**Monarch
Telephones
For Farm
Lines—**

You can always be sure of good service when you use Monarch telephones. They are provided with special features which make them especially well adapted to lines where there is no repair man. They are simple in construction and easy to maintain.

Build Your Own Line

It is easy to put up a line between your house, your neighbors and the town. Then you can keep in touch with the market conditions and sell when prices are high. You or your family can talk to neighbors at any time, and in case of emergency the telephone is especially valuable. When you want help to put out a fire—when you want a doctor or veterinary, or when the women are left alone and need protection—the value of the telephone cannot be over-estimated.

Our free book tells all about the construction of Monarch Telephones and how to start a line of your own. Don't wait for the other fellow to act. We will help you get your neighbors interested. All it will cost you is for one telephone and a part of the line material. We ship promptly from our Toronto stock. Mail postal for free book. Address

Standard Wire Fence

Here's the Fence
That is all Steel—

Steel wires, steel locks, steel posts. Standard Woven Wire Fence is all No. 9 hard steel wire, well galvanized. "The Tie That Binds" is hard, smooth steel, holds uprights and running wires absolutely secure without injury. Standard Patent Posts are 12 gauge steel, without angles, and so constructed that wires are held without Metal Gates of Galvanized Tubing. Our books are full of fence facts. "BAKER" Back Geared Pumping Mill

Years of practical demonstration have brought our Back Geared Mill up to a point as near perfection as possible, not only in strength and mechanical construction, but in details, every item has been watched under various conditions of the mill in service and changes made with a view of improvement to the mill in mechanical principles, durability, efficiency for heavy work and self government, as well as to maintain simplicity of design and convenience of adjustment.

The mill will turn itself out of gear at a maximum speed or when wind is strong.

The correct mechanical principle of carrying the wheel on the independent steel spindle, permits the ball-bearing "BAKER" mills to pump in the lightest wind. The gears are free from all weight and resistance and work free and easy.

Parts subject to the greatest strain and wear are made to provide for these conditions. The entire mill is constructed with a view of giving long service. All gears are machine-moulded from cut patterns.
