

D 28128

3.

Some men in this country more bent on destruction than construction.

High flyers in politics and finance.

Not confined to one province.

All serving special, not the public interests.

They may be a means to destroy their Party and their country. They will never be an instrument to save either.

Beware of these men.

What our times need are bridge-builders, not destroyers.

Need to build and not to blast.
