made from your milk supply. To do this you must **HAVE THE BEST MACHINERY**, and operate it scientifically. In making your plans for this season do not overlook the Cream Ripening proposition.

The Farrington Cream Ripener

is the machine that enables you to secure the maximum yield from your milk, and at the same time give it that fine aroma that is required to get the top price on a critical market. With this grade of butter you do not come into competition with "oleo" or "process." You will have and hold an exclusive market of your own. As we said at the start, **PLEASE CONSIDER.**

Anchor Wire Fence.
(PATENTED SEPT. 7, 1894.)

The strongest and best fence yet devised. Simply and easily constructed.

It is made throughout of No. 9 Plain Galvanized Wire, both horizontal wires and cross wires or uprights. The steel clamp securely fastens the horizontal and cross wire, thus consolidating the strength so that the whole fence resists an attack on any part of it. As the strength of a chain is gauged by the strength of its weakest link, so a fence is only as strong as its weakest part. The Anchor Fence is equally strong throughout, and being constructed wholly of large wires, is much stronger than a fence in which small wires are used.

BULL-STRONG!

....PIG-TIGHT....

An Illinois farmer said that after harvest he had fully 300 bushels of loose oats on the ground that he could not secure any benefit from, because the fence around the field would not turn hogs. Figure the loss for yourself. He also said, all this would have been saved if he had used the Kitzelman Woven Wire Colled Spring Fence, and the value would have gone a long way towards paying cost of the fence. With the Duplex Machine any farmer can make it himself at the actual cost of the wire. Catalogue free for the asking.
