"Mount Pearl Turnip Greens."

Since the canning of Food Products has been commercialized, it is a daily occurrence to eat fruits and vegetables grown 10,000 miles away from Newfoundland; now for the first time one of our local Newfoundland vegetables has been canned, and

During the past summer about 10,000 lbs. of Turnip Greens were packed in the factory of the UNITED CAN MANUFAC-TURING CO., LTD., under expert workmen and thoroughly sanitary conditions. These Turnip Tops were purchased mostly from farmers in the Mount Pearl district and are now on the market under the name of "Mount Pearl Turnip Greens." It took 41/2 lbs. of fresh turnip greens to fill each can, and as the retail price is 35c., they come really cheaper than early spring greens, in addition to which they are already thoroughly cleandd and only have to be heated to be ready for the table.

Those who have already tried some speak very highly of them, and a brisk sale is expected by the following grocers who

Young Preacher Dies.

BODY SENT HOME FOR BURIAL.

News reached the city yesterday conveying the sad information of the death of Rev. W. S. Howell, son of the late George William Howell and Mrs. Hewell of Carbonear which took place at Bayestown, N.B., from Meningitis of the brain. The deceased was a member of the Newfoundland Conference for four years, most of his work being in Twillingate District. In 1919 he entered Mount Allison University where he won high honor as a student and scholar. His studies became interrupted owing to serious illness, and since last September he had been confined to his room. The late Mr. Howell had a brilliant and useful career before him ,but Providence ruled otherwise and he enrives when ten cigarettes can be had tered into Eternal rest. He is sur-Walsh, Principal of the for a nickel, then may it truly be said vived by his mother, two sisters, two prothers, who mourn their sad loss Mr. Frank Howell agent for Harvey

C. C. C. Band.

POPULAR INSTRUCTOR RESIGNS

It is learned that Capt. Arthur Bulhas tendered his resignation from the C.C.C. Band. Mr. Bulley has been a member of the band for the past 23 years and since 1919 he has been in charge: It was due to Mr. Bulley's untiring energy that the band has been brought to such a high state of efficency. It was through his efforts that the C.C.C. Hall, formerly owned by the Mechanics Society, has been acquired. He labored incessantly to reduce the debt on the building, and now that his aims have been accomplished he retires. General regret will be expressed at his retirement.

Sunday Issues Create Newsprint Demand.

AVERAGE SIZE OF DAILIES LAR-MORE PAPER MACHINES.

(Financial Post.) Montreal.-Some idea of the causes inderlying the huge demand for newsprint from the United States may be gathered from the fact that there are between sixty and seventy newspapers in the United States with a circulation exceeding 100,000 copies each. During the first ten months of 1920 these dailies averaged twentythree pages, during the same period of 1921 twenty-two pages and during the first ten months of 1922, the average was twenty-five pages or three each more than in 1921 and two more than in 1920. The Sunday issues of these papers averaged 78 pages in 1920, 79 in 1921 and 88 pages in 1922, an increase of ten pages in each case over 1920.

The volume of newspaper advertising in the leading cities up to October 31, was about 8 per cent, more this year than last, but about 6 per cent. less than during the same period of 1920. It is expected, however, that the volume during November and December will be found to exceed the total for 1920. It is thus seen that the great demand for newsprint has been rather from the increase in the number of pages and the great use of features amongst the newspapers, than in an increase in adverising. Indications are for a very arge volume of newspaper advertising next year, says the "Fourth Estate," a newspaper publication.

According to a compilation of the Curtis Publishing Co., advertising in seventy-two weekly and monthly magazines in 1921 exceeded \$95,000,-000 for the space value while the estimates of the Bureau of Advertising of the A. M. P. A. are that the total value of newspaper advertising for 1921 was \$650,000,000, of which \$180,-000,000 was national advertising and \$470,000,000 local advertising.

A large number of newspaper making machines will have come into operation by the middle of next year and bring the capacity of the newsprint mills in the United States up o 5,110 tons daily and Canada up to 4,160, making a total of over 9,270 ons a day.

In a recent article in these columns the statement was made that the average of imports of newsprint during the seven months ending with September of this year was only about half what it had been from August, 1921, to February, 1922, 7,500 tons as against 14,500 tons. The total imports of newsprint from Europe amounted to 250,000 tons from September 1, 1920, to the end of September of this year, that is for the two years. The former date was the month during which the first Gerone was observed to crawl alongside man paper arrived in the United Crab Feeds His Pals. the body of the crab and literally take States. Of this total, 80,000 tons with impunity a piece of food from between the crabs jaws and bolt it— Sweden, 44,000 from Finland, 32,000 an action tolerated by the worm's land from Norway and 7,000 from other European sources. The average for the entire twenty-five months has been about 10,000 a month.

A simple ceremony in a London cemetery recently drew attention to the fact that the authors of two of the most popular works in the world are buried in Bunhill Fields.

These authors, whose works have been more widely read than any ed to any address on receipt of 10c. books produced since the birth of English literature, are John Bunyan, the immortal dreamer of "The Pilgrim's Progress," and Daniel Defoe, creator of "Robinson Crusoe," dear to the heart of boyhood the world over. The ceremony, which has revived interest in the literary and other as-

sociations which cluster about Bunhill Fields, the historic burial ground of English Nonconformists, was the dedication of the restored monument to John Bunyan. This little cemetery, long closed for purpose of burial, but maintained as a public sanctuary, contains the dust of a greater number of notabilities than any other burial-place in England with the sole exception of Westminis-

Defoe is buried only a few yards from Bunyan.
