At the afternoon session Rev. B. B. Colpitts, Scott act inspector, submit-ted his report. Since last January I have had 119 prosocutions, 92 convic-tions and 27 dismissals. I have received for fines during this year \$2,-647, paid out in expenses \$1,675.05. I have retained my salary, \$350. I have pail into the hands of the secretarytreasurer \$529.16. In the early part of the year I got from the secretarytreasurer to pay certain expenses I have paid to the secretary-treasures for the use of the municipality. I have paid all charges and expenses with the exception of a small bill that the jailor may have for the board of Shepard, who was confined in jail a few weeks for non-payment of fines. I now have in my hands \$121.95. I hereby hand in my accounts made up in detail in two parts, one being from Jan. 1898 to June 1898, and number two from June 1898 to Jan. 1899.

Mr. Colpitts, on being heard, said that he was prepared to meet Dr. Atkinson face to face, only assing a little time to get one or two witne which he could do by tomorrow after-mon. He had nothing to fear from the public, and was ready to leave the matter in the council's hands. These charges were false.

The secretary-treasurer gave a statement concerning the financial condition of the county. The debit balance on the first of January was \$8,275. It had been somewhat reduced since. If parishes paid their debts the county would be about clear. In view of the financial condition of the county it was decided not to go to the expense of taking a valuation

Coun. Saunders, Jealing with the charges made by Dr. Atkinson against Colpitts, said the former was cited to be here and was not here. Mr. Colpitts was here with his witmesses, and would like to have the matter heard. He moved that the charges be dismissed and Mr. Colpitts

matter rests till the June session. The effort to undo the work of the council at the special meeting in August was then defeated.

THE PILING INDUSTRY.

A Cheverie, N. S., letter says that Capt. R. Pratt does a large trade in piling, and has spent over \$16,000 facilities for shipping it.

In the spring of 1897 he built a large wharf at his landing and purchased a doukey engine for the purpose of holsting the piling on board the vessels. Needing a warehouse near the wharf, he erected a fine building, 75 feet long, which he finished the same season, costing the cartain \$5.500 for the season of 1897. The spring of 1898 opened to find Capt. Pratt again at vork building a breakwater; also a steamer, which he completed about the last of July. The steamer cost \$8,650; the breakwater about \$2,000. making in all for the two seasons \$16,150. The steamer is used for towing purposes in connection with business and is a fine little boat. On account of the duliness in the piling market the captain has only shipped \$3 cargoes this season. He has on hand about \$5,000 worth of piling which he has to hold over until next season.

TACOMA, Washn., Jan. 14.-The British bark Andelina, 2,345 tons, of Nova Scotia, Captain G. W. Stailing. sank last night in 22 fathoms of water in front of the St. Paul mill wharf, and the captain, mate and fifteen of the crew were drowned. The vessel came here four days ago in ballas from Shanghai. The ballast had been discharged and the ship was ving at anchor waiting to be towed into the dock. Last night a terrific gale raged on the bay, the wind blowing 36 miles

Two great boom logs were placed beside the Andelina, one on each During the gale, between two and four this morning, one of the logs went adrift, causing the ship to careen and to capsize, with very little warning to the crew. The vessel was entirely without ballast and the hatches vere open. All on board were caught like rats in a trap and had no chance to escape. The ship simply careened over, the water flowed in the open hatches and she sank.

Captain Stailing lived in Annapolis, N. S., and leaves a widow and three children. He was well known in this

no wreckage has been discovered. As all on board perished, only surmises as to the cause of the disaster were obtained. Judging from indicafound was from the port side of the vessel. The ship, according to all ac-counts was headed in a southerly direction, or towards the head of the bay at the time the gale swept down the sound. The heavy wind caused the ship to strain on the chains, making the log on the weather side taut and giving a tendency to lift the log from the water, but the strain was great for one of the chains and it snapped. This released the towering craft from the greater restraint on the weather side, and she lifted with the wind, and there being little restraint from the other end of the log, raised it enough to allow the mooring chain to slip off. The ship freed from ballast and floating like a chip, careened un-der the pressure of the heavy gale, shipping great quantities of water, filling completely the hold and fore-castle, causing her to capsize and

There is a tendency on the part of parish collectors to keep back their final reports till a few days before meeting of council, which hampers the secretary and interferes with the audit.
