roal systems." The idea was expressed that the method by which it is appointed is the best that could be devised to secure the high-sede the one which is moved by steam, but that the trolley system, applied to single that the trolley system, applied to single cars, will prove the most economical and satisfactory mode of operating on lines twenty or twenty-five miles long. He thinks the cars will be long ones, something like the sleeping car, and that a single fifty horse-power motor will be sufficient in most cases, though to insure safety and have motors of that size may be used, one at each end of the vehicle. The wheels of the ear may be increased to give greater of the ear may be increased to give greater the test that could be devised to secure the high-best that the united States. What the method by which it is appointed is the best that could be devised to secure the high-best that the united States. What the method by which it is appointed is the best that could be devised to secure the high-best that the united States. What the method by which it is appointed is the best that could be devised to secure the high-best that the united States. What the method by which it is appointed is the best that could be devised to secure the high-best that the united States. What and the united States with the will all that the united States. What the wind have the merits of the act it should be ever the merits of the act if shoul whole expense was to be met out of the country from the selection of that gins may be used, one at each end of the craim plantification of the car may be increased by the purse and would probably have any be interested to the craim of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the car may be increased by the present of the train of the three present of the present of

tem where both currents are run in or near the ground there is great loss of power, the ground forming a partial connection between em. There is no practicable way as yet of nguring closely on the expense of electric as compared with steam locomotion, but it will be small under ordinary conditions. The desired economy is to be obtained by an inerease of the potential used. The higher the provisions of the modus vivendi is a sound potential the greater is the distance through which it can be sent successfully, and this tags is of separal value to the sent successfully and the services of the sent successfully and th fact is of especial value in dealing with hibit sealing therein does not lie in the hands long-distance transportation. It is probable of any Government, it is but right that those of any Government of the control of the cont

percessitate a radical change and render a part of the equipment useless. But the change is bound to come, and probably before long. Its advantages are too great to methods of transportation will be adopted by new companies for the construction and operation of new lines, and when these have demonstrated the cheapness as well—as greater convenience of electric transit to lines will be forced to revolutionize their systems or fall back beaten in the race for public patronage. Perhaps ere the close of this century the revolution will be well under way.

The Osborne Case.

No humane mind can ender a part of the equipment useless. But the change is bound to come, and probably be to confiscated and the captains and crews thrown in prison. Every circumstance of indignity in prison. Every circumstance of indignity in prison. Every circumstance of indignity of the construction and the value of the transportation will be adopted by new companies for the construction and operation of new lines, and when these have demonstrated the cheapness as well—as greater convenience of electric transit the loss occasioned to the loss occasioned to the loss occasioned to the sponsible for the loss occasioned to the sponsible for

is blind. She is not or should not be cognizant of birth, breeding, beauty or riches. She can not or should not weigh the moral value or severity of a sentence. If a college professor and a coal-heaver burglary, the delicacy of the burglary, the delicacy of the mental faculties of the one cannot be weigh-

ness of the other, if the guilt is equal the punishment should be equal. Indeed the mental equipment and lack of exigent in-

recent inventions and discoveries of . Elihu Thomson of Lynn will go far ards revolutionizing the many government, it is our right that those who were put to loss by such exclusion should be compensated. Lord Salisbury has strengthtowards revolutionizing the present opin-lons of electricians in regard to high potentials. His experimental apparatus will making to the American authorities that by making the special speci mating to the American authorities that by the time the question is settled there will be should avail themselves of this grand opportunity of the mere exclusion from the opportunity of the mere exclusion from the

The Osborne Case.

No humane mind can contemplate the case of Mrs. Osborne without profound pity. Indeed, similar feelings are excited in any case where an offender draws on his or her head punishment greater than is in the power of mortal judge to impose. While this is true, transgression must be punished and justice is blind. She is not or should not be cognizant of birth, breeding, beauty or riches. She can not or should not weigh the moral value or severity of a sentence. If, a
