THIS Memoir was referred for examination to Dr. James C. Welling, LL.D., President of Columbian University, Washington, D. C., and to Dr. George A. Otis, of the Surgeon General's Office, U. S. Army.

Their report states that "the Memoir is a valuable contribution to our general knowledge of anthropology and archæology, while yielding besides a special contingent to the ethnology of the North American continent. Under the latter of these heads it raises some questions which seem of great significance, and which it is to be hoped will lead to further investigation."

JOSEPH HENRY,

Secretary S. I.

SMITHSONIAN INSTITUTION,

Washington, July, 1874.
