### RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat; red hot days and sweltering nights, is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on her guard to prevent these troubles, or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come suddenly will banish it. The Tablets are sold by medicine dealers or by mail at 25c cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

John Jervis, Forest, has been appointed processor for the Strathroy Canning Factory.

### GREAT PEACH SHORTAGE

Disease Has Ravished Orchards in Niagara District.

Cheap and Effective Home-made Remedies to Combat the Fly Nuisance—Special Care Required in Case of Dairy Cattle—Care Must Be Taken to Prevent Sun-Scald of Pigs During the Hot Weather—Prevention and Treatment Explained by Expert.

(Contributed by Ontario Department of Agriculture, Toronto.)

NO fruit tree disease this year has been so conspicuous and so injurious as the Leaf Curl of Peaches. In early June more than half of the peach orchards between Beamsville and St. Catharines and many orchards in other localities were so badly affected that almost every leaf was distorted, swollen and turning a brownish color. Most of these trees will not enter winter nearly so healthy nor bear so large a crop next year as if they had not been attacked by the Leaf Curl.

#### Control.

This year's experience, though a hard one, will doubtless be of much value to the fruit grower, for it has shown as perhaps seldom before the great importance of early spraying of peaches to prevent Leaf Curl. By early we mean before the leaf buds have begun to swell. Sometimes late spraying, that is spraying after the buds have begun to swell, will control the disease, but it will only do so where the wet weather does not come until after the spraying. A single day's rain would not of course be sufficient to start the disease. It takes several days of moist weather. There is good evidence that even fall spraying after the leaves have dropped will also control it.

The best mixture to use is lime-sulphur about 1 gallon to 7 gallons of water. Soluble sulphur 12 1/2 pounds to 40 gallons of water will also control the disease, but is not so popular with the growers as the lime-sulphur.—L. Caesar, B.S.A., O. A. College, Guelph.

#### Fly Remedies.

The fly, like the poor, is always with us in summer-time. In spite of many campaigns having for their slogan, "Swat the fly," he is still with us, and likely to be until the end of time.

Flies are a terrible nuisance in the home, in the dairy and in the stable. They torment the very life out of cows. It is strange that man with all his inventive genius, has not yet been able to overcome his agile enemy, the fly.

Up to the present, no very satisfactory remedy for cow-flies has been worked out. The most we can do is to apply something which keeps them off the cows for a time. The number of fly remedies is legion. There are several very good patent remedies.

A good home-made mixture consists of two quarts of fish-oil or any kind of cheap oil or grease, one-half pint coal-oil, and four tablespoonfuls of crude carbolic acid, thoroughly mixed and applied to all parts of the

cow except under and webs, by means of a cloth or brush. This quantity will coat twenty-five cows, and unless there be rain soon after applying, one coating will last a week. (Leave out the coal-oil for calves.)

Lighter mixtures, containing creosol, zenoleum, etc., may be sprayed on daily. If done before milking, great care is needed, else the milk will become tainted.—Prof. H. H. Dean, O. A. College, Guelph.

#### "Protecting Pigs From Sunscald."

Now that the hot summer weather has come those who own light colored pigs are beginning to complain of sunburn or sunscald. This condition of the hide of the animal is similar to that of people; it gives the same degree of uncomfortableness to the pig and is caused in the same manner. Consequently, the same method of prevention and treatment may be carried out.

In the first place, "an ounce of prevention is worth a pound of cure," and the prevention is shelter. No matter what kind of stock is in the pasture, shade is essential, and much more so is it for pigs on account of the thin coating of hair on their bodies. If the pasture for pigs is so situated that there are no trees to afford shade to the animals it would be just as well to keep them shut up during the hottest parts of the day and allow them to run out during the evening, night and early morning hours. By keeping them in a pen that is somewhat darkened, they miss both the hot rays of the sun and the flies that are always so bad around a stable of any kind, during the hot weather.

Some people provide a "hog wallow" in their pasture which is a very good thing, but the location should be some place in the shade, as it is a well-known fact that the hide will blister far quicker when wet than when dry. A pig seems to think that a wallow is an essential thing, and if he persuades the farmer into thinking the same, the farmer should lead him to believe that during the heat of the day it is the best time to keep out of it.

If the pigs have become sunburned at all, it is well to keep them inside for a few days and thoroughly grease their bodies, with some nice smooth grease such as vaseline. The grease tends to keep the air from the irritated skin and ease the uncomfortableness of the animal. Vaseline also has a wonderful healing and curative property which makes it preferable in such cases.—J. C. McBeath, B.S.A., O. A. College, Guelph.

Owing to the excessive heat wheat has ripened earlier than usual, and in some localities was cut during the last day or so of June. Old timers declare they never knew this to happen before.

Forty applications were received by the Parkhill School Board for the position of principal of the public school. The Board engaged a returned soldier as principal.

Lake Erie is from two-to three feet above normal level this year. As a result summer cottagers at Erieau have had to move their buildings farther inland and former sidewalks and improvements have been washed away.

### WEAK MOTHERS REGAIN HEALTH

Through the New Blood Dr. Williams' Pink Pills Actually Make.

No mother should allow nervous weakness to get the upper hand of her. If she does worry will mar her work in the home and torment her in body and mind. Day after day spent amid the same surroundings is enough to cause fretfulness and depression. But there are other causes as every mother knows, that tend to make her nerves run down. A change would benefit her jaded system, and rest might improve her blood so as to give the nerves a better tone. But rest and change are often impossible, and it is then that all worn out women should take a short treatment with Dr. Williams' Pink Pills, which make new blood, rich with the elements on which the nerves thrive. In this way these pills restore regular health, increased energy, new ambition and steady nerve. There is a lesson for other women in the case of Mrs. Harry P. Snider, Wilton, Ont., who says:—"Five years ago my twin babies were born, and I was left very weak and very miserable, hardly fit to do anything. The doctor gave me medicine, but it did not help me. Then I tried another doctor, but with no better results. One day I went home to my mother, telling her how miserable I felt, and that the doctor's medicine had not done me any good. Mother asked me why I did not try Dr. Williams' Pink Pills, and as I was glad to try anything that might help me, I got three boxes when I went back home. By the time these were used there was no doubt they were helping me, and I got three more boxes. But I did not need them all, for by the time the fifth box was used I was entirely cured, and never felt better in my life. Now when I hear people talk about feeling weak or miserable I always recommend Dr. Williams' Pink Pills, and tell what they did for me, and in similar cases I shall continue to recommend them."

At the first sign that the blood is out of order take Dr. Williams' Pink Pills, and note the speedy improvement they make in the appetite, health and spirits. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### Test Patent Medicines

In the very near future all patent medicines being sold in Canada will be given a thorough test by government experts and all medicines containing alcohol in any form above a certain percentage will be listed and only allowed to be sold in minimum quantities, according to a report from Toronto. The Canada food board has arranged to have a committee appointed by the government to carry on this work. Certain patent medicines widely advertised are said to contain a large quantity of spirits and it is in order to stop the sale of these that the food board has decided to test all patent medicines. Medicines when listed will be sold in small quantities and the buyers will have to sign for each bottle. The sales of the medicines are then inspected by the government officials.
