DREDGE BOSTON HARBOR FOR COAL

Thousands of Tons Left by Sunken Barges.

THIS IS NO CAPTAIN KIDD YARN

The Precious Black Diamonds Are Really There and Canale Fished Out

Boston, Mass., Sept. 29. - The demand for coal in "The Hub" has become so urgent that all kinds of suggestions are forthcoming for procuring a supply, and along the south shore, where many of the residents have in times past obtained enough coal for a winter's burning after the wreck of a coal laden barge or schooner, the possibility of extending operations in this direction is now being considered. If the coal strike is not settled and the price of coal still soars, it seems probable that attempts may be made to locate some of the coal depots | Starting With Reactionary Storms of

the coal. Large quantities are said to lie between Minot's Light and Boston Light, and it is believed by many people in Hull that it would be a profitable undertaking in the present coal situation for someone to go searching for ing eastwardly over the country, New

in Boston Harlor and to dredge for

this. Much of it is soft coal.

Meanwhile the citizens of Hull contemplate with less foreboding than any of their neighbors the fuel question for this winter. Though not a ton of anthracite coal is for sale in Hull, the cold gales from the northwest, with citizens know that they have a coal mine at their very feet and that their winter's coal can be had for the ga-

GREAT MINE OF COAL. The ocean bed lying between Boston Light and Minot's Light, in the vicinlty of Harding's Ledges and Toddy Rock, out beyond Hull Gut, and off the Nantasket shore, is one great mine of coal, and if some means could be derised by which this coal could be raised and brought ashore there would be fuel and to spare; enough to supply every furnace and store in Greater boston for the winter. This may sound like a Captain Kidd tions. Snow with heavy sleet are en-

story, or like a dream of the Arabian Nights, but it is a solid fact, and there are many who will vouch for its truth. The heaps of black rock thus ming-ling with the mud or with the yellow sands at the bottom of Boston harbor were dumped there when some coal laden boat went to pieces in a storm or collision, or sank with its freight, and was afterwards washed to pieces by the action of the tides.

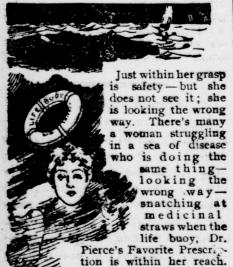

One old Boston pilot, who has watched the wrecks off shore for a halfcentury, asserts that not merely thousands, but tens of thousands of tons of coal He burned around and just

Hundreds of tons of this coal have, 20th, is within the Venus period, with from time to time, been washed ashore moon on the celestial equator on the on the beach at Hull. Point Allerton, and the leth, and at perigee and greatest north places have stories to tell of times when the entire beach along this section was covered 'winrows" of shining black pebbles, which when picked up proved to be coal.

In the flerce storm a few years age which wrecked the ill-fated steamer Portland nearly five thousands tons of coal were sunk off Toddy Rock alone. Two barges of the Consolidation Coal Company, in tow of the Cumberland, went to pieces on Toddy Rock and became total wrecks, their freight dropping like lead to the bottom of the period. ocean when their hulls broke up. The Abel B. Babcock, a four-masted schooner heavily loaded with coal, also went to pieces.

BLACKENS THE WATER. When the Consolidation barges broke ap a stream of black water, coal stain ed, was seen to stretch from Toddy Rock to Hull Gut and beyond, and it is believed by the sea-wise of Nantasket that this black stream swept the coal from the barges along through Hull Gut and deposited it beyond in eight or ten fathoms of water.

There is probably lies still. Much of undoubtedly, has been buried under the sand by the constant action of the undertow. But it lies there, a mine of gold for the man who is clever enough to devise some means of getting at it. But Toddy Rock was not the only spot where the vessels foundered in that terribe storm, which stands on record as the most fatal one that has visited this coast in years. Twenty-

Many a woman has testi-"I know I should not be alive to-day but for Dr. Pierce's Favorite Prescription." This famous medicine establishes regularity, dries weakening drains, heals inflammation and ulceration, and cures female weak-

Weak and sick women, especially those suffering from diseases of long standing, are invited to consult Dr. Pierce, by letter, free. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

f all take pleasure in writing to let you know the great good I received from your 'Favorite Prescription' and your 'Pleasant Pellets.' says Mrs. Nora Gaddie, of Rio, Hart Co., Ky. "I Mrs. Nora Gaddie, of Rio, Hart Co., Ky. "I took seven or eight bettles of 'Pavorite Prescription' and one or two viais of the 'Pellets.' Think I would have been in my grave had it not been for your medicines. It has been about four months since I took the medicine. I was all run down, had loss of apposite, could not sleep at night, was nervous, had backache, black spots on my limbs, and sick headache all the time. I have not had sick headache since I took-your medicine."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women. as you can for a quarter. I am a gambler and want action on my money.

If it is only 25 cents." Dr. Pierce's Pleasant Pellets cure dis-

seven lives were lost in it within 45 miles around Boston. The Calvin S. Baker, loaded with soft coal, went to pieces on the light-house bar, under the very shadow of Boston Light. The Bessie H. Gross, a two-masted schooner, stranded on Nantasket Beach,

Three barges in tow of the tugboat Underwriter went to the bottom near Minot's Light, and two or three schooners, the wreckage from which later came ashore on Nantasket, also foun-

was of good value, and so a good deal of coal was suffered to lie where it was.

Then it gradually washed back. But

THE WEATHER IN OCTOBER

Rev. I. Hicks' Forecasts for the

Coming Month.

Rain-Vulcan Period a Feature.

St. Louis, Mo., Sept. 27 .- According

to Rev. Ira Hicks, "October will begin

with reactionary storms of rain, pass-

moon on the 1st will cause higher tem-

perature, with electrical storms, high

tides and probably seismic disturb-

rising barometer, will follow quickly.

"During the Vulcan storm period,

4th to 9th, the weather will grow de-

cidedly warmer, beginning in western

points and moving eastward; the bar-

ometer will fall at the same time, and

cloudiness and rain will follow, touch-

ing most parts of the country in their

eastward progress about Sunday, the

5th, to Wednesday, the 9th. Storms

of this period promise to be general

and severe, with great probability of

wintry aspects in all northern direc-

tirely probable, tollowed by high bar-

"The Mercury period is central on

the 10th, and continues to the 16th, and this fact, blended with others, will

cause unsettled, stormy weather, per-

haps, outside of the regular periods.

Much cloudiness, with drizzle and

sleet, are results to be expected dur-

snow storms of increased extent and

energy will be natural on and touch-

"A rise in temperature and rain and

The Vulcan storm period, central

"Without the least desire to be sen-

sational, we will say that severe and

dangerous autumnal storms and tides

are very probable at this period.

Storms over the great lake region and

along the North Atlantic promise to

endanger shipping and life. Even the

gulf regions will not be exempt from

notable perturbations. Rain snow and

sleet will visit most interior sections,

and a big October cold wave and very

high barometer will wind up the

"Such are the probabilities, not the

absolute certainties. All concerned

should be on the lookout for indica-

tions, as no violent atmospheric or

other disturbances come as a rule

without plain and timely warnings. If

an excess of storms and rough weather

fail to materialize at this time look

for unseasonable warm weather, with

many seismic phenomena and unusual

perturbations of the ocean tides. The

fact to be emphasized is that normalcy

will not be the rule; the astronomic

condition indicates one extreme or the

other. Our belief is that very heavy

autumnal storms will result, followed by sufficiently cold weather to damage and destroy exposed, perishable com-

"Reaction to much warmer weather,

with falling barometer and more rain,

turning to snow northward, will be

natural results on and touching the

23rd and 24th. All these October periods

will end in more or less storminess,

with stiff cold gales over the great

lakes and the northwest generally. By

the middle of the month the boreal

waves and frosts will reach quite to

"The last five days of the month are

covered by a regular storm period. The

indications are that storms tropical

in kind, with thunder and rain south-

ward, will come during the first de-

velopments of this period. But as the

rising barometic area from the north-

west impinges on the low barometer

TRICK BEAR WHIPS

THE BIG GRIZZLY

And these were only the coal laden boats. "Thousands of tons of coal were The vicious Little Cinnamon Was washed upon the beach after this Turned Into the Cage to Prestorm," said Frank James. "Much of this was picked up, but the wreckage that washed ashore at the same time vent His Escape.

> New York, Sept. 28 .- Nearly a thousand people cheered while Garibaldi, a 450-pound cinnamon bear, fought to a standstill a grizzly bear called Rocky, weighing 960 pounds, in the Central Park Zoo yesterday afternoon. The battle was fought on the cliff in the bear cage, and both animals were badly used up.

Garibaldi is a trained bear, and this fact is probably responsible for the defeat of his heavier rival. He was presented to the zoo a week ago by Joseph Sareix, a wandering Italian showman, who told Mr. Smith, the director, that Garibaldi was becoming so ugly he was afraid to keep him longer. Sareix said the bear had been trained for several years, knew all the tricks of wrestling and was exception-

ally strong. Rocky has been in the zoo for some time and has been master of the bear He is an ugly-looking brute, and has always been considered dan-gerous. The director caused the new bear to be put in a wooden cage. Yesterday morning when Snyder, the keeper, went to feed the cinnamon he ances on and touching that date, but discovered that the bear had gnawed a large hole through the cage, and that it would only be a question of a few hours when the bear would escape. Snyder reported the matter at once to Mr. Smith, and after a consultation it was decided to put Garibaldi in the big bear cage.

> GRIZZLY. A big traveling cage with iron bars A big traveling cage with the wooden cage, was backed against the wooden cage, and Garibaldi was coaxed into it. word had spread through the park that there was liable to be a bear fight, and a big crowd gathered. The crowd was kept at a distance by a roped line. When all was ready the iron cage was

carted up at the top of the hill and Garibaldi was admitted to the big bear Rocky recognized a foe at once. The cinnamen was no sooner inside than the grizzly began to climb the cliff, growling and snapping and clashing his paws against the rocks. The cinnamon waited for the grizzly to ap-proach the top of the cliff, then sudlenly dealt the big fellow a blow on the head and the fight was on.

When the battle opened there were nearly a thousand people surrounding the bear cage. Men yelled and cheered the little bear, and women cried as blow after blow was struck and the bears clinched.

Garibaldi had the advantage of pocinnamon would worm his way out. and rain blows on Rocky with telling effect. The battle seemed for all the world like a contest between a light. depended on his strength to win. Garibaldi had the advantage of the tricks he learned from his Italian master. TRICKS AIDED THE SMALLER

BEAR. For twenty minutes the battle was continued. Several times the cinnamon lay lown as if dead or exhausted, and when the grizzly sprang at him to clinch, Garibaldi jumped to one side, at the same time dealing a staggering

blow to Rocky. Finally the grizzly was seen to give signs of retreat, and slowly backed away down the cliff, the cinnamon following him closely. Rocky went into a corner and lay down exhausted. His adversary, after watching him a few moments, also fell over from sheer exhaustion. The fight was over, and the crowd cheered. The keepers said that during the night the bears would probably fight to a finish, but the grizzly evidently had enough. The animals sought opposite corners to sleep in, and the wise ones in bear lore say they will be good friends when the wounds

offer anything like advantageous terms Newfoundland would favor confedera-

This was the answer made by Rev. L. Curtis, M.A., superintendent of Methodist schools in Newfoundland, when asked how his fellow-colonists felt on the question of entering the Dominion. Rev. Mr. Curtis said further that the question had not been thrashed out on party lines, and is not a burning issue at present.
"Indeed, it has never but once been

pronounced upon definitely," he added, "since the vote was taken upon it at the time the Canadian confederation was formed in 1867, when the proposal was overwhelmingly defeated.
"But, even although Mr. Bond is now

in Washington negotiating for a reci-procity treaty with the United States, on the lines of the Bond-Blaine con-vention, of Canada would make a reasonable offer, I believe the Government of Newfoundland would submit the question of confederation to a popular vote. Yes, I believe it would get a fair trial next time, because in these days of enlightenment it would not be attempted to carry on a campaign of misrepresentation such as we had

BOTTLED IN EVERY CLIME

10,000 Fleas Meet in World's Congress.

Collection Is Unique in the Annals of Human Research.

London, Sept. 29 .- The safe arrival of the whaler Forget Me Not, at Sydney, Cape Breton, and the report that her captain had been intrusted with the task of obtaining specimens of arctle fleas for Mr. Charles Rothschild, suggested a visit to Tring Park, where thousands upon thousands of fleas are kept in Mr. Rothschild's famous zoo logical museum. I found Dr. Jordan in charge of the museum. He showed me around. There were cabinets con-tainging fleas of all forms and sizes, from nearly every corner of the world. They numbered 10,000 and more. "Every mammal and bird has its particular kind of flea," said the doctor. Very many have several different kinds. Thus it appears that the cat flea is different from the dog flea, the dog flea from the sparrow flea, and each in turn different from the pulex irritans, the scientist's pet name for the

"So you can see," observed Dr. Jor-dan, "that the flea affords more diverse, material for the collector than does any other living creature." He then produced some of the gems of his collec-

One, the mole flea, is the largest specimen known. He is one-fifth of an inch in length and is nicknamed scientists the Hystrichopsylla talpae Another, the most injurious of all fleas is known as the Chigoe or sand flea Still another is a flea with claws like those of a lobster, which is found on a small South American bird.

Mr. Rothschild collects his fleas vicariously, through agents. Whenever any expedition is about to start for a protracted journey to a foreign land he engages one of the party to collect specimens of fleas from every species f mammal or bird that is encountered. He supplies phials, chloroform and sition at the start, but the grizzly labels, and the specimens reach Tring forced his way up until it seemed as if Rocky would hug the life out of his smaller adversary, but every time the They are then classified hermetically They are then classified hermetically sealed and packed away with 10,000 of their mummified brothers.

The specimen in the collection com ing from the point nearest to either pole is a flea from the Kerguelen Islands, in the Antarctic; but Mr. Rothschild desires to have fleas from the blue fox. the polar bear, the Esquimau dog and other arctic animals. So it came about that the captain of the Forget Me Not received his commission to hunt for

Where Wood Engraving Originated. Much controversy was at one time excited about the country that could claim to have originated wood engraving. A very simple process was known to the Egyptians for the production of stamps, and it has been asserted that the Chinese printed from blocks of pear tree as early as the tenth century. The independent origination of the art has been generally credited to Germany among modern nations. In the Cologne district a St. Christopher, which has often been reproduced, was cut in 1423, a St. Sebastian in 1437, and a Madonna has been dated 1418. Playing cards wer however, in use in France in the mic dle of the fourteenth century, and th impressions were from wood blocks. It is allowable for France to dispute the priority of Germany, and many attempts have been made to claim the art as due to French enterprise. M. Henri Bourchot, of the Bibliotheque-Nationale, now declares that a part of a block with a representation of a cru-cifixion has been discovered in a country town of France. The costumes are evidently those worn in the middle of the fourteenth century, and it is assumed that the wood block belongs to some time between 1340 and 1350.—Scientific
