ALL THE BEST SHOPS ARE INSTALLING OUR

BORING and TURNING MILLS

This represents our 60 Boring and Turning Mill with one regular head and one special boring head.

THESE shops are then equipped with the best facilities for boring and turning a variety of jobs including wheels, pulleys, etc. The shops best equipped to handle work are the ones that are getting the work.

If any manufacturer thinks he can get along by doing all his boring and turning on a lathe he is making a costly mistake. He may have worked all right in his grandfather's time, but the shop owner of today is backing up against a harder proposition than his grandfather's competitors.

If you are interested enough in your own progress to write for further information on this subject, we will tell you all about our line of Boring and Turning Mills.
