

THE VILLAGE OF NORWOOD

IN THE COUNTY OF PETERBORO, ON THE C.P.R.

A Thriving Place—Its Extensive Fish Factory—Fine Homes—Manufacturing—Restaurants, Schools, Etc.—and a Watering Place for Business Men.

The village of Norwood was very little known to the outside world until after the building of the Ontario and Quebec branch of the Canadian Pacific Railway. It then became a station on the line, and many supposed it sprang up then and was named after Henry Ward Beecher's novel. Such, however, is not the case, as it was a flourishing village before the building of the railway was contemplated.

From the railway station the village is hidden from view by an intervening ridge, from the summit of which it presents an appearance of some attractive and picturesque. The village has a substantial and modern appearance, nearly all the business places having plate glass fronts; and its handsome, modern residences ranging in value from \$2000 to \$10,000 indicate the comfortable financial position of many of the residents.

The high and public school house is a fine two-story brick building with tower, and 6 teachers are employed, 3 being in the high school and five in the public and model. The equipment is good and the school stands well. In connection with the school house are 45 acres of ground, the first part being artificially laid out and well kept.

The churches are five in number, the Presbyterian, Methodist, Baptist, English church and St. C. The Presbyterian is a handsome white brick building with steeple at a cost of \$18,000. The Methodist contemplates building a new church. The English church is brick and the R. C. stone. Rev. Mr. C. Michael is pastor of the Presbyterian, Rev. Mr. Clark of the Methodist, Rev. W. F. Peck of the Baptist, G. Gibson of the English, and Father Conley of the R. C.

A weekly newspaper and The Norwood Register is published here by J. A. Harper. There is a Mechanics Institute with library of 1500 vols., and a reading room. It is headquarters for the East Riding of Peterboro Agricultural Society, and annual fairs are held twice a year, and which are unequalled successes. The buildings and grounds are in every way adapted for the purpose. The section is noted for its stock and dairying. Five cheese factories are in the immediate vicinity, and the country is dotted all over with them.

There is a village brass band and the usual societies flourish. It might be noted that there is a great abundance of hardwood and cedar in the neighborhood, and the place affords a splendid opening for factories, such as a pulp and saw factory, or any other wood-working industry. As protection against fire there is a good fire engine and other appliances.

A. S. Macdonald & Co., Bankers and Real Estate Agents, transact banking business of every description. Mr. Fitz-Gibbon was with the Merchants' Bank 15 years previous to opening this bank here.

Mr. J. C. McEwen is one of the progressive and successful merchants, and deals in shelf and heavy hardware, paints and oils and all the goods generally found in a large and well furnished hardware store. The premises were built by Mr. McEwen especially for the business, and the store is all used for the business, well fitted up and with a plate glass front. His residence ranks among those in the village worthy of special mention.

John Herring manufactures carriages of all kinds, wagons, cutters and sleighs, doing all the work complete. His woodwork shop, blacksmith shop and paint shop furnish all facilities for general jobbing. Horse-shoeing is also done on the most advanced principle. Mr. Herring has been 5 years in the business and his work has a wide reputation both for durability and superior finish.

kind in the province. Like many other industries it was started on a small scale 22 years ago with 6 hands, and through the energy and enterprise of Mr. Finch, has attained to its present large proportions. The buildings are brick and frame, the main building being 220 x 35, and two other buildings, one 100 feet long and the other 150 x 90 feet, the whole having about 50,000 feet of flooring. All are steam heated and furnished with the best modern machinery. An 80 horse power engine drives the works. The produce are hams and carriage makers' best goods, and the timber used is oak and rock elm and second growth pine. 300,000 hams are manufactured during the season, 9000 sets being furnished and the balance for export. This is independent of the best stuff. At the present time they are putting out 2000 hams a day for patent hams. Mr. Finch is master of the village and a valuable citizen.

Bressan House. O. A. Bressan, proprietor, was established by the father of the present proprietor, and has always enjoyed the reputation of being a first-class commercial house. It has 20 airy bedrooms, parlors, sitting rooms and three large sample rooms. There is a balcony in front and the interior of the house is all tastefully fitted up. There is also a billiard room in connection with seven good roadsters and rigs of all kinds.
