Two Dollars a Year.

False Stories Have Been Circulated verstone. They have got their sluice Stock-There is Plenty of Money in the Treasury of the Company.

It is learned on the best authority that the hasty departure of Manager Mulholland, of the Deer Park, to Toronto several days ago was caused by a very important change lately in the condition of the mine. Mr. Mulholland refused to reveal the object of his journey, to the east, and Roy Clarke, the engineer of the company, is also very re- company's property has been let. The ticient on the subject. The foreman of terms of the agreement call for the sinkthe Deer Park not only refused to allow | ing of the shaft which is now down 75 a MINER reporter to go down the mine feet, either 25 or 50 feet farther. The but declines to discuss the present con- ledge is also to be crosscut for a distance

It is said | The treasury stock of the new company that he expressed himself freely as to selling in Toronto for five cents. the favorable impression he had gained by the examination. He approved of the present method of developit would be judicious to continue sinking the shaft from the 300-foot level. there need be no further delay in following and developing the bodies of pay ore already exposed at the 100., 150. and 200-levels. It is also said that the ore shown in the cro scuts at these levels has caused Mr. Tregear to state that he is confident that they are permanent; that there is nothing to lead him to suppose that values will diminish with depth, and that the nature of the ore is such that the smelters will be glad, because of its fluxing qualities, to quote a treatment rate of as low as a dollar or

This is undoubtedly the cause of the steam drills being lately started in the crosscuts. They are now being operated in the ore chutes there exposed, and, made in that property. Yesterday at a judging from the character of the ore depth of 140 feet a foot of ore was encoming to the surface, are working in countered. It is of a shipping grade.

to the ton.

Toronto was the signal for all sorts of value at present. dark rumors. One story is that the company is out of funds. Another is that the values in the ore bodies have to some extent given out. These stories have been mysteriously given out to all the local brokers, and have had the effect of bearing the stock to a point lower than it has been for the past six months. This is the second determined effort that has been made to bear the stock since Mr. Treager first examined the mine. The movement is felt in Toronto as well as Rossland, but there is small probability of the price remaining down much longer. Some big blocks of Deer Park have been quietly picked up in the last few days at figures ranging from 16 to 17 cents.

As to the report that the Deer Park company is out of funds, it may be stated shares at 20 cents net. Since then they estimated that, what was in the treasury Deer Park company has about \$9,000 on uand at this writing.

PLACER LOCATIONS. Three Have Been Made on Little

Sheep Creek.

Ever since the Trail creek camp was discovered there has been more or less attempt at placer mining. For the most perity as was never before known in the rather meagre. Some work has been John A. Manly last night. "The advent done on Little Sheep creek, and at times of the Merchante' Bank of Halifax puts

enormous value of \$25,000 per ton. Free gold is literally peppered over some of the samples which have been brought to Drills Are Now Opening the Big Ore town. Mr. Tange thinks that where there is so much fine float there must be considerable placer gold scattered along bed rock in the bar which he is working. He has located three bar claims along the creek, under the name of the Zero

Mining company. His partners in the company are C. W. Cluett and Sam Sil-For the Purpose of Bearing the boxes ready and are planning to carry on work all winter. Thus far, what little work has been done has shown considerable free gold carried in quartz, and evidently washed from the neighboring leads up O. K. mountain. The result of the work at bedrock on the bar is awaited with more that usual interest, for it may possibly prove that the placer workings along Little Sheep creek may contain valuable deposits.

Resumed Work on the Silver Bell. of 20 feet at the 100-foot or the 125-foot of those that are now shipping. Ap-It was ascertained yesterday, how- level. Private communications yester- pended is the summary of the week:

The Mountain Chief. Mike Burns, foreman of the Golden but suggested that while Gate company, owning the Mountain Chief mine on Dog creek, has arrived in town with samples of ore recently taken from the property. The shaft is now down about 30 feet and the vein, so far as it is exposed, looks remarkably well. The shaft will be continued to the 100foot level, and it is expected that ore shipments to the smelter will shortly be commenced and continued all winter. A pack train has been sent to the mine to bring the ore down to the lake side. Since Mr. Burns took charge of the mine its value has greatly improved, and work is progressing very satisfactorily.

Found a Foot of Ore. The management of the Lily May is feeling jubilant over a find that has been When this ore was first discovered it Mr. Tregear was called up over the was simply a stringer and has widened
