[Cutting before and after rooting.] the greenhouse produce the best cuttings, but in case the stock plants are not near at hand it is generally advisable to transplant them to the greenhouse, cutting the stems back close to the ground. Such plants will give an abundance of good material for cuttings within two weeks. It is practicable when the cutting material is limited in quantity to utilize also the middle and lower portions of the lower being near the base to facilitate we would urge every citizen to join rooting. It is possible to secure a second set of cuttings from the original ones when they have grown to twice their original height, usually about three weeks after potting. The upper cuttings of the original stem are best adapted to this second series of cut-

SPRING

& AT&

Clarke Bros'.

MARCH 28, and Following Days

EARLY as the Season is there are already many signs of the coming vogue in smart Tailored Trimmed Hats. New and fresh from European and New York markets come the delightfully fasçinating creations, bringing a breath of Summer time, giving a glimpse of what is to obtain in modish Millinery. These new models äre far removed, às a rule, from last season's stylés. One big feature this year will be our finé, bùt inexpensive Hats, to sèll from \$1.75 to \$4.00. We cordially extend to you an invitation to visit our Millinery Department on Opening Day.

BRITISH IMPORTATIONS DRESS GOODS and WASH FABRICS, for SPRING and SUMMER

URING the Opening every inch of shelf and counter space will be laden with new Goods. Notwithstanding the advance of prices on many lines, buying in large quantities and importing direct, the price to us has been kept down. Putting out middle profits and selling by economical methods, we have pared a large slice off the ordinary values and are prepared to offer you Dress Goods and Wash Fabrics at very low prices. We invite you to our counters on Opening Day. If you have samples from other houses bring them with you; we would be very glad to make comparison of values.
