

*The Montreal General Hospital* (175 beds) is situated within a few minutes' walk of the College, and is visited daily by two physicians and two surgeons, besides an ophthalmic surgeon. It affords equal advantages to students of all Medical Colleges for obtaining a practical knowledge in every department of Medicine and Surgery. A wing used as a Children's Hospital will also greatly assist students in the study of diseases of children. A special department for the treatment of diseases of the eye and ear under the care of the Ophthalmic Surgeon, affords students facilities for their study. The large number of out patients enables the physicians in attendance to impart instruction by selecting cases presenting variety of symptoms and points of comparison and contrast. Practice can be obtained in auscultation and other means of Physical Diagnosis. Clinical instruction is given daily, and all operations performed in the presence of the students. Regular Clinical Lectures open to students of this University are delivered during the winter, Dr. Roddick lecturing on Clinical Surgery and Dr. Ross on Clinical Medicine. In addition a Clinical lecture is given every Tuesday by Dr. Campbell, Dean of the Medical Faculty of Bishop's College.

*The Hotel Dieu Hospital* (200 beds) is within a short distance of Bishop's College, and is also open to the students of the latter. Attention is directed to the vast amount of Surgery to be seen in this Institution which is much greater than in any other Hospital in Canada. Clinical lectures in Surgery are delivered by Dr. Hingston and in Medicine by Dr. Guerin. Students of Bishop's College can attend these lectures.

*The Montreal Dispensary*, with a staff of six attending physicians and an oculist, has an average daily attendance of about forty-five patients. Being in close proximity to the manufacturing district of the city, it has a large number of minor accidents brought to it for attention, thus giving excellent opportunity for the practice of minor surgery—such as dressing wounds, bandaging, strapping, application of splints, &c. The student will have every facility afforded him for acquiring practical knowledge, by auscultation and percussion, of diseases of the chest, which forms a large portion of the cases seen here. A very large number of cases of diseases of the eye and ear are treated at this institution, and students will be practically taught the use of the ophthalmoscope, laryngoscope, etc. This department is under the charge of the Professor of Ophthalmology, etc., of Bishop's
