of health. It is hardly possible, therefore, to remain robust, if one lives entirely, or mainly, upon canned food. DR. G. G. MELVIN.
