SOLICITORS, pro tem:—MESSRS. COCKBURN, WRIGHT, and CLEWOW
SECRETARY, pro tem:—R. W. CRUCE, Esq.

THIS Company has been formed for the purpose of purchasing and working the valuable Iron Mines situate in the Townships of Templeton and Hull, in the County of Ottawa, and Province of Quebec, called the Haycock Iron Location. The Company holding the power under the Act to "carry on the business of exploring for, mining, smelting, manufacturing, dealing in and disposing of iron and other ores and metals, and the manufacturing, selling, dealing in, and disposing of steel workings, or the products of iron and steel."

The property to be acquired has been carefully examined on two different occasions by the eminent Mining Engineer, Dr. E. J. Chapman, Professor of Mineralogy and Geology, in the University College, Toronto, who in the course of his full detailed report, says: "The Haycock Iron Location comprises a compact area of 300 acres of Ottawa; together with an additional piece of land of 10 acres near the head of navigation on the River Gatineau. This latter area has been secured partly as a storing place and loading ground for, but chiefly as a convenient site for the erection of Furnaces. The area is connected with the mineral or iron area proper by a tramway of 6 1/2 miles in length, and of three feet gauge. The assets of the property also include a Steam Saw Mill, of 20 horse power, Blacksmith's Shop. Also a Derrick and other mining plant, tools, &c., together with about 5,000 tons of raised ore, and 30 tramway cars.

"The 300 acres of mineral lands are traversed in a general north-east and south-west direction by numerous bands of iron ore, favorably situated for mining, and for the greater part, if not entirely of workable thickness—the beds at present opened widening rapidly on descending." Prof. Chapman considers that these united beds "in the more central portion of the property alone, cannot carry less than from six to six-and-a-half millions of tons of ore, and they probably contain a much larger amount"—and further says, "I have been anxious to keep free from all suspicion of exaggeration. My estimate might, therefore, be greatly increased, and still be within the truth as it takes the bands of ore merely at their surface strength, and most of these bands, if not all, will probably be found to widen more or less in descending.

"The ore is of very remarkable purity, and it holds on an average 64 per centum of metal, equivalent to a furnace yield of about 60 per cent. A practical test made upon several cwts. of the ore, in a Stemen's furnace, produced at one heat a steel of very superior quality. The cost of producing first quality pigmetal from the ore at the furnace site on the Gatineau would not exceed \$20 per ton.

"These statements and estimates, which I have sought to keep scrupulously within the truth and which are confirmed, I may observe, by independent and thoroughly trustworthy testimony, prove the value of the Haycock Location as an iron property."

Trials and experiments made at some of the largest iron and steel works in England, the United States and Canada, have in every case proved the suitability of the ore for the manufacture of steel. The reports on the property particulars of analysis, and trials and samples of the ore, of steel pigots made in one heat from the ore, and rolled in one heat from the ingot, can be seen at the office in Ottawa, and of the Agents in Montreal.

It is intended to immediately erect bloomeries for reducing the ores.
The price to be paid for the purchase of the property is \$250,000, one-half in cash, and the balance in fully paid-up shares of the Company, in consideration of which the proprietor will make over the freehold of the estate free from all incumbrances whatsoever.

And further, as a proof of his bona fides, and his entire confidence in the prospects of the undertaking. He will guarantee to the Shareholders a minimum dividend of not less than **TEN PER CENT. PER ANNUM** on the paid up capital for three years from the date of the allotment of shares and as security for the due payment thereof, he will deposit in the hands of the Company the whole of his paid up shares, and give such further security in cash as may be thought necessary for the carrying out of his guarantee.
The Capital will be called up as follows: On Application \$2 per share; On Allotment, \$3 per share; 15th January, 1875, \$5 per share, and \$2 on the 15th day of each month thereafter as the Directors may require. Shares will be allotted according to priority of application. Applications for Stock must be made on the printed form, which, with any further information relative to the Company can be had at the Head Office in Ottawa, or from the Agents at Montreal, Messrs. DRUMMOND, CASSELS & CO.
Montreal, December 5th, 1874. 10-23-4-54.
